Graphic Facilitation is an innovative and wholly new application of art therapy theory and techniques to groups and organizations. Graphic Facilitation is a process in which a trained consultant, through color, symbols, and metaphors in murals, interprets and documents something as short as a keynote address or as long as an entire conference. The text provides a new and exciting avenue for art therapists and for organizational development consultants. The authors provide a detailed explanation of Graphic

Facilitation—what it is, how and why it works, ideas about how to become a trained Graphic Facilitator, and a multidisciplinary literature base and resources that aspiring Graphic Facilitators will need. The book's references and bibliography include pertinent, classic organizational development literature, essential learning for work in the area. Five case studies carefully lay out how the Graphic Facilitation process works in practice with a variety of organizational styles, models, and issues. They include visual murals and other imagery created by the Graphic Facilitator for each organizational event. These case studies clearly illustrate the value and promise of art therapy as an exciting new tool and provide a view of the impressive use of Graphic Facilitation. Written by two art therapists, this book is for art therapists who would like to develop and learn to use art therapy applications for business and organizational sectors. In this, it is an exciting new practice area for art therapists. The book will also be valuable for business coaches, human resource managers, organizational management consultants and facilitators who would like

to enrich their practice with Graphic Facilitation techniques. CD-ROM not included in digital version of this title.

Geometry, this very ancient field of study of mathematics, frequently remains too little familiar to students. Michle Audin, professor at the University of Strasbourg, has written a book allowing them to remedy this situation and, starting from linear algebra, extend their knowledge of affine, Euclidean and projective geometry, conic sections and quadrics, curves and surfaces. It includes many nice theorems like the nine-point circle, Feuerbach's theorem, and so on. Everything is

presented clearly and rigorously. Each property is proved, examples and exercises illustrate the course content perfectly. Precise hints for most of the exercises are provided at the end of the book. This very comprehensive text is addressed to students at upper undergraduate and Master's level to discover geometry and deepen their knowledge and understanding.

In this challenging new book Charles Coulson overturns many of the traditional assumptions about the nature and purpose of castle-building in the middle ages. He demolishes the traditional belief that castles were overwhelmingly military in their function, showing how this was simply one aspect of a more complicated whole. He sets out to recreate the medieval understanding of castles as symbolically fortified places of all kinds, from ancient walled post-Roman towns and prestigious religious enclaves to transitory campaign forts. Going back to the original sources, Dr Coulson proposes a new and more subtle understanding of the function and symbolism of castles as well as vivid insights into the lives of the people who inhabited them. Fortresses were only occasionally caught up in war,

but constantly were central to the ordinary life of all classes: of the nobility and gentry, of widows and heiresses, of prelates and clergy, of peasantry and townspeople alike. Castles in Medieval Society presents and explores this broad social panorama.

The classic graphic novel. When Tintin and Captain Haddock happen across a community of gypsies they invite them home . . . just as Bianca Castafiore, the famous opera singer, decides to visit Tintin. It's chaos at Marlinspike Hall, and then a precious emerald goes missing! *The Adventures of Tintin, Reporter for "Le Petit Vingtième," in the Land of the Soviets* Little, Brown Books for Young Readers This book is a pastiche by Y. Rodier, in homage to Hergé's last album. "The twenty-fourth adventure of Tintin, 'Tintin and Alph-Art', was left unfinished at the time of Hergé's death on the 3rd of March, 1983. Since then, several artists have tried their hand at finishing this ultimate adventure of Tintin. Presented here is the

version drawn by Yves Rodier, a Canadian artist, in an English translation by Richard Wainman. The intention, when creating this translation, was to remain as faithful

to the original as possible, and therefore. new place names and character names have not been anglicised. This practice, which was carried out by the English

translators, Leslie Lonsdale-Cooper and Michael Tumer for the books in the established canon, has not been used here."
