Global Burden of Disease and Risk Factors UNICEF

Cardiovascular, respiratory, and related conditions cause more than 40 percent of all deaths globally, and their substantial burden is rising, particularly in low- and middle-income countries (LMICs). Their burden extends well beyond health effects to include significant economic and societal consequences. Most of these conditions are related, share risk factors, and have common control measures at the clinical, population, and policy levels. Lives can be extended and improved when these diseases are prevented, detected, and managed. This volume summarizes current knowledge and presents evidence-based interventions that are effective, cost-effective, and scalable in LMICs.

Significance of Mineralogy in the Development of Flowsheets for Processing Uranium Ores Juta and Company Ltd

Over the course of the last decade, political and mental entities at large have embraced global mental health: the idea that psychiatric health is vital to improved quality of life. Physicians globally have implemented guidelines recommended by the National Institute of Mental Health (NIMH) in 2007, thereby breaking down barriers to care and improving quality of life in areas where these practices have been implemented. Programs for training and education have expanded as a result. Clinicians benefit more from both local resources in some regions as well as in international collaboration and technological advancements. Even amidst all of these positive outcomes, clinicians still face some stumbling blocks. With worldwide statistics estimating that 450 million people struggle with mental, neuropsychiatric, and neurological disorders—25 percent of the world's non-communicable disease burden—rising to these challenges prove to be no small feat, even in wealthy Western nations. Various articles and books have been published on global mental health, but few of them thoroughly cover the clinical, research, innovative, and social implications as they pertain to psychiatry; often, only one of these aspects is covered. A comprehensive text that can keep pace with the rapidly evolving literature grows more and more valuable each day as clinicians struggle to piece together the changes around the world that leave open the possibility for improved outcomes in care. This book seeks to boldly rectify this situation by identifying innovative models of service delivery, training, education, research funding, and payment systems that have proven to be exemplary in implementation and scalability or have potential for scalability. Chapters describe specific barriers and challenges, illuminating effective strategies for improved outcomes. This text is the first peer-reviewed resource to gather prestigious physicians in global mental health from around the world and disseminate their expertise in the medical community at large in a format that is updateable, making it a truly cutting-edge resource in a world constantly changed by medical, scientific, and technological

advances. *Innovations in Global Mental Health* is the ultimate resource for psychiatrists, psychologists, primary care physicians, hospitalists, policy makers, and all medical professionals at the forefront of global mental health and its implications for the future.

Innovations in Global Mental Health OUP Southern Africa

"Developing Change Agents examines the role of academia in creating the next generation of sustainability leaders. Delving into strategies to transform higher education, this volume empowers universities to develop change agents who can scale solutions to meet the wicked environmental, social, and political challenges of the present and future. *Developing Change Agents* advances a revolutionary perspective on the way academia functions from the administrative hierarchies to faculty, and the classroom and to deep engagement in the communities where the solutions must be co-created. This book works to find a transdisciplinary, effective method of tackling the world's issues with reference to emotional intelligence, diversity, community, and reward structures and supports a tailored, reflexive approach based upon each university's diverse and unique students, faculty, programs, and communities"--University of Minnesota Libraries website.

Pericardial Disease Springer

Evolution of Awareness, the debut poetry collection from Kia Marlene, is a book about a spiritual journey towards enlightenment. The collection consists of 6 chapters, titled "The Egg," "The Caterpillar," "Intermission (heartbreak&love)," "The Cocoon," "The Butterfly," and a chapter titled "Knock Knock." Through numerous poems this book outlines various thoughts, questions and eventual answers concerning our collective greater purpose in life, self love, consciousness, and personhood. The author intends for this book to help broaden the reader's general perception, view of their environment, awareness, and sense of self.

