Cognitive Psychology: Pearson New International Edition Cengage Learning

Psychology of Prejudice and Discrimination provides a comprehensive and compelling overview of what psychological theory and research have to say about the nature, causes, and reduction of prejudice and discrimination. It balances a detailed discussion of theories and selected research with applied examples that ensure the material is relevant to students. Newly revised and updated, this edition addresses several interlocking themes, such as research methods, the development of prejudice in children, the relationship between prejudice and discrimination, and discrimination in the workplace, which are developed in greater detail than in other textbooks. The first theme introduced is the nature of prejudice and discrimination, which is followed by a discussion of research methods. Next comes the psychological underpinnings of prejudice: the nature of stereotypes, the conditions under which stereotypes influence responses to other people, contemporary theories of prejudice, and how values and belief systems are related to prejudice. Explored next are the development of prejudice in children and the social context of prejudice. The theme of discrimination is developed via discussions of the nature of discrimination, the experience of discrimination, and specific forms of discrimination, including gender, sexual orientation, age, ability, and appearance. The concluding theme is the reduction of prejudice. An ideal core text for junior and senior college students who have had a course in introductory psychology, it is written in a style that is accessible to students in other fields including education, social work, business, communication studies, ethnic studies, and other disciplines. In addition to courses on prejudice and discrimination, this book is also adapted for courses that cover topics in racism and diversity. For instructor resources, consult the companion website (<http://www.routledge.com/cw/Kite>), which includes an Instructor Manual that contains activities and tools to help with teaching a prejudice and discrimination course; PowerPoint slides for every chapter; and a Test Bank with exam questions for every chapter for a total of over 1,700 questions. *ISE Essentials of Life-Span Development* Psychology Press

Known for its clear, straightforward writing style, comprehensive coverage, strong and current research-based approach, and excellent visuals and tables, LIFE-SPAN HUMAN DEVELOPMENT offers sections on four life stages: infancy, childhood, adolescence, and adulthood. Each chapter focuses on a domain of development such as physical growth, cognition, or personality, and traces developmental trends and influences in that domain from infancy to old age. This unique, topical organization helps you comprehend the processes of transformation occurring in each key area of human development. The new edition includes a clear focus on the complex interactions of nature and nurture in development, more integrated coverage of culture and diversity, and an exciting new media package for students. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Development Through Life Routledge

This chronologically-organized text is less expensive and briefer than most of the Human Lifespan texts. Its numerous examples drawn from education, nursing, and psychology make the content relevant to students from a variety of majors and backgrounds, while a highly praised study guide integrated into the text promotes and reinforces conceptual understanding. The new edition includes increased material on cognitive development and expanded coverage of culture. .

Lifetime Fitness McGraw-Hill Companies

This text provides an in-depth look at the science of human development ; highlighting theories and research that have useful applications for individuals working in fields such as education, counseling, and social work. The main purpose of this book is to provide the reader with information that can be translated into professional best practice applications. Throughout the text reflects the contemporary view that life span development is a process deeply embedded within and inseparable from the context of family, social network, and culture. Because the book is designed for graduate students, most topics, especially those that have special relevance to helping professionals, are covered in greater depth than in a typical life span text.

Life-Span Human Development Jones & Bartlett Learning

Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA) Chronologically organized, Lifespan Development: Lives in Context offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan.

Journey Across the Life Span Cengage Learning

Features a step-by-step guide through the case management process, from intake and assessment to referrals and termination. This book focuses on

what is most important for readers to consider, document, and pass along in each step of the human services process.

Life-Span Human Development SAGE Publications

Written within a biopsychosocial framework, Cavanaugh and Blanchard-Fields' best-selling text covers the specific ages-stages of adult development and aging. In its unparalleled coverage of current research and theory, the authors draw clear connections between research and application. The book's focus on "positive aging" and the gains and losses people experience across adulthood distinguish it from its competitors.

