*Kafka and the Traveling Doll* Routledge

This volume enters the global conversation on religion and revitalization from the perspective of Latin America and the Caribbean. It builds on a conversation flowing from specific cases and contexts across different confessional and historical traditions. As such, it engages the ongoing work of renewal, both within Christianity and within social life, and the inextricable link between the two. This is ultimately a comparative conversation that embraces difference and the plurality of Christian expression globally, recognizing how differences in the larger religious and spiritual context in each place add to the depth of understanding and possibilities for social transformation.

The most famous and controversial novel from one of the greatest writers of the twentieth century tells the story of Humbert Humbert's obsessive, devouring, and doomed passion for the nymphet Dolores Haze. "The conjunction of a sense of humor with a sense of horror [results in] satire of a very special kind." —The New Yorker Awe and exhilaration—along with heartbreak and mordant wit—abound in *Lolita*, which tells the story of the aging Humbert Humbert's obsession for the nymphet Dolores Haze. *Lolita* is also the story of a hypercivilized European colliding with the cheerful barbarism of postwar America. Most of all, it is a meditation on love—love as outrage and hallucination, madness and transformation.

One year before his death Frank Kafka had an extraordinary experience. Having a walk through Steglitz Park, in Berlin, he found a little girl crying heartbroken. She had lost her doll. To calm her down Frank introduced himself as the Dolls's Postman, and told the little girl that the doll was away on a trip but had sent a letter for her that will be delivered by himself the following day. For three weeks Frank focused exclusively on the doll's letters that he handed on every day to the girl. Nobody has ever known who that little girl was and what happened with the letters.

EXACTLY A MONTH HAS ELAPSED since I finished the first series of my writings—just that period of the flow of time which I intended to devote exclusively to resting the parts of my common presence subordinate to my pure reason. As I wrote in the last chapter of the first series, I had given myself my word that during the whole of this time I would do no writing whatsoever, but would only, for the well-being of the most deserving of these subordinate parts, slowly and gently drink down all the bottles of old calvados now at my disposal by the will of fate in the wine-cellar of the Prieuré, and specially provided the century before last by people who understood the true sense of life. Today I have decided, and now I wish—without forcing myself at all, but on the contrary with great pleasure—to set to work at my writing again, of course with the help of all the corresponding forces and also, this time, with the help of the law-conformable cosmic results flowing in from all sides upon my person from the good wishes of the readers of the first series. I now propose to give a form understandable for everyone to everything I have written down for the second series, in the hope that these ideas may serve as preparatory constructive material for setting up in the consciousness of creatures similar to myself a new world—a world in my opinion real, or at least one that can be perceived as real by all degrees of human thinking without the All and Everything: Beelzebub's Tales to His Grandson, p. 1236 slightest impulse of doubt, instead of the illusory world which contemporary people picture to themselves. And indeed, the mind of contemporary man, of whatever level of intellectuality, is only able to take cognizance of the world by means of data which, whenever accidentally or intentionally activated, arouse in him all sorts of fantastic impulses. And these impulses, by constantly affecting the tempo of all the associations flowing in him, gradually disharmonize the whole of his functioning, with such sorrowful results that it is impossible for any man, if he is able to isolate himself even a little from the influences of the established abnormal conditions of our ordinary life and is willing to think about it seriously, not to be terrified—as, for example, by the shortening of our life with each decade. First of all, for the 'swing of thought', that is, for establishing a corresponding rhythm for my thinking and also for yours, I wish to follow somewhat the example of the Great Beelzebub and imitate the form of thinking of one highly respected by him and by me, and perhaps already, brave reader of my writings, by you, if of course you have had the daring to read through to the end all of the first series. That is to say, I wish to introduce at the very beginning of this writing of mine what our dear-to-all Mullah Nassr Eddin would call a 'subtly philosophical question.' I wish to do this at the very beginning because I intend to use freely, both here and in my later expositions, the wisdom of this sage, who is now recognized almost everywhere and upon whom, it is rumoured, the title of 'The One and Only' is soon to be officially conferred by the proper person. And this subtly philosophical question may already be sensed in that sort of perplexity which is bound to arise in the consciousness of every reader of even the very first paragraph of this chapter, if he compares the many data on which his firm convictions about medical matters are based with the fact that I, the author of Beelzebub's Tales to His Grandson, after the accident which nearly cost me my life, with the functioning of my organism not yet fully re-established owing to the incessant active effort Mullah Nassr Eddin, a legendary figure in numerous countries of the Near East, is an embodiment of popular wisdom.

