We live today in an interconnected world in which ordinary people can become instant online celebrities to fans thousands of miles away, in which religious leaders can influence millions globally, in which humans are altering the climate and environment, and in which complex social forces intersect across continents. This is globalization. In the fifth edition of his bestselling *Very Short Introduction* Manfred B. Steger considers the major dimensions of globalization: economic, political, cultural, ideological, and ecological. He looks at its causes and effects, and engages with the hotly contested question of whether globalization is, ultimately, a good or a bad thing. From climate change to the Ebola virus, Donald Trump to Twitter, trade wars to China's growing global profile, Steger explores today's unprecedented levels of planetary integration as well as the recent challenges posed by resurgent national populism. ABOUT THE SERIES: The *Very Short Introductions* series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

A *Times Literary Supplement's* Book of the Year 2020 A *New Statesman's* Best Book of 2020 A *Bloomberg's* Best Book of 2020 A *Guardian* Best Book About Ideas of 2020 The world-renowned philosopher and author of the bestselling *Justice* explores the central question of our time: What has become of the common good? These are dangerous times for democracy. We live in an age of winners and losers, where the odds are stacked in favor of the already fortunate. Stalled social mobility and entrenched inequality give the lie to the

American credo that "you can make it if you try". The consequence is a brew of anger and frustration that has fueled populist protest and extreme polarization, and led to deep distrust of both government and our fellow citizens-- leaving us morally unprepared to face the profound challenges of our time. World-renowned philosopher Michael J. Sandel argues that to overcome the crises that are upending our world, we must rethink the attitudes toward success and failure that have accompanied globalization and rising inequality. Sandel shows the hubris a meritocracy generates among the winners and the harsh judgement it imposes on those left behind, and traces the dire consequences across a wide swath of American life. He offers an alternative way of thinking about success-- more attentive to the role of luck in human affairs, more conducive to an ethic of humility and solidarity, and more affirming of the dignity of work. *The Tyranny of Merit* points us toward a hopeful vision of a new politics of the common good.

We Can All Do Better Hackett Publishing When Michael Dukakis accused George H. W. Bush of being the "Joe Isuzu of American Politics" during the 1988 presidential campaign, he asserted in a particularly American tenor the near-ancient idea that lying and politics (and perhaps advertising, too) are inseparable, or at least intertwined. Our response to this phenomenon, writes the renowned intellectual historian Martin Jay, tends to vacillate—often impotently—between moral outrage and amoral realism. In *The Virtues of Mendacity*, Jay resolves to avoid this conventional framing of the debate over lying and politics by examining what has been said in support of, and opposition to, political lying from Plato and St. Augustine to Hannah Arendt and Leo Strauss. Jay proceeds to show that each philosopher's argument corresponds to a particular conception of the political realm, which decisively shapes his or her attitude toward political mendacity. He then applies this insight to a variety of contexts and questions about lying and politics. Surprisingly, he concludes by asking if lying in politics is really all that bad. The political hypocrisy that Americans in

particular periodically decry may be, in Jay's view, the best alternative to the violence justified by those who claim to know the truth.

Stand Up Fight Back Harvard Business Review Press

One of our most visible, trenchant, and witty political commentators, the author of the bestselling *Why Americans Hate Politics*, offers a tough critique of President George W. Bush and the Democratic opposition on the eve of a landmark presidential election -- and points to a way out of cynicism and defeatism. With passion, clarity, and humor, E. J. Dionne describes today's political atmosphere as the bitterest he can remember. Never have Democrats been as frustrated by their inability to move the debate. The party of Roosevelt, Kennedy, and Clinton, Dionne says, is lost in pointless feuds, outdated strategies, and old arguments. Democrats have lost track of what they stand for so they don't know what they're fighting for and besides, they've forgotten how to fight back. In describing how Democrats, moderates, and liberals have failed to match Republicans and conservatives in commitment, resourcefulness, and clarity, Dionne invents what is likely to become a popular parlor game among the politically committed. In "The Wrong Stuff," he lists ten futile arguments -- big versus small government, for example -- that Democrats keep having with themselves. "The Right Stuff" focuses on ten arguments they should start making about taxes, business, and the role of government. Dionne zeroes in on how a floundering Bush administration used September 11 to politicize national security issues for partisan advantage. Enraged but intimidated by ruthless opponents, the Democratic party failed to find its voice on security issues and was soundly beaten in 2002. Drawing on some lessons from the 2004 primary campaigns, Dionne argues that anger and frustration have in fact awakened progressives to the need for innovation in organizing, in approaching an increasingly conservative media, and in formulating politically useful and plainly stated ideas. Learning from the conservative movement's successes,

