"Renowned luthier John S. Bogdanovich crafted the project shown inside for his own personal use. The design he presents is simple but elegant and is a composite of ideas borrowed from several different guitars admired for their tonal qualities and aesthetic details. In close-up photographs Bogdanovich invites you to stand by his side and follow the entire process from start to finish. He offers guidance through every step, and explains every decision, from the arrangement of his workbench and the selection of the wood, to tuning and setting up the instrument. Bogdanovich also provides a choice of alternative methods and materials -- to help you find your own style of working, and to enable you to add your personal touches to your project. By the time your instrument is finished, you'll have acquired a world of knowledge, from the difference between quartersawn and flat-sawn wood to the pros and cons of lacquer versus French polish. You'll have mastered dozens of skills, including bending and aminating wood and cutting and seating wire frets. Best of all, you'll have a beautiful instrument, designed to your own specifications, that will give pleasure to everyone who hears it." -- Book jacket.

New York Times bestselling author Allen St. John started off looking for the world's greatest guitar, but what he found instead was the world's greatest guitar builder. Living and working in

Rugby, Virginia (population 7), retired rural mail carrier Wayne Henderson is a true American original, making America's finest instruments using little more than a pile of good wood and a sharp whittling knife. There's a 10-year waiting list for Henderson's heirloom acoustic guitars—and even a musical legend like Eric Clapton must wait his turn. Partly out of self-interest, St. John prods Henderson into finally building Clapton's guitar, and soon we get to pull up a dusty stool and watch this Stradivari in glue-stained blue jeans work his magic. The story that ensues will captivate you with its portrait of a world where craftsmanship counts more than commerce, and time is measured by old jokes, old-time music, and homemade lemon pies shared by good friends.

The Luthier's Handbook Robert Hale

Contemporary Acoustic Guitar Design and Build is for everyone who wants to understand more about designing and building acoustic guitars using methods based on the acoustical and engineering sciences and contemporary small workshop practices. For the first time, the sound output of a guitar is comprehensively related both theoretically and practically to the instrument's woodwork, providing a logical and scientific method for designing guitars and real answers to questions that have challenged luthiers for centuries. Instruments built using these techniques are measurably more powerful, in-tune, responsive and playable than just about anything for sale in a music store. The differences are immediately audible. First time builders and experts alike will find these volumes invaluable. Building instructions and full sized plans are provided for four different types of guitar. But the real purpose of these volumes is to provide a design and build methodology that will allow the reader to construct just about any type of flat top guitar; the "perfect guitar" for yourself or your customer, using the same techniques

that provide the quality and consistency required by pragmatic luthiers who make guitars for a living.

Making Master Guitars is a craftsman's handbook about the exciting and challenging pursuit of making classical guitars--a craft that the author reveals to be surprisingly accessible by following his instructions. The book is unique in that it includes nine separate detailed plans of instruments constructed by internationally famous guitar-makers. The author has had the rare opportunity of examining these instruments in detail, and has made many replicas of each one. It is presented in three parts: "The Master Makers and Their Guitars," "Workshop, Tools, and Materials," and "Guitar Construction--The Spanish Method."

The Art and Craft of Making Classical Guitars Hal Leonard Corporation

It whispers, it sings, it rocks, and it howls. It expresses the voice of the folk—the open road, freedom, protest and rebellion, youth and love. It is the acoustic guitar. And over the last five decades it has become a quintessential American icon. Because this musical instrument is significant to so many—in ways that are emotional, cultural, and economic—guitar making has experienced a renaissance in North America, both as a popular hobby and, for some, a way of life. In *Guitar Makers*, Kathryn Marie Dudley introduces us to builders of artisanal guitars, their place in the art world, and the specialized knowledge they've developed. Drawing on in-depth interviews with members of the lutherie community, she finds that guitar making is a social movement with political implications. Guitars are not simply made—they are born. Artisans listen to their wood, respond to its liveliness, and strive to endow each instrument with an unforgettable tone. Although professional luthiers work within a market society, Dudley observes that their overriding sentiment is passion and love of the craft. Guitar makers are not aiming for quick turnover or the low-cost reproduction of commodities but the creation of singular instruments with unique qualities, and face-to-face transactions between makers, buyers, and dealers are commonplace. In an era

when technological change has pushed skilled artisanship to the margins of the global economy, and in the midst of a capitalist

system that places a premium on ever faster and more efficient modes of commerce, Dudley shows us how artisanal guitar

makers have carved out a unique world that operates on alternative, more humane, and ecologically sustainable terms.
