Mastery of light and shade - rendered with accuracy and expressive power - is the key to three-dimensional form in drawing and painting. Here is the first book on this essential subject, the product of years of study by one of the world's great teachers of drawing and an artist of international renown, Burne Hogarth. Hogarth

begins with the simplest kind of light and shade, showing how a dark silhouette on white paper can communicate form and space. He then shows how the silhouette is transformed into three dimensions with the addition of minimal light - the highlight. Following these instructory chapters, Hogarth devotes a separate chapter to each of the given basic categories of light and shade: single-source light; double-source light; flat, diffused light; moonlight; and sculptural light. In

these chapters Hogarth illustrates the effects of these different kinds of light on a variety of subjects and examines both natural and artificial light sources. Moving on to more complex lighting effects, Hogarth explains spatial light - how light and shade can create a sense of "near and far"; environmental light - the effects of weather, time of day, and the changing of seasons; textural light - how light reveals the surface qualities of forms that range from rough stone to silk and satin

draperies; transparent light - the effects passing through transparent materials like glass and water, and translucent substances like moving water or sailcloth; fragmentation light - the disrupted light we see in such subjects as fire, rain, and flying snow; radiant light - the intense light we see when we look into the light source itself, which may range from the sun to a candle flame; and finally the various kinds of expressive light invented by the artist - such as the symbolic and mystic light

of religious art, or the patterns of light and shade that convey a mood or a psychological state. Burne Hogarth illustrates every effect of light and shade with brilliant drawings in pencil, charcoal, carbon, pen and ink, and brush and ink, encouraging the reader to experiment with diverse drawing media. *Dynamic Light and Shade* is an essential volume for everyone who draws and paints.

"The best way to learn about art is to make it.

Discover the secrets of great figure drawing as you sketch along with past and present masters. This working artist's sketchbook guides you from beginning gestures to delicate rendering. It's your art, your tradition, your time. Take your voice and add it to the tradition as if the history of art has saved the best for now."-- Juliette Aristides *Figure Drawing Atelier* offers a comprehensive, contemporary twist to the very traditional atelier approach to the methods

that instruct artists on the techniques they need to successfully draw and ultimately paint the figure. The book offers art instruction, practical and progressive lessons on drawing the figure, and high-quality sketchbook paper in a beautiful package that includes blank pages for sketching and copying. Artists will then have a record of their process, like with a sketchbook, which many artists like to document and save. In this elegant and inspiring workbook, master contemporary

artist and author Juliette Aristides breaks down the figure drawing process into small, manageable lessons, presents them progressively, introduces time-tested principles and techniques in the atelier tradition that are easily accessible, and shares the language and context necessary to understand the artistic process and create superior, well-crafted drawings. Atelier education is centered on the belief that working in a studio, not sitting in the lecture hall, is the best way to learn about art.

Every artist needs to learn to master figure drawing. Ateliers have produced the greatest artists of all time--and now that educational model is experiencing a renaissance. These studios, a return to classical art training, are based on the nineteenth-century model of teaching artists by pairing them with a master artist over a period of years. Students begin by copying masterworks, then gradually progress to painting as their skills develop. Figure Drawing

Atelier is like having an atelier in a book--and the master is Juliette Aristides, a classically trained artist and best-selling art-instruction author with almost rock star popularity in the contemporary world of representational art. On every page, Aristides uses the works of Old Masters and today's most respected realist artists to demonstrate and teach the principles of realistic figure drawing and painting, taking students step by step through the learning curve yet

allowing them to work at their own pace. Unique and inspiring, this book offers a serious art course for serious art students and beginners alike.

outstanding pen and brush draftsmen. The reproductions and text are also of particular interest to advertising artists, book and magazine illustrators.
