This popular book

introduces readers to the operations underlying video production. It provides thorough coverage of the theory readers need to know, balancing complexity with

practical "how-to" information about detailed subjects, and it does so in a concise, conversational style. The authors have incorporated the major changes that

have occurred in recent years; further increased the emphasis on digital, non-linear video production; updated and expanded information on mobile technologies; and added more than 25 new or updated figures. The subtitle remains "disciplines and techniques" because the book's focus continues to be on the fact that students need those foundations in order to be successful in video production, no matter where they may end up. Its affordable, student-

friendly price, companion website, and print book and ebook options add to this book's practical nature.

The Basketball Coach's Primer is a resource of basketball ideas. It is written for coaches ready

to review the principles and methods of the game before getting started with a new team, or for renewing coaches reviewing for the next season of basketball. Reviewing and renewing to gain greater understanding makes the game better for all the people of basketball. The basketball content or substance herein is not the authoritative "last" word but this study puts forward the important ideas for developing the players and the game at a fundamental level. This

resource provides a synopsis of essentials, including a comprehensive outline of the basic maneuvers and processes for developing the skills and mobility of the players. A substantial quantity of relevant game-specific basketball applications are added to the mix of ideas for good measure. The Basketball Coach's Primer also lays the basis for a more advanced game if needed.

 First published in 1980, More Bad News is the Second Volume in the research findings of the Glasgow University Media Group. It develops the analytic findings and methods of the first volume Bad News through a series of Case Studies of Television News Coverage, and argues that much of what passes as balanced and factual news reporting is produced from a highly partial viewpoint. Focusing on the British economy in crisis, and its

thematic linkage with the Social Contract during the first four months of 1975, the book deals with three main levels of activity: the story, the language and the visuals. As the book unpacks each level of routine news coverage a picture emerges which has the surface appearance of neutrality and balance but is in fact highly partial and restricted

While boards acknowledge they bear

ultimate responsibility and accountability for their organizations' affairs, governance quality is often far from optimal. The High-Performance Board offers pragmatic and candid advice about what your board must do to maximize performance and contributions. The authors provide sixty-four principles designed to help your board achieve peak performance. They describe every principle in detail and present best practices and practical applications for each one.

Each section of the book concludes with a board check-up—a set of questions that can be used to assess your board in light of the principles. A quick read for busy board members, this book is the ultimate board "drivers' manual."