ACA Ethical Standards Casebook Psychology Press

Dougherty's Psychological Consultation And Collaboration In School And Community Settings, International Edition, clearly demonstrates how human service professionals help others work more effectively to fulfill their work-related or care taking responsibilities to individuals, groups, organizations, and communities. The book is structured to aid students in developing their own personal consultation model as they work through the book. The author provides a culturally sensitive generic application model that students can use to survey various approaches to consultation, examine the organizational context of consultation, and review the numerous ethical and professional challenges that consultants face as they deliver their services. New case studies bring concepts to life and help students learn how to deliver services most effectively. Updated throughout, this edition includes new content aligned with CACREP and other standards, an increased focus on school-based consultation, new material on cultural diversity, advocacy, social justice, prevention, systems theory, and ecological variables as they affect consultation and collaboration in counseling and psychology, and much more.

Assessment in Counseling InterVarsity Press

By combining the best of topical and chronological approaches, this text presents life-span development as a motion picture rather than as a series of individual snapshots.

Human Development Across the Life Span Wadsworth Publishing Company

Reflecting recent changes in the way cognition and the brain are studied, this thoroughly updated third edition of the best-selling textbook provides a comprehensive and student-friendly guide to cognitive neuroscience. Jamie Ward provides an easy-to-follow introduction to neural structure and function, as well as all the key methods and procedures of cognitive neuroscience, with a view to helping students understand how they can be used to shed light on the neural basis of cognition. The book presents an up-to-date overview of the latest theories and findings in all the key topics in cognitive neuroscience, including vision, memory, speech and language, hearing, numeracy, executive function, social and emotional behaviour and developmental neuroscience, as well as a new chapter on attention. Throughout, case studies, newspaper reports and everyday examples are used to help students understand the more challenging ideas that underpin the subject. In addition each chapter includes: Summaries of key terms and points Example essay questions Recommended further reading Feature boxes exploring interesting and popular questions and their implications for the subject. Written in an engaging style by a leading researcher in the field, and presented in full-color including numerous illustrative materials, this book will be invaluable as a core text for undergraduate modules in cognitive neuroscience. It can also be used as a key text on courses in cognition, cognitive neuropsychology, biopsychology or brain and behavior. Those embarking on research will find it an invaluable starting point and reference. The Student's Guide to Cognitive Neuroscience, 3rd Edition is supported by a companion website, featuring helpful resources for both students and instructors.

Theories of Human Development Routledge

Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Intentional Interviewing and Counseling Cengage AU

Cognitive Psychology: Applying the Science of the Mind combines clear yet rigorous descriptions of key empirical findings and theoretical principles with frequent real-world examples, strong learning pedagogy, and a straightforward organization. For undergraduate courses in cognitive psychology. Engagingly written, the text weaves five empirical threads - embodied cognition, metacognition, culture, evolution, and emotion -- throughout the text to help students integrate the material. The text's organization offers an intuitive description of cognition that enhances student understanding by organizing chapters around the flow of a piece of information that enters the cognitive system.

From Neurons to Neighborhoods Cengage AU

On the basis of a theologically grounded understanding of the nature of persons and the self, Jack O. Balswick, Pamela Ebstyn King and Kevin S. Reimer present a model of human development that ranges across all of life's stages: infancy, childhood, adolescence, young adulthood, middle adulthood and elder adulthood. They do this by drawing on a biblical model of relationality, where the created goal or purpose of human development is to become a reciprocating self—fully and securely related to others and to God. Along the way, they provide a context for understanding individual development issues—concerns, tensions, worries or crises encountered by the self in the context of change. Awareness of these issues is most pronounced at developmental transitional points: learning to talk and walk, beginning to eat unassisted, going to school, developing secondary sexual physical features, leaving home, obtaining full-time employment, becoming engaged and then married, having a child for the first time, parenting an adolescent, watching children move away from home, retiring, experiencing decline in physical and mental health, and, finally, facing imminent death. The authors contend throughout that, since God has created human beings for relationship, to be a self in reciprocating relationships is of major importance in negotiating these developmental issues. Critically engaging social science research and theory, *The Reciprocating Self* offers an integrated approach that provides insight helpful to college and seminary students as well as those serving in the helping professions. Those in Christian ministry will be especially rewarded by the in-depth discussion of the implications for moral and faith development nurtured in the context of the life of the church. In this revised and expanded second edition, Balswick, King and Reimer have added research from developmental neuroscience and neuropsychology, which connects transitional behavior to a changing brain. They have also included a wealth of research on the moral, spiritual and religious dimensions of human development, in which they introduce the notion of reciprocating spirituality. In addition the authors engage with the burgeoning fields of positive and evolutionary psychology. Christian Association for Psychological Studies (CAPS) Books explore how Christianity relates to mental health and behavioral sciences including psychology, counseling, social work, and marriage and family therapy in order to equip Christian clinicians to support the well-being of their clients.