Scope and Standards of Home Health Nursing Practice Bernan Press(PA)

In December 2010, Professor Tim Noakes was introduced to a way of eating that was contrary to everything he had been taught and was accepted as conventional nutrition 'wisdom'. Having observed the benefits of the low-carb, high-fat lifestyle first-hand, and after thorough and intensive research, Noakes enthusiastically revealed his findings to the South African public in 2012. The backlash from his colleagues in the medical establishment was as swift as it was brutal, and culminated in a misconduct inquiry launched by the Health Professions Council of South Africa. The subsequent hearing lasted well over a year, but Noakes ultimately triumphed, being found not guilty of unprofessional conduct in April 2017. In *Lore of Nutrition*, he explains the science behind the low-carb, high-fat/Banting diet, and why he champions this lifestyle despite the constant persecution and efforts to silence him. He also discusses at length what he has come to see as a medical and scientific code of silence that discourages anyone in the profession from

speaking out against the current dietary guidelines. Leading food, health and medical journalist Marika Sboros, who attended every day of the HPCSA hearing, provides the fascinating backstory to the inquiry, which often reads like a spy novel. *Lore of Nutrition* is an eye-opener and a must-read for anyone who cares about their health.

Advanced Paediatric Life Support Commonwealth Secretariat
Coverage includes the study of principles of biochemistry and the aspects of nutrition as they impact upon human health - This authoritatively written book offers the readers a thorough understanding of biochemical perspectives to medicine and human illness at the molecular level in nutrients derived from food and their relation to human health and nutrition - Describes blood chemistry and urinalysis to help study the pathological aspects that are an essential part of course contents for the basic Bsc Nursing curriculum - Presents life cycle approach and gives nutritional interventions for various kinds of health care of geriatric stage and mature adults with tips for improving health - Includes flowcharts of physiological and pathological processes. This very user-friendly and easier-to-read book is packed with latest information as per the syllabus of the Nursing Council's recommendations for BSc Nursing Course.

Nanoparticles and their Biomedical Applications Elsevier Health Sciences

This consultation contains proposals to reshape the higher education landscape to have students at its heart. Its core aims are to raise teaching standards, provide greater focus on graduate employability, widen participation in higher education, and open up the sector to new high-quality entrants. This document sets out proposals for how the Government's manifesto commitment to introduce a Teaching Excellence Framework will deliver better value for money for students, employers and taxpayers. It also sets out plans to drive social mobility by further increasing higher education participation by those from disadvantaged and under-represented groups. This consultation proposes a new single gateway for entry to the sector, which would create a common system for all providers. It sets out proposed new architecture for the higher education system, to reflect the way higher education is now funded by students, and to reduce the regulatory burden on the sector. Finally, this consultation considers the potential implications of these changes for the research landscape.

This book offers a comprehensive guide to implementing a company-wide management system (CWMS), utilising up-to-date methodologies of lean-six sigma in order to achieve high levels of business excellence. It builds the foundation for quality and continuous improvement, which can be implemented in any organization. The book begins with an introduction to and an overview of CWMSs, and reviews the existing literature on various management systems. It then discusses the integration and implementation of lean-six sigma in supply chain management. The integration approach presented highlights the link between the existing management systems and shows how continuous improvement methodologies are incorporated. The book then examines the components of CWMS, comparing them to other systems. It also explores Kano-based six sigma and concludes with further recommendations for reading. This book covers five management systems integrated into one novel approach that can be followed by organizations wishing to achieve quality and business excellence. Covering lean-six sigma - an essential element of management systems - it is a valuable

resource for practitioners and academics alike.

Evidence-Based Cardiology F.A. Davis

Epidemiology: A Research Manual for South Africa maintains the focus on epidemiology as a discipline and incorporates the changes in policy as well as new findings and research methodologies. The only South African book dealing with epidemiology as a discipline.

An Integrated Company-Wide Management System Iconcept Press

This second edition is a ground-breaking clinical text with a strong emphasis on rigorous evidence. Leaders in the field discuss best practice in the light of systematic reviews and randomised control trials, and how best to treat where the information is less clear. Case histories provide intriguing discussions on how to apply the evidence in real life situations. Evidence-based Cardiology also includes free access to the latest evidence, which is automatically posted on a companion website.

