## HOLT EWING

The World's Assault Rifles Time Inc. Books

Firearms are machines, and like all machines they sometimes break. Regardless of its quality, there will be wear when the firearm is subjected to hard use. Serious shooters must learn to maintain, repair, and in some cases modify their firearms to keep them operational. Most shooters are fair part-replacers, but custom gunsmithing is another matter. We have to know know limitations, but there are times when all of us have do the repairs ourselves. Think of commando gunsmithing as isolating the problem with a firearm and curing it or, at least, applying a temporary expedient. We gun owners should be able to handle what we can and save the professional gunsmith for more complicated work. Commando Gunsmithing will teach you what to look for, as well as what to do and under what circumstances. It includes simple instructions for the most common handgun, rifle, and shotgun malfunctions, including ammo-related problems, springs, magazines, grips, sights, and bolts. It also includes a primer on proper cleaning and regular maintenance procedures, a list of spare parts and tools to keep in your ready bag, and resources to find the most reliable and affordable parts. Finding the problem and fixing it usually is neither art nor science, but rather hard work. With proper tools, education, and attitude, the commando gunsmith will always be well armed with a firearm he can count on.

The .22 Long Rifle caliber is the most popular ammunition and

firearm chambering in the world. It's a backyard plinker, small-game hunter, tactical trainer and Olympic medalist. Along with its .17-caliber cousins, the humble .22 LR is undergoing a massive resurgence in the United States, and around the world, especially in places like the United Kingdom and New Zealand, which effectively ban centerfire chamberings. The rimfire rifle, an historic centerpiece of the shooting community, is trending in a big way, and this book brings the topic into current times. Every major gun manufacturer has brought at least one new rimfire rifle to the market in the last two years, and these models are covered in detail. A sampling of topics included in this full-color work: complete coverage of semi-autos and how they work; the magic of bolt-action accuracy; advice on sharpening up shooting accuracy; match shooting and how to succeed; DIY precision gunsmithing; hunting with rimfires; and the future of the rimfire market. And, to guarantee this work provides complete rimfire coverage, the author also goes deep into the capabilities of the "Might Mice," the .17s: 17HM2, 17HMR and 17WSM.

Jon Sundra wrote his first article in 1966, and by the early 1970s had risen to prominence at a time when the golden era of American outdoor writers was in full swing. The next thirty-plus years was a time when he and his colleagues were routinely invited by Remington, Winchester, Weatherby, and Ruger--and by many foreign gun manufacturers as well--to all-expense-paid jaunts to hunt and visit factories all over the world. During this period Jon met all the greats of the shooting and hunting world, and this book gives us an unvarnished look at some of the characters of that regrettably gone era. Jon is still active today, after having undertaken over a hundred hunting trips on five continents, not counting those in the States. This book is primarily not a description of those hunts, but rather a funny, very descriptive picture of an era in which gunwriters were kings of their domain and had egos to match. Jon cavorted with Elmer Keith, Jack O'Connor, Warren Page, Slim Pickens, Charlie Askins, Bill Jordan, Skeeter Skelton, Bob Milek, John Wootters, George Nonte, Jack Lewis, and others, and he has amusing stories to tell of these giants of the gunwriting world. Today he still writes as field editor for Safari magazine, and is a regular contributor to Rifle Shooter, Gun Digest, and Ballistic magazines. If anyone has ever had a colorful life, surely it's Jon Sundra.

From 1961 till the early 1980s Elmer Keith was a regular contributor to *Guns & Ammo* magazine, with a monthly column entitled "Gun Notes." Here are the most interesting writings from his long writing career at *Guns & Ammo* magazine. This book is entirely devoted to pistols, revolvers, bolt-action and double rifles, shotguns, ammunition, loads, bullets, and accessories. Keith was one of the country's most knowledgeable experts on big-bore calibers, and this book has a wealth of information based on his

lifelong experience with just about every imaginable sporting arm. In addition, the book contains letters from Elmer Keith to Truman Fowler, who was the publisher of Keith's Safari book; it also contains the correspondence from Fowler (a well-known big-bore advocate) to Jack O'Connor, who took exception to much of what Keith and Fowler recommended. This is more than highly entertaining reading -- the pages of the correspondence literally sizzle under your fingertips! Gun Notes is illustrated with photos from the Guns & Ammo files. Keith wrote ten books, in all, on hunting and firearms and was an absolute believer in big-bore rifles with heavy bullets. Over this issue, he and Jack O'Connor, another well-known sports writer and contemporary of Keith's, had a bitter running feud for years. Keith was also instrumental in the development of the .44 Magnum, .41 Magnum, and .338 Magnum cartridges as well as numerous other firearm and ballistic innovations. He was one of America's best shots with rifle, handgun, and shotgun. Keith was, perhaps, best known for his articles that appeared in numerous magazines from before World War II until the early 1980s. Book jacket.