liberals have begun the work of reconstruction. The politics of revenge, Dionne argues persuasively, can give way to something better: a progressive patriotism built on hope and optimism about America's role in the world and its capacity to renew social justice at home. *Democracy's Discontent* Oxford University Press

Une situation de disette extrême peut-elle justifier le cannibalisme ? Sommes-nous propriétaires de nous-mêmes ? Une mère porteuse a-t-elle le droit de garder l'enfant qu'elle a mis au monde ? Quel travail mérite quel salaire ? Si Michael J. Sandel, professeur de philosophie à Harvard, passionné bien au-delà des campus, c'est parce qu'il excelle dans l'art de ramener les questions politiques les plus complexes à des enjeux dont chacun peut aisément se saisir. En opposant les différentes conceptions de la justice (utilitariste, libérale, communautarienne), il convoque tour à tour Aristote, Hume ou Kant à partir de cas concrets, parfois drôles et toujours imagés. Des dilemmes les plus ordinaires aux grandes questions qui agitent nos sociétés, il s'agit toujours d'interroger les principes d'équité, de citoyenneté, de justice. De remettre, en somme, la morale au cœur du débat.

Summary of Justice Penguin UK

Does justice require that individuals get what they deserve? Serena Olsaretti brings together new essays by leading moral and political philosophers examining the relation between desert and justice; they also illuminate the nature of distributive justice, and the relationship between desert and other values, such as equality and responsibility.

Desert and Justice Farrar, Straus and Giroux

A renowned political philosopher updates his classic book on the American political tradition to address the perils democracy confronts today. The 1990s were a heady time. The Cold War had ended, and America's version of liberal capitalism seemed triumphant. And yet, amid the peace and prosperity, anxieties about the project of self-government could be glimpsed beneath the surface. So argued Michael Sandel, in his influential and widely debated book *Democracy's Discontent*, published in 1996. The market faith was eroding the common life. A rising sense of disempowerment was likely to provoke backlash, he wrote, from those who would "shore up borders, harden the distinction between insiders and outsiders, and promise a politics to 'take back our culture and take back our country,' to 'restore our sovereignty' with a vengeance." Now, a quarter century later,

Sandel updates his classic work for an age when democracy's discontent has hardened into a country divided against itself. In this new edition, he extends his account of America's civic struggles from the 1990s to the present. He shows how Democrats and Republicans alike embraced a version of finance-driven globalization that created a society of winners and losers and fueled the toxic politics of our time. In a work celebrated when first published as "a remarkable fusion of philosophical and historical scholarship" (Alan Brinkley), Sandel recalls moments in the American past when the country found ways to hold economic power to democratic account. To reinvigorate democracy, Sandel argues in a stirring new epilogue, we need to reconfigure the economy and empower citizens as participants in a shared public life.

Blind Spots Harvard University Press

When the noted political philosopher Iris Marion Young died in 2006, her death was mourned as the passing of "one of the most important political philosophers of the past quarter-century" (Cass Sunstein) and as an important and innovative thinker working at the conjunction of a number of important topics: global justice; democracy and difference; continental political theory; ethics and international affairs; and gender, race and public policy. In her long-awaited *Responsibility for Justice*, Young discusses our responsibilities to address "structural" injustices in which we among many are implicated (but for which we not to blame), often by virtue of participating in a market, such as buying goods produced in sweatshops, or participating in booming housing markets that leave many homeless. Young argues that addressing these structural injustices requires a new model of responsibility, which she calls the "social connection" model. She develops this idea by clarifying the nature of structural injustice; developing the notion of political responsibility for injustice and how it differs from older ideas of blame and guilt; and finally how we can then use this model to describe our responsibilities to others no matter who we are and where we live. With a foreword by Martha C. Nussbaum, this last statement by a revered and highly influential thinker will be of great interest to political theorists and philosophers, ethicists, and feminist and political philosophers.

