Decision-making is a pivotal function of any manager. A knowledge of Accounting, insofar as it affects decision-making, is very important for a manager. And very often, students find Accounting as one of the 'tough' subjects to handle. This book strives to make Accounting intelligible and easily comprehensible to students. The text gives a comprehensive coverage of the three branches of Accounting – Financial Accounting, Management Accounting, and Cost Accounting. It focuses on the various methods and techniques followed in the Management Reporting System. The text deals, in detail, with various accounting transaction procedures, methods of costing, ratio analysis, budgeting, forecasting, accounting errors, funds flow and cash flow statements, trial balance and balance sheet, and so on. It equips the students with the knowledge in the preparation, analysis, evaluation, and interpretation of financial statements, which will enrich their managerial

competence and decision-making skills. **KEY FEATURES** □ Emphasises the various accounting and decision-making techniques. □ Provides a number of problems and their solutions, besides giving notes, working notes, and exercises, to help the students understand the concepts better. This book is intended as a text for the postgraduate students of Management (MBA/MIB), financial courses (MFC), and undergraduate and postgraduate students of Commerce and those pursuing MCA. In addition, the book will be very useful to practising managers who wish to develop effective and result-oriented decision-making skills.

'Randall Wray's two volumes provide a bright beacon in a darkening night of turmoil, confusion and ignorance. By bringing together classics from both the mainstream and heterodox approaches to monetary theory and policy, Wray provides a fundamental resource for the urgently needed rethink on how the interrelated world of monetary production economies functions or misfunctions, and also a basis for the development of a sound theory on how to erect effective policies for tackling major, potentially disastrous problems.' - Geoffrey Harcourt, University of New South Wales, Australia This authoritative two-volume collection brings together the most important contributions to theories of money and banking written over the past century. Professor Wray covers a number of key topics including the historical debates about the nature of money, the role money and financial institutions play in the economy and monetary policy formation. A wide variety of approaches to money and banking are featured, among which are Monetarist,

Keynesian, Marxian, Post-Keynesian and Institutional, and the New Monetary Consensus. Also included are a number of chapters presenting General Equilibrium, Chartalist or State Money, and Circuitiste views. In addition to the views of economists, this well-rounded set incorporates historical, sociological and anthropological approaches to money as well as theoretical topics such as interest rate, inflation rate, and exchange rate determination. This collection, along with an original introduction by the editor, will be of immense value to anyone with an interest in the field of money and banking.
