*The 7 Levels of Change* Bloomsbury Publishing

"Climate change? Global warming?"... We've probably all heard these words over and over again, from media reporters, from elected officials, and even from friends and co-workers. Scientists argue about what they mean for our future. What is the truth? How can we decipher exactly what really are the effects of environmental damage? Where can we go to get dependable, clearly-written information so we can join in the conversation and take the

right action? **THE CURIOSITY GUIDE TO GLOBAL WARMING** fills that need, with a scientifically accurate introduction to perhaps the most important issue of our time. It unravels the mysteries of nature and settles any issue of "reasonable doubt" about the reality of global climate change. Dr. Ernest Zebrowski, a prominent scientist and educator, examines everything from melting glaciers and disappearing snow covers to increased levels of carbon dioxide in our atmosphere; patterns of climate change through the centuries, and the potentially disastrous effects (including rising seas, more violent storms, and alterations in agricultural productivity) of environmental damage. If you need to understand what's in the news, in print and on line about this subject, this is the one book to read. From the Hardcover edition.

From the renowned author of the New York Times best seller *The Sibley Guide to Birds*, a comprehensive, beautifully illustrated guide to identifying birds in the field. *Sibley's Birding Basics* is an essential companion for birders of all skill and experience levels. With Sibley as your guide, learn how to interpret what the feathers, the anatomical structure, the sounds of a bird tell you. When you know the clues that show you why there's no such thing as, for example, "just a duck" birding will be more fun, and more meaningful. An essential addition to the Sibley shelf! *The Sibley Guide to Birds* and *The Sibley Guide to Bird Life and Behavior* are both universally acclaimed as the new standard source of species information. And now David Sibley, America's premier birder and best-known bird artist, turns his attention to the general characteristics that influence the appearance of all birds, unlocking the clues to their identity. In 200 beautifully rendered illustrations and 16 essays, this scientifically precise volume distills the essence of Sibley's own experience and skills, providing a solid introduction to "naming" the birds. *Birding Basics* reviews how one can get started as a birder—the equipment necessary, where and when to go birding, and perhaps most important, the essential things to

look for when birds appear in the field—as well as the basic concepts of bird identification and the variations that can change the appearance of a bird over time or in different settings. Sibley also provides critical information on the aspects of avian life that differ from species to species: feathers (color, arrangement, shape, molt), behavior and habitat, and sounds.

Many fitness professionals and sports coaches working with clients find difficulties in ensuring their clients stay motivated. Any professional prescribing a fitness programme to a client knows

that the biggest roadblock to success is the client's ability to make a change in their day-to-day life. You can tell clients what they need to know, but you can't make lifestyle changes for them. You can however show understanding, put changes in perspective, offer motivation and lay out the smaller steps that build towards a greater goal. THE COMPLETE GUIDE TO BEHAVIOURAL CHANGE FOR SPORT AND FITNESS PROFESSIONALS covers both theoretical issues related to behaviour change and motivation and practical application in the fitness or sport setting, outlining all the different models of behaviour change and discussing clear motivation strategies. It is especially relevant for fitness professionals prescribing exercise to clients with health issues, or referred clients who need support to become more active. But it is equally suited to helping recreational and amateur athletes who want to change their lifestyle or mental attitude in order to improve their performance. Written in clear, accessible language for the non-scientist, this a reference guide for:

- fitness instructors and personal trainers
- sports coaches and sports psychologists
- professionals from the health and fitness industry working at Levels 3 and 4 of the qualifications framework
- undergraduates and postgraduates in sports studies and health and fitness
- those working to promote activity in community settings
- anyone wishing to increase personal knowledge of behaviour change and motivation.