'A gem of a book ... Inspiring and timely. Everyone should read it' Independent 'The Rule of Law' is a phrase much used but

little examined. The idea of the rule of law as the foundation of modern states and civilisations has recently become even more talismanic than that of democracy, but what does it actually consist of? In this brilliant short book, Britain's former senior law lord, and one of the world's most acute legal minds, examines what the idea actually means. He makes clear that the rule of law is not an arid legal doctrine but is the foundation of a fair and just society, is a guarantee of responsible government, is an important contribution to economic growth and offers the best means yet devised for securing peace and co-operation. He briefly examines the historical origins of the rule, and then advances eight conditions which capture its essence as understood in western democracies today. He also discusses the strains imposed on the rule of law by the threat and experience of international terrorism. The book will be influential in many different fields and should become a key text for anyone interested in politics, society and the state of our world.

Michael Sandel's *Justice: What's the Right Thing to Do?* invites readers of all ages and political persuasions on a journey of moral reflection, and shows how reasoned debate can illuminate our lives. Is it always wrong to lie? Should there be limits to personal freedom? Can killing sometimes be justified? Is the free market fair? What is the right thing to do? Questions like these are at the heart of our lives. In this acclaimed book Michael Sandel - BBC Reith Lecturer and the Harvard professor whose 'Justice' course has become world famous - gives us a lively and accessible introduction to the intersection of politics and philosophy. He helps us think our way through such hotly contested issues as equal rights, democracy, euthanasia, abortion and same-sex marriage, as well as the ethical dilemmas we face every day. Michael Sandel transforms moral philosophy by putting it at the heart of civic debate' - New Statesman 'One of the world's most interesting political philosophers' - Guardian 'Spellbinding' - The Nation

How Markets Fail Cambridge University Press

Bill Bradley is arguably one of the most well-versed public figures of our time. The eighteen-year New Jersey Senator, financial and investment adviser, Olympic and NBA athlete, national radio host, and bestselling author has lived in the United

States as both political insider and outsider, national sports celebrity and behind-the-scenes confidante, leader and teammate. His varied experiences help to inform his unique and much-sought-after point of view on Washington and the country at large. In *We Can All Do Better*, for the first time since the financial meltdown and since the worst of the intensifying political gridlock, Bradley offers his own concise, powerful, and highly personal review of the state of the nation. Bradley argues that government is not the problem. He criticizes the role of money and politics, explains how continuing on our existing foreign policy, electoral, and economic paths will mean a diminished future, and lays out exactly what needs to be done to reverse course. Breaking from the intransigent long-held viewpoints of both political parties, and with careful attention to our nation's history, Bradley passionately lays out his narrative. He offers a no-holds-barred prescription on subjects including job creation, deficit reduction, education, and immigration. While equally critical of the approaches of the Tea Party and Occupy Movements, he champions the power of individual Americans to organize, speak out, bridge divisions, and he calls on the media to assume a more responsible role in our national life. As this moving call to arms reminds us, we can all—elected officials, private citizens, presidents—do a better job of moving our country forward. Bradley is perhaps the best guide imaginable, with his firsthand knowledge of governments' inner-workings, the country's diversity, and the untapped potential of the American people.

A #1 New York Times bestseller by Kim Edwards, *The Memory Keeper's Daughter* is a brilliantly crafted novel of parallel lives, familial secrets, and the redemptive power of love. Kim Edwards's stunning novel begins on a winter night in 1964 in Lexington, Kentucky, when a blizzard forces Dr. David Henry to deliver his own twins. His son, born first, is perfectly healthy, but the doctor immediately recognizes that his daughter has Down syndrome. Rationalizing it as a need to protect Norah, his wife, he makes a split second decision that will alter all of their lives forever. He asks his nurse, Caroline, to take the baby away to an institution and never to reveal the secret. Instead, she disappears into another city to raise the child herself. So begins this beautifully told story that unfolds over a quarter of a century—in which these two families, ignorant of each other, are yet bound by

the fateful decision made that winter night long ago. A family drama, *The Memory Keeper's Daughter* explores every mother's silent fear: What would happen if you lost your child and she grew up without you? It is also an astonishing tale of love and how the mysterious ties that hold a family together help us survive the heartache that occurs when long-buried secrets are finally uncovered.

