"An exhilarating, can't miss, one-sit read that'll stay with you long after turning the final page!" -

Ryan Steck, The Real Book Spy Ten years ago, legendary author Riley Cannon produced three of the best-selling thriller novels of all-time. Then, she vanished, leaving the final three books of the saga unfinished and producing the biggest mystery in the history of publishing. Now, a decade later, there is word from her mega-agent, the glamorous and powerful Topaz Kennedy, that a new Cannon novel is all-but-finished. But, Topaz knows the truth: Riley Cannon hasn't even started the book. With the clock counting down to the publication date, desperate measures are needed... Meanwhile, in the sunrise-side town of Hampstead, Michigan, thirty-five-year-old Kaj Reynard emerges from Lake Huron on a cool June night and falls face down on the beach next to a fading bonfire-with a knife stuck in his back. Who murdered him? And why? Enter veteran Hampstead P.I. Obadiah Ben-David, a man who has never taken on a case that he couldn't solve. But this mystery is different. The only piece of evidence is the knife, which has no prints. Not a soul saw or heard a boat that night, and the woman sitting by her bonfire did not see anyone else in the water. It is almost as if the deep blue waters of Lake Huron killed Kaj Reynard, and the Huron breezes blew him to shore. With Hampstead in jeopardy of losing its summer revenue from vacationers who are chilled to their bones of a murderer on the loose, Ben-David takes on an apprentice-a computer coder, Rachel Roberts, who lives down the beach from where Kaj came ashore. Bored by her solitary existence behind a screen all day, Rachel thinks that becoming a P.I. would be a welcome sea change in her own life. But neither of them can foresee the tangled web of lies, treachery, and danger they will encounter. For when the summer Huron breezes arrive, the blood boils, the inhibitions disappear, and no one is safe. If you are a fan of James Patterson, Janet Evanovich, Robert B. Parker, Louise Penny, Michael Connelly, Nora Roberts, John D. MacDonald, Lisa Gardner, John Grisham's Camino series, or the TV series Castle, you'll enjoy Huron Breeze and Landon Beach's Great Lakes Saga.

Excerpt: Jaws is a 1975 American horror-thriller film directed by Steven Spielberg and based on Peter Benchley's novel of the same name. The police chief of Amity Island, a fictional summer resort town, tries to protect beachgoers from a giant man-eating great white shark by closing the beach, only to be overruled by the town council,

which wants the beach to remain open to draw a profit from tourists during the summer season. After several attacks, the police chief enlists the help of a marine biologist and a professional shark hunter. Roy Scheider stars as police chief Martin Brody, Richard Dreyfuss as oceanographer Matt Hooper, Robert Shaw as shark hunter Quint, Murray Hamilton as the Mayor of Amity Island, and Lorraine Gary as Brody's wife, Ellen. Jaws is regarded as a watershed film in motion picture history, the father of the summer blockbuster film and one of the first "high concept" films. Because of the film's success in advance screenings, studio executives decided to distribute it in a much wider release than ever before. The Omen followed suit in the summer of 1976 and then Star Wars one year later in 1977, cementing the notion for movie studios to distribute their big-release action and adventure pictures (commonly referred to as tentpole pictures) during the summer. Widely regarded as one of the greatest films of all...

An urgent volume of essays engages the Gothic to advance important perspectives on our geological era What can the Gothic teach us about our current geological era? More than just spooky, moonlit castles and morbid graveyards, the Gothic represents a vibrant, emergent perspective on the Anthropocene. In this volume, more than a dozen scholars move beyond longstanding perspectives on the Anthropocene—such as science fiction and apocalyptic narratives—to show that the Gothic offers a unique (and dark) interpretation of events like climate change, diminished ecosystems, and mass extinction. Embracing pop cultural phenomena like True Detective, Jaws, and Twin Peaks, as well as topics from the New Weird and prehistoric shark fiction to ruin porn and the “monstrosocene,” Dark Scenes from Damaged Earth demonstrates the continuing vitality of the Gothic while opening important new paths of inquiry. These essays map a genealogy of the Gothic while providing fresh perspectives on the ongoing climate chaos, the North/South divide, issues of racialization, dark ecology, questions surrounding environmental justice, and much more.