Life Span Human Development Cengage Learning

This thorough revision of the highly successful first edition of Life-Span Development offers the reader a wide-ranging and thought provoking account of human development throughout the lifespan. The lifespan approach emphasises that development does not stop when we cease to be adolescents but goes on throughout adulthood and into old age. In initial chapters Leonie Sugarman outlines the issues surrounding the notion of development and how it can be studied, including reviews of the work of key theorists Erikson, Levinson and Gould. She goes on to consider the different ways in which the life course can be construed: as a series of age-related stages; as a cumulative sequence; as a series of developmental tasks; as a series of key life events and transitions or as a narrative construction which creates a sense of dynamic continuity. A final chapter looks at how people cope, the resources that are available and the theoretical and practical issues regarding interventions to assist them in the process. New to this edition is increased coverage of the topical issue of successful ageing and a new chapter on the increasingly popular narrative approach to lifespan development. This edition is also more student-friendly with exercises in self-reflection that encourage the reader to look at the development of their own lives or those of their current or future clients. Boxed material highlighting major theories and clarifying concepts is also included. This book will be invaluable for students of developmental and occupational psychology and professionals in the fields of health management, education and social work.

Gregg Shorthand Series 90 -Trans. Tapes Irwin Professional Publishing

Packed with the latest research and vivid examples, Sigelman and Rider's LIFE-SPAN HUMAN DEVELOPMENT, 10th edition, equips you with a solid understanding of the overall flow of development and the key transformations that occur in each period of the life span. Written in clear, straightforward language, each chapter focuses on a domain of development -- such as cognitive or personality development -- and traces developmental trends and influences in that domain from infancy to old age. Sections on infancy, childhood, adolescence and adulthood are included. The text emphasizes theories and their use in helping us understand development, focuses on the interplay of nature and nurture in development, and also provides an expansive examination of both biological and sociocultural influences on life-span development. Additionally, MindTap digital resources offer anywhere, anytime learning solutions.

Life-Span Human Development Wadsworth Publishing Company

Here's just what you need to effectively care for your patients at any stage of life in today's ever-changing world of health care. Elaine Polan and Daphne Taylor guide you through the life cycle—from conception to old age—with an emphasis on health promotion, maintenance, and restoration in clinical practice.

The Elements of Counseling Brooks Cole

Over 450 data-based studies and years of field testing attest to the effectiveness of the Microskills model in INTENTIONAL INTERVIEWING AND COUNSELING: FACILITATING CLIENT DEVELOPMENT IN A MULTICULTURAL SOCIETY, International Edition. This hallmark text enables students of many backgrounds to master basic skills in a step-by-step fashion, thereby rapidly empowering them to use listening and influencing skills as they conduct full interviews. Along the way, students are challenged to re-evaluate their current behaviors and perceptions. As a result, they gain valuable insight about themselves, their strengths, and the areas where they can develop further. By the time they finish reading the text, students will have the ability to adapt their skills to address both individual and multicultural uniqueness, conduct interviews using five different theoretical approaches, and be well on their way to developing a personalized style and theory of interviewing and counseling that matches their own aptitudes and affinities.

Human Development and Performance Throughout the Lifespan Cengage Learning