When Business and Personal Values Collide "Defining moments" occur when managers face business decisions that trigger conflicts with their personal values. These moments test a person's commitment to those values and ultimately shape their character. But these are also the decisions that can make or break a career. Is there a thoughtful, yet pragmatic, way to make the right choice? Bestselling author Joseph Badaracco shows how to approach these dilemmas using three case examples that, when taken together, represent the escalating responsibilities and personal tests managers face as they advance in their careers. The first story presents a young manager whose choice will affect him only as an individual; the second, a department head whose decision will influence his organization; the third, a corporate executive whose actions will have much larger, societal ramifications. To guide the decision-making process, the book draws on the insights of four philosophers—Aristotle, Machiavelli, Nietzsche, and James—who offer distinctly practical, rather than theoretical, advice.

Defining Moments is the ultimate manager's guide for resolving issues of conflicting responsibility in practical ways. *Anarchy, State, and Utopia* Harvard University Press

Much contemporary political philosophy has been a debate between utilitarianism on the one hand and Kantian, or rights-based ethic has recently faced a growing challenge from a different direction, from a view that argues for a deeper understanding of citizenship and community than the liberal ethic allows. The writings collected in this volume present leading statements of rights-based liberalism and of the communitarian, or civic republican alternatives to that position. The principle of selection has been to shift the focus from the familiar debate between utilitarians and Kantian liberals in order to consider a more powerful challenge of the rights-based ethic, a challenge indebted, broadly speaking, to Aristotle, Hegel, and the civic republican tradition. Contributors include Isaiah Berlin, John Rawls, Alasdair

MacIntyre.

Justice: What's the Right Thing to Do by Michael J. Sandel - Book Summary - Abbey Beathan (Disclaimer: This is NOT the original book.) A unique education in thinking through complicated issues we face in public life today. *Justice* was initially a Harvard course but due to its popularity as one of the most highly attended in Harvard's history, Sandel decided to give us a book where all the wisdom he imparted on the course, could be given by this medium as well.

Addressing a series of alternative theories of justice, *Justice* comes forth as an intricate and amusing philosophy book that talks about complicated topics and philosophical visions and break them down in a simple manner so anyone can easily read it. (Note: This summary is wholly written and published by Abbey Beathan. It is not affiliated with the original author in any way) "Self-knowledge is like lost innocence; however unsettling you find it, it can be 'unthought' or 'unknown'." -

Michael J. Sandel *Justice* comes forth as philosophical journey of the best kind, surfing through theories from world class philosophers like Aristotle, Immanuel Kant, Robert Nozick and many more. With this book you'll have at your disposals the most accepted theories of justice and they will be made easy to digest for anybody, disregarding their knowledge on the topic. The most valuable thing about this book is that it saves you thousands of hours you could have spent reading about those theories, and have them all served to you in a silver platter by Sandel. Take a philosophy course with one of the most recognized teachers on the subject. P.S. *Justice* is an extremely informative book that gives you a rundown of a lot of philosophical theories and Sandel's take on them. P.P.S. A Decent Life Princeton University Press
 A New York Times Bestseller An important overview of the way our justice system works, and why the rule of law is essential to our survival as a society—from the one-time federal prosecutor for the Southern District of New York, and host of the Doing Justice podcast. Preet Bharara has spent much of his life examining our legal system, pushing to make it better, and prosecuting those looking to subvert it. Bharara believes in our system and knows it must be protected, but to do so, he argues, we must also acknowledge and allow for flaws both in our justice system and in human nature. Bharara uses the many illustrative anecdotes and case

histories from his storied, formidable career—the successes as well as the failures—to shed light on the realities of the legal system and the consequences of taking action. Inspiring and inspiringly written, Doing Justice gives us hope that rational and objective fact-based thinking, combined with compassion, can help us achieve truth and justice in our daily lives. Sometimes poignant and sometimes controversial, Bharara's expose is a thought-provoking, entertaining book about the need to find the humanity in our legal system as well as in our society.

 How did we get to where we are? John Cassidy shows that the roots of our most recent financial failure lie not with individuals, but with an idea - the idea that markets are inherently rational.