Celiac disease is a systemic autoimmune process and appears in genetically predisposed individuals, with a well-known cause, consisting in a permanent intolerance to gluten, a protein contained in the flour of wheat, rye, barley and oats. Worldwide celiac disease affects to 1% of the Caucasian and there is recent evidence that the disease is increasing in USA and Finland among other regions in the world. It is considered to be the most prevalent disease with a genetic predisposition. The clinical forms of presentation are varied. The classical form consisting of diarrhea, anemia and failure to thrive is still common in children, but in the adult patients the symptoms resemble the irritable bowel syndrome. Mono-symptomatic forms with extra-intestinal manifestations are frequent. Hematological, cutaneous, articular, hepatic, bone and neurological manifestations are often described. This protean presentation and the lack of awareness explain the delay in diagnosis and suggest that screening in high-risk groups is indicated. The publication of this book written mainly by Spanish and Latin-American clinicians, researchers, and teachers, demonstrates the wide interest and the involvement of different disciplines that are necessary to understand celiac disease and gluten-related pathologies, such as non-celiac gluten-sensitivity. This has a great impact in the general public and in the industry. However, the knowledge of non-celiac gluten-related pathologies remains scarce but presently in the process of being properly defined. This book also highlights the importance of recognizing non-celiac gluten-sensitivity and briefly discusses a new definition. It also provides some perspectives to take into account when studying celiac disease in China and Central America. It describes new observations in Mexico, El Salvador and Costa Rica. The psychosocial impact as studied and reported by Argentinean investigators also adds to the value of this book. Written with a multidisciplinary team, we think that this book could be of interest to a great variety of medical specialists. Due to the systemic nature and variable presentation of celiac disease it certainly is of interest to pediatricians, gastroenterologists, hepatologists, specialists in internal medicine, general practitioners as well as hematologists, immunologists, geneticists, pathologists, rheumatologists, dermatologists, neurologists, gynecologists, neurologists, psychiatrists, psychologists, orthopedic surgeons, specialists in rehabilitation medicine, endocrinologists. Being gluten the cause of these disorders, the food industry, dietitians and nutritionists will benefit from the valuable information presented in this book.

The Information Economy Report 2017 analyzes the evolving digital economy and its implications for trade and development. While these are still early days of the digital economy, it is already clear that it will have globally transformative impacts on the way we live, work and develop our economies. As the world strives to implement the 2030 Agenda for Sustainable Development, harnessing the power of information and communications technologies (ICTs) is essential. Large parts of the developing world remain disconnected from the Internet, and many people lack access to high-speed broadband connectivity. Policymaking at the national and international levels needs to mitigate the risk that digitalization could widen existing divides and create new gaps. Since increased reliance on digital technologies, such as cloud computing, three-dimensional printing, big data and "the Internet of things", it is essential to start assessing opportunities and pitfalls alike, and to prepare for what is coming. The analysis contained in the report contributes to this process and proposes ways in which the international community can reduce inequality, enable the benefits of digitalization to reach all people and ensure that no one is left behind by the evolving digital economy.

Containing hundreds of stunning photographs by Yves-Jacques Rey-Millet, *A Photographic Guide to the Birds of the Cayman Islands* provides full photographic coverage of every species on the Cayman Islands list. With a rich avifauna of more than 300 species, the three islands that make up the Cayman Islands - Grand Cayman, Little Cayman and Cayman Brac - form an increasingly popular birding destination. Although the islands' sole endemic species, Cayman Islands Thrush, was extinct by the 1940s, the islands have a healthy crop of regional scarcities and are an important migrant stopping point as they cross the Caribbean. Concise text for each species includes identification, similar species, voice, habitats and behaviour, status and distribution. This guide is an essential companion for anyone visiting these beautiful islands.

