Artist Tim Pond's lively and engaging book fuses science with art, providing the reader with the skills, techniques and knowledge they need to create sketches of animals filled with life and movement. There are some very good books written on life drawing, yet when it comes to drawing wildlife, illustrators and artists often revert to working solely from photographs, which can leave the artwork looking lifeless and flat. In this inspirational book, artist Tim Pond shows you how to observe and draw animals in zoos, farms, wildlife parks and aquariums, teaching you some fascinating facts about the animals along the way and ultimately bringing you closer to nature. One of the challenges with sketching wildlife is that animals are constantly moving, however having some basic understanding of the biology of an animal, such as knowing that a duck has a cheek or that a cheetah can't retract its claws, can influence how you might sketch them, and results in a lively drawing that captures the form, movement and ultimately the spirit of the animal in question.

Combining scientific knowledge with expert practical guidance is key to creating successful drawings of animals, and Tim's ability to convey this in a way that is both accessible and engaging makes this a unique and inspiring guide suitable for artists of all levels. Tim's book takes you on a journey of discovery that will enable you to develop the skills, techniques and knowledge you need to sketch a broad range of wildlife, encompassing mammals, reptiles, birds, fish and insects. It includes quick, gestural sketches as well as linear and tonal studies, in a variety of media - pencil, pen and ink, and watercolour. There are numerous studies comprising how to represent the different patterns of animals' coats, how to capture the plumage of an exotic bird in watercolour, and how to sketch a hippo's hooves, as well as guidance on tools, materials and basic techniques. The result is a treasure chest of fascinating facts, studies, sketches and annotated drawings that will not fail to ignite your enthusiasm for drawing animals from life.

To artist-writer-naturalist Hannah Hinchman, the blank pages of a journal are a call to awaken the soul, to celebrate being alive in the world, to get to know both the wilderness of our inmost selves and the "unpredictable and potent" natural world. In the richly illustrated pages of this book, she unfolds a myriad of wonders — the pattern of a bee abdomen, varieties of ice forms and sky colors, the joys of a garden — and shows us how to capture them on the page. Hinchman's respect for the miracle of our five senses, and her passion for what they can tell us about the world, is contagious. "Start with a smell, like a crushed marigold leaf, the sea, coal smoke," she advises, and from such raw materials begin to "decant the stuff of life" into journal form, "where it remains fresh, still tasting of its source." Even for one who has no intention of journal-keeping, to delve into Hinchman's own work is to see with new eyes. A Trail Through Leaves is a true gift and inspiration, a treasure-box of ways to write, draw, and be alive to the world. * "This is an important book, brilliantly produced. Its light will linger a long, long time." — John R. Stilgoe, professor in the history of landscape, Harvard University * "[B]oth a rich work of performance art and a personal growth tool with many handles." — Boston Globe

"An intriguing amalgam of personal memoir, philosophical speculation, natural lore, cultural history, and art criticism." —Los Angeles Times From the award-winning author of *Orwell's Roses*, a stimulating exploration of wandering, being lost, and the uses of the unknown Written as a series of autobiographical essays, *A Field Guide to Getting Lost* draws on emblematic moments and relationships in Rebecca Solnit's life to explore issues of uncertainty, trust, loss, memory, desire, and place. Solnit is interested in the stories we use to navigate our way through the world, and the

places we traverse, from wilderness to cities, in finding ourselves, or losing ourselves. While deeply personal, her own stories link up to larger stories, from captivity narratives of early Americans to the use of the color blue in Renaissance painting, not to mention encounters with tortoises, monks, punk rockers, mountains, deserts, and the movie *Vertigo*. The result is a distinctive, stimulating voyage of discovery.

Let's face it—all birds are fascinating, wonderful, idiotic jerks—no matter where in the world they reside. Following in the footsteps of the bestselling book *The Field Guide to Dumb Birds of North America*, this hilarious sequel ventures beyond to identify the stupidest birds around the world. Featuring birds from North and South America, Africa, Asia, Europe, and Oceania, author Matt Kracht identifies the dumb birds that manage to live all over the freaking place with snarky, yet accurate, names and humorous, anger-filled drawings. This guide book details exactly how much these morons suck with facts about each bird's (annoying) call, its (stupid) migratory pattern, and its

(downright tacky) markings. Complete with a matching game, bird descriptor checklist, tips on how to identify a bird (you can tell a lot by looking into a bird's eyes, for example), this profanity-laden book offers a balance of fact and wit that will appeal to hardcore birders and casual bird lovers (and haters) alike. A MUST-HAVE: A must-have sequel to the bestselling parody book *The Field Guide to Dumb Birds of North America*.