Gender Mainstreaming in HIV/AIDS John Wiley & Sons

How do you perceive your cultural identity? All of us are shaped by the cultures we interact with and the cultural backgrounds and ethnicities that are part of our heritage. Take a dynamic approach to the study of culture and health care relationships. Dr. Marilyn A. Ray shows us how cultures influence one another through inter-cultural relationships, technology, globalization, and mass communication, and how these influences directly shape our cultural identities in today's world. She integrates theory, practice, and evidence of transcultural caring to show you how to apply transcultural awareness to your clinical decision making. Go beyond common stereotypes using a framework that can positively impact the nurse-patient relationship and the decision-making process. You'll learn how to deliver culturally competent care through the selection and application of transcultural assessment, planning and negotiation tools for interventions.

Evolution of Awareness World Bank Publications

Patient-reported outcomes (PROs) are measures of how patients feel or what they are able to do in the context of their health status; PROs are reports, usually on questionnaires, about a patient's health conditions, health behaviors, or experiences with health care that individuals report directly, without modification of responses by clinicians or others; thus, they directly reflect the voice of the patient. PROs cover domains such as physical health, mental and emotional health, functioning, symptoms and symptom burden, and health behaviors. They are relevant for many activities: helping patients and their clinicians make informed decisions about health care, monitoring the progress of care, setting policies for coverage and reimbursement of health services, improving the quality of health care services, and tracking or reporting on the performance of health care delivery organizations. We address the major methodological issues related to choosing, administering, and using PROs for these purposes, particularly in clinical practice settings. We include a framework for best practices in selecting PROs, focusing on choosing appropriate methods and modes for administering PRO measures to accommodate patients with diverse linguistic, cultural, educational, and functional skills, understanding measures developed through both classic and modern test theory, and addressing complex issues relating to scoring and analyzing PRO data.

Patient-Reported Outcomes in Performance Measurement Springer

The 4th volume of this comprehensive work features hundreds of serial killers from Sacramento to Soviet Russia—plus numerous unsolved cases. The *World Encyclopedia of Serial Killers* is the most complete reference guide on the subject, featuring more than 1,600 entries about the lives and crimes of serial killers from

around the world. Defined by the FBI as a person who murders three or more people with a hiatus of weeks or months between murders, the serial killer has presented unique and terrifying challenges to have walked among us since the dawn of time—a fact this extensive record makes chillingly clear. The series concludes with Volume Four, T-Z. Entries include the Terminator Anatoly Yuriyovych Onoprienko; Trailside Killer David Joseph Carpenter; Vampire of Sacramento Richard Trenton Chase; and the Voroshilovgrad Maniac Zaven Almazyran; plus the unsolved cases of the Adelaide Child Murders; the Axeman of New Orleans; the Chillicothe Killer; the Dead Women of Juarez; the Korea Frog Boy Murders; and the Volga Maniac.

Fulfilling Our Potential WildBlue Press

Strategic health planning, the cornerstone of initiatives designed to achieve health improvement goals around the world, requires an understanding of the comparative burden of diseases and injuries, their corresponding risk factors and the likely effects of intervention options. The Global Burden of Disease framework, originally published in 1990, has been widely adopted as the preferred method for health accounting and has become the standard to guide the setting of health research priorities. This publication sets out an updated assessment of the situation, with an analysis of trends observed since 1990 and a chapter on the sensitivity of GBD estimates to various sources of uncertainty in methods and data.

A World Fit for Children World Health Organization

Divided into three parts, this resource first expands on the origin and implementation of the Emerging Researcher Program (ERP), complemented by critical reflections of the program's first four years. The second and third parts examine the seminar and supervision training programs that constitute core ERP business. These latter selections are based on material developed for and presented at seminars and workshops. Participants in the ERP will gain insight into many program details and understand it as an adaptable model to address many situations both within South Africa and in the broader African context.

