The letters went out in mid-February. Each letter invited its recipient to spend a week at Camp So-and-So, a lakeside retreat for girls nestled high in the Starveling Mountains. Each letter came with a glossy brochure with photographs of young women climbing rocks, performing Shakespeare under the stars, and spiking volleyballs. By the end of the month, twenty-five applications had been completed, signed, and mailed. Had any of these girls tried to visit the camp for themselves on that day in February, they would have discovered that there was no such mountain, and that no one within a fifty-mile radius had ever heard of Camp So-and-So . . .

MC Escher Coloring Book Harry N. Abrams

First published in 1975, *The Cage* was a graphic novel before there was a name for the genre. Considered an early masterpiece of the genre, the Canadian cult comic has been out of print for

decades. The new edition includes an introduction by Canadian comics master and Lemony Snicket collaborator Seth (Palookaville; *It's a Good Life, If You Don't Weaken*). Cryptic and disturbing, like Dave Gibbons (*Watchmen*) illustrating a film by Ozu, *The Cage* spurns narrative for atmosphere, guiding us through a series of disarrayed rooms and desolate landscapes, tracking a stuttering and circling time and a sequence of objects: headphones, inky stains, bedsheets. It's not about where we're going but how - if - we get there.

Big Book of Geometric Designs and Illusions to Color Harry N. Abrams

Maurits Cornelis Escher (Leeuwarden, June 17, 1898--March 27, 1972 in Laren) was a Dutch mathematical artist known for his woodcuts, lithographs and mezzotints which feature impossible constructions, explorations of infinity, and tessellations. This book has numerous examples of how his extraordinary pictures of logic fool the brain into believing the impossible--water can run uphill and steps that go upwards.

48 portable mandala designs to color that provide a pathway to deeper meaning and personal growth--from the author of the popular *Coloring Mandalas* series. Coloring the traditional circular designs known as mandalas is a meditative practice, a healing exercise in times of crisis, and a pleasurable act of creativity. As a symbol of the Self, the mandala provides a connection to our innermost being. The forty-eight drawings presented here for coloring include designs inspired by forms of nature, Native American and Tibetan sand paintings, Hindu yantras, Turkish mosaics, and the art of M. C. Escher. These mandalas are organized according to the Great Round of Mandala, a scheme of twelve archetypal stages that represents a complete cycle of personal growth. Thus, to do the coloring book from start to finish will carry the reader through a balanced experience of change, guided by the accompanying text.

Tessellations: Mathematics, Art and Recreation aims to present a

comprehensive introduction to tessellations (tiling) at a level accessible to non-specialists. Additionally, it covers techniques, tips, and templates to facilitate the creation of mathematical art based on tessellations. Inclusion of special topics like spiral tilings and tessellation metamorphoses allows the reader to explore beautiful and entertaining math and art. The book has a particular focus on 'Escheresque' designs, in which the individual tiles are recognizable real-world motifs. These are extremely popular with students and math hobbyists but are typically very challenging to execute. Techniques demonstrated in the book are aimed at making these designs more achievable. Going beyond planar designs, the book contains numerous nets of polyhedra and templates for applying Escheresque designs to them. Activities and worksheets are spread throughout the book, and examples of real-world tessellations are also provided. Key features

- Introduces the mathematics of tessellations, including symmetry
- Covers polygonal, aperiodic, and non-Euclidean tilings
- Contains tutorial content on designing and drawing Escheresque tessellations
- Highlights numerous examples of tessellations in the real world
- Activities for individuals or classes
- Filled with templates to aid in creating Escheresque tessellations
- Treats special topics like tiling rosettes, fractal tessellations, and decoration of tiles
