Under the Environmental Impact Assessment (EIA) Directive, decision making bodies must consider the environmental effects of projects before

allowing them to proceed. As the House of Commons will be asked, at Third Reading, to approve the building of Crossrail this document aims to inform the debate by summarising the work that has been done to assess, control and mitigate the environmental impacts of the scheme. It also explains why the Government takes the view that the project is worthy of support. It covers: the environmental statement; role of the Select Committee; the general approach to the control and mitigation of environmental impacts; post-mitigation impacts; the need for and benefits of Crossrail; and human rights. The appendices, which

form the bulk of the document, include a summary of the reason for the Governments support of the project; a list of Information Papers and other sources of information; and examples of correspondence on the consideration of alternatives.