(abridged and revised) This reference grammar offers intermediate and advanced students a reasonably comprehensive guide to the morphology and syntax of educated speech and plain prose in Spain and Latin America at the end of the twentieth century. Spanish is the main, usually the sole official language of twenty-one countries, and it is set fair to overtake English by the year 2000 in numbers of native speakers. This vast geographical and political diversity ensures that Spanish is a good deal less unified than French, German or even English, the latter more or less internationally standardized according to either American or British norms. Until the 1960s, the criteria of internationally correct Spanish were dictated by the Real Academia Española, but the prestige of this institution has now sunk so low that its most solemn decrees are hardly taken seriously - witness the fate of the spelling reforms listed in the *Nuevas normas de prosodia y ortografía*, which were supposed to come into force in all Spanish-speaking countries in 1959 and, nearly forty years later, are still selectively ignored by publishers and literate persons everywhere. The fact is that in Spanish 'correctness' is nowadays decided, as it is in all living languages, by the consensus of native speakers; but consensus about linguistic usage is obviously difficult to achieve between more than twenty independent, widely scattered and sometimes mutually hostile countries. Peninsular Spanish is itself in flux.

First published in 1937, *Island of Bali* is still regarded by many as the most authoritative text on Bali and its fascinating people. Included is a wealth of information on the daily life, art, customs and religion of this magical Island of the Gods. In the author's own words it presents a bird's-eye view of Balinese life and culture. Miguel Covarrubias, the author, was a noted painter and caricaturist as well as a student of anthropology. He lived in Bali for a total of three years in the early 1930s, and today his account is as fresh and insightful as it was when it was originally published. Introducing the island with a survey of its history, geography and social structure, Covarrubias goes on to present a captivating picture of Balinese art, music and drama. Religion, witchcraft, death and cremation are also covered. *Island of Bali* will appeal to anyone with interest in this unique island, from general reader, lover of art to serious anthropologist alike. Complementing the text are 90 drawings by

Covarrubias and countless others by Balinese artists. Also included are 114 half-tone photographs, and five full-color paintings by the author.

En esta novela póstuma, cuyo manuscrito dejó en Cuba, encontramos lo mejor de la madurez del Premio Nobel de Literatura Ernest Hemingway. Publicada por primera vez en 1970, nueve años después de la muerte del autor, *Islas a la deriva* cuenta la historia de un artista aventurero, Thomas Hudson, cuya personalidad recuerda mucho a la del propio Hemingway. La novela arranca en 1930 con las experiencias del protagonista como pintor en la isla de Bimini, situada en plena corriente del Golfo, para detenerse en sus actividades antisubmarino cerca de la costa de Cuba durante la Segunda Guerra Mundial. «Esta carta es para hablarte de un hombre joven que se llama Ernest Hemingway, que vive en París, escribe para el *Transatlantic Review* y tiene un futuro brillante... Yo trataría de encontrarlo enseguida. Es el mejor.» Carta de F. Scott Fitzgerald a Maxwell Perkins, editor de Charles Scribner's Sons, 1924

Esta obra aborda la auto-representación de un amplio colectivo de ciudadanos de distintos países americanos que o bien nacieron en Castilla y León o son descendientes de emigrantes de nuestra región. La base fundamental del estudio radica en una de las más importantes colecciones memorialísticas de la emigración europea a América surgida de los denominados Premios Memoria de la Emigración Castellana y Leonesa. Al calor de aquellos, desde 2005 se han reunido trescientos relatos de vida que reflejan la memorialización del pasado entre algunos colectivos, fundamentalmente en Argentina y Cuba, cuya vinculación con Castilla y León se ha visto revitalizada en los últimos veinticinco años. Tras analizar la recepción del método biográfico en Antropología y otras Ciencias Sociales y Humanas, y tras discutir conceptos como «memoria colectiva» o «identidad», se analizan los contenidos narrativos de ese corpus, particularmente los que afectan a la experiencia migratoria y su corporalidad. El trabajo se completa con el desvelamiento de los dispositivos mediadores de los sentidos y prácticas de identificación de los autores de los relatos, desde sus motivaciones autorales o memorialísticas, al propio dispositivo de los Premios, pasando por marcos de sociabilidad como la familia, las asociaciones étnicas o las instituciones de la región de origen.

Long recognized as a classic of American nature writing. This chronicle of a solitary year spent on a Cape Cod beach was written in longhand at the kitchen table, in a little room overlooking the North Atlantic and the dunes. In 1964, the Cape Cod house was officially proclaimed a National Literary Landmark. In 1978, a massive winter storm swept it off its foundation and out to sea.