Acute Rheumatic Fever and Rheumatic Heart Disease John Wiley & Sons

Pericardial disease is a broad term that describes a wide range of pathologies. The clinical aspects of pericardial disease encompass acute pericarditis, pericardial tamponade, pericardial effusion, constrictive pericarditis, and effusive-constrictive pericarditis. Those disorders differ not only in clinical presentation but also in the timeline of disease development; for example, pericardial tamponade is commonly an acute, life-threatening event, whereas constrictive pericarditis is a chronic process developing over months to years. Therefore, pericardial disease management is challenging for most clinicians. The evidence base in the field is relatively scarce compared with other disease entities in cardiology. European Society of Cardiology released guidelines for the diagnosis and management of pericardial diseases. Currently there are no guidelines from American cardiology societies to help clinicians in dealing with pericardial disease. In this book, my goal is to provide extensive review of pericardial disease evaluation and management. A unified, stepwise pathway-based approach for the management of pericardial disease is provided at the end of the book.

Complex Interventions in Health Springer Nature

Acute Rheumatic Fever and Rheumatic Heart Disease is a concise, yet comprehensive, clinical resource highlighting must-know information on rheumatic heart disease and acute rheumatic fever from a global perspective. Covering the major

issues dominating the field, this practical resource presents sufficient detail for a deep and thorough understanding of the latest treatment options, potential complications, and disease management strategies to improve patient outcomes. Divided into four distinct sections for ease of navigation: Acute Rheumatic Fever, Rheumatic Heart Disease, Population-Based Strategies for Disease Control, and Acute and Emergency Presentations.

International editors and chapter authors ensure a truly global perspective. Covers all clinical aspects, including epidemiology, pathophysiology, clinical features, diagnosis, management, and treatment. Includes key topics on population-based measures for disease control for effective primary, secondary, and tertiary prevention. Consolidates today's available information and guidance into a single, convenient resource.

Management of Pericardial Disease Karger Medical and Scientific Publishers

We typically define and talk about wars using the language of politics, but what happens when you bring in a doctor's perspective on conflict? Can war be diagnosed like an illness? Can health professionals participate in its mitigation and prevention? The contributors to *Peace through Health: How Health Professionals Can Work for a Less Violent World* engage with these ground-breaking ideas and describe tools that can further peace once war is understood as a public health problem. The idea of working for peace through the health sector has sparked many innovative programs, described here by over 30 experts familiar with the theory and practice of Peace through Health. They cover topics such as prevention and therapy, program evaluations, medical ethics, activism, medical journals, human rights, and the uses of epidemiology. Those considering careers in medicine and other health and humanitarian disciplines as well as those concerned about the growing presence of militarized violence in the world will value the book's many insights. Other Contributors: Will Boyce, Caecilie Buhmann, Anne BundeBirouste, Kenneth Bush, Helen Caldicott, Rob Chase, Khagendra Dahal, Hamit Dardagan, Ann Duggan, Lowell Ewert, Paul Farmer, Norbert Goldfield, Paula Gutlove, Katherine Kaufer Christoffel, Maria Kett, John Last, Barry S. Levy, Tarek Loubani, Evan Lyon, Graeme MacQueen, Ian Maddocks, Ambrogio Manenti, Klaus Melf, Viet Nguyen-Gillham, Wendy Orr, Andrew D. Pinto, Alex Rosen, Simon Rushton, Hana Saab, Victor W. Sidel, Sonal Singh, John Sloboda, Karen Trollope-Kumar, Marshall Wallace, Jim Yong Kim, Anthony Zwi.

Nutrition and Biochemistry For Nurses RTI Press

The WHO consolidated guidelines on tuberculosis: tuberculosis preventive treatment provides a comprehensive set of recommendations for programmatic management of tuberculosis preventive treatment (PMTPT) geared towards the implementers of the WHO End TB Strategy and also for countries intent upon TB elimination (9). The guidelines are to be used primarily in national TB and HIV and maternal and child programmes or their equivalents in ministries of health and for other policy-makers working on TB, HIV, infectious diseases and maternal and child health. They are also appropriate for staff of ministries of justice, correctional services and other government agencies which deliver healthcare, including prison services, social services and immigration. The guidelines are also intended for clinicians in the public or the private sectors working on TB, HIV, infectious diseases, prevention, child health and noncommunicable diseases such as chronic kidney disease and cancer. The persons directly affected by the guidelines are risk groups for whom TB preventive treatment is recommended.
