This book represents a detailed and comprehensive examination of the developments of NATO's engagement in Kosovo, and the related policies of western countries. In addition to offering an in-depth analysis of historical developments in the relationships between Albanians and Serbs, the book also provides a constructive discussion of the events of the Kosovo conflict, which constituted one of the main concerns in the international agenda towards the end of the twentieth century. The basic theme set forth in this book is the reasoning behind NATO's intervention in Kosovo during the spring of 1999, namely to end the conflict between Albanians and Serbs and to aid the Kosovo Albanians in achieving their freedom from the jurisdiction of the Serbian state. Based on extensive evidence, the author analyzes the contradicting stances conveyed at the Security Council regarding the conflict, NATO's military intervention and the issue of Kosovo's future. The book provides useful information for any scholars, students and readers interested in gaining a more detailed understanding of Kosovo's historical developments on an international level. It offers the reader detailed insights into, and descriptions of, the events that took place in the military conflict in Kosovo; it provides various facts and figures, evidences and counterarguments in response to what happened in this politically volatile region.

Non-Discrimination Law John Wiley & Sons

The second edition of the Criminal Law Sourcebook has been significantly expanded in order to provide law students with a comprehensive selection of key materials drawn from law reports, statutes, Law Commission Consultation Papers and Reports, and Home Office publications. The materials reflect the range of topics taught on the vast majority of undergraduate and CPE criminal law modules, and provide a platform from which the reader can embark upon a more critical evaluation of both theory and doctrine. Extensive extracts are included from a number of recent landmark rulings, including decisions by the House of Lords in *B v DPP* (defence of mistake), *R v Smith* (objective test for the defence of provocation), *R v Hinks* (whether the recipient of a gift can be a thief), and *R v Powell and Daniels*; *R v English* (scope of accessory liability for murder), and the Court of Appeal's ruling in *In Re A* (conjoined twins). Recent statutory initiatives that have been incorporated include the Protection from Harassment Act 1997, the Criminal Justice (Terrorism and Conspiracy) Act 1998, and the Sexual Offences (Amendment) Act 2000. The impact of the Human Rights Act 1998, in so far as it relates to substantive criminal law, is also covered. Substantial extracts are provided from all relevant Law Commission and Home Office law reform publications. In addition to the draft Criminal Code Bill, materials have been selected dealing with reform of sexual offences, consent, conspiracy to defraud,

deception offences, offences against the person, accessory liability and involuntary manslaughter.

World Economic Outlook, April 2014 University of Chicago Press
Global activity has broadly strengthened and is expected to improve further in 2014-15, according to the April 2014 WEO, with much of the impetus for growth coming from advanced economies. Although downside risks have diminished overall, lower-than-expected inflation poses risks for advanced economies, there is increased financial volatility in emerging market economies, and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to changing fundamentals, facilitate external adjustment, further monetary policy tightening, and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term, but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies' growth and concludes that strong growth in China played a key role in buffering the effects of the global financial crisis in these economies.

This timely reader in moral philosophy addresses a controversy that strongly affected recent European reflections on the relevance of ethics for theories of democratic institutions and democratic legitimacy. The debate centers around the idea of a communicative ethics as articulated by Jürgen Habermas and Karl-Otto Apel, and it is representative both of recent attempts to bridge the gap between Continental and Anglo-American philosophy and of the turn to language that has characterized much of recent philosophy. The Communicative Ethics Controversy illustrates philosophical dialogue in action, moving from theses to counterarguments to rejoinders. Theoretical statements by Habermas, Apel, and two of their leading students, Dietrich Böhmeler and Robert Alexy, are followed by a series of five arguments by their leading critics, who represent viewpoints ranging from Kantian idealism to Wittgensteinian ordinary-language theory. Fred Dallmayr's introduction and Seyla Benhabib's incisive conclusion place the debate in perspective, bringing it up to date and relating it to the Anglo-American context. Seyla Benhabib is Associate Professor of Philosophy and Women's Studies at the State University of New York, Stony

Brook. Fred Dallmayr is Packey Dee Professor of Government at the University of Notre Dame. Contributors: Robert Alexy. Karl-Otto Apel. Seyla Benhabib. Dietrich Bohler. Jurgen Habermas. Otfried Hoffe. KarlHeinz Ilting. Hermann Lubbe. Herbert Schnadelbach. Albrecht Wellmer.

Towards a Transformation of Philosophy Routledge

Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and transnational practice. It was argued that transnational rules (such as transnational contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as *lex mercatoria*. This volume analyzes the different legal approaches to international business problems (including the theory of *lex mercatoria*) as well as their implications for international practice. As such, the relevance and importance of substantive law and conflict of laws and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

Decision-making is a process of choosing from possible courses of action in order to attain goals and objectives. Nobel laureate Herbert Simon wrote that the whole process of managerial decision-making is synonymous with the practice of management. Decision-making is at the core of all managerial functions. Planning, for example, involves the following decisions: What should be done? When? How? Where? By whom? Other managerial functions, such as organizing, implementing, and controlling, rely heavily on decision-making. Decision by Objectives is an invaluable book about the art and science of decision-making. It presents a very practical approach to decision-making that has a sound theoretical foundation, known as the analytic hierarchy process. Intended for both the student and the professional, the book includes approaches to prioritizing, evaluating alternative courses of action, forecasting, and allocating resources. By focusing on objectives rather than alternatives alone, it shows the reader how to synthesize information from multiple sources, analyses, and perspectives. The methods presented have been gaining popularity throughout the world.

First Published in 1980 (English Translation) Towards a Transformation of Philosophy presents selected essays from Karl -Otto Apel's two- volume German collection that was published in 1973 under the title Transformation der Philosophie. Karl -Otto Apel's studies in philosophy and the social sciences can be said to have bridged the gap that had hitherto existed between the Anglo-Saxon traditions of analytical philosophy of language and pragmatism, and the philosophical traditions of the European continent of phenomenology, existentialism, and hermeneutics. Apel points to language as the crucial dimension in the

constitution of historical meaning and therefore as the historical condition for the possibility of truth. In this context he discusses the hermeneutic dimension of Wittgenstein's philosophy and that of his followers, together with the development of pragmatism and with recent trends in Chomsky's linguistics. In arguing for the complementarity of technical and practical interests in acquiring knowledge for a critical theory of society Apel examines the preconditions for an emancipatory critique of ideology and the communication community as the predeterminate of both the social sciences and moral discourse. In all the essays, Apel sets out to counter the positivistic and scientific restrictions placed upon a satisfactory understanding of the preconditions for the possibility and validity of human knowledge. This is a must read for scholars and researchers of philosophy.
