“[Goulston’s]ideas are a bit counter-intuitive but they really do shift the dynamic and help people diffuse and disarm the irrational person leading to more positive outcomes.” -- Online MBA
 Because some people are beyond difficult... Let’s face it, we all know people who are irrational. No matter how hard you try to reason with them, it never works. So what’s the solution? How do you talk to someone who’s out of control? What can you do with a boss who bullies, a spouse who yells, or a friend who frequently bursts into tears? In his book, Just Listen, Mark Goulston shared his bestselling formula for getting through to the resistant people in your life. Now, in his breakthrough new book Talking to Crazy, he brings his communication magic to the most difficult group of all—the downright irrational. As a psychiatrist, Goulston has seen his share of crazy and he knows from experience that you can’t simply argue it away. The key to handling irrational people is to learn to lean into the crazy—to empathize with it. That radically changes the dynamic and transforms you from a threat into an ally. Talking to Crazy explains this counterintuitive Sanity Cycle and reveals: Why people act the way they do • How instinctive responses can exacerbate the situation—and what to do instead • When to confront a problem and when to walk away • How to use a range of proven techniques including Time Travel, the Fish-bowl, and the Belly Roll • And much more You can’t reason with unreasonable people—but you can reach them. This powerful and practical book shows you how.

Implement a more constructive approach to difficult students Lost and Found is a follow-up to Dr. Ross Greene’s landmark works, The Explosive Child and Lost at School, providing educators with highly practical, explicit guidance on implementing his Collaborative & Proactive Solutions (CPS) Problem Solving model with behaviorally-challenging students. While the first two books described Dr. Greene’s positive, constructive approach and described implementation on a macro level, this useful guide provides the details of hands-on CPS implementation by those who interact with these children every day. Readers will learn how to incorporate students’ input in understanding the factors making it difficult for them to meet expectations and in generating mutually satisfactory solutions. Specific strategies, sample dialogues, and time-tested advice help educators implement these techniques immediately. The groundbreaking CPS approach has been a revelation for parents and educators of behaviorally-challenging children. This book gives educators the concrete guidance they need to immediately begin working more effectively with these students. Implement CPS one-on-one or with an entire class Work collaboratively with students to solve problems Study sample dialogues of CPS in action Change the way difficult students are treated The discipline systems used in K-12 schools are obsolete, and aren’t working for the kids to whom they’re most often applied – those with behavioral challenges. Lost and Found provides a roadmap to a different paradigm, helping educators radically transform the way they go about helping their most challenging students.

This book is the first to systematically describe the key components necessary to ensure successful implementation of Collaborative Problem Solving (CPS) across mental health settings and non-mental health settings that require behavioral management. This resource is designed by

the leading experts in CPS and is focused on the clinical and implementation strategies that have proved most successful within various private and institutional agencies. The book begins by defining the approach before delving into the neurobiological components that are key to understanding this concept. Next, the book covers the best practices for implementation and evaluating outcomes, both in the long and short term. The book concludes with a summary of the concept and recommendations for additional resources, making it an excellent concise guide to this cutting edge approach. Collaborative Problem Solving is an excellent resource for psychiatrists, psychologists, social workers, and all medical professionals working to manage troubling behaviors. The text is also valuable for readers interested in public health, education, improved law enforcement strategies, and all stakeholders seeking to implement this approach within their program, organization, and/or system of care.

“A nervy, soulful, genuinely surprising it-could-happen-to-you thriller — a book to make you peer over your shoulder for days afterwards.”—A.J. Finn, New York Times bestselling author of The Woman in the Window Winner of the Victorian Premier’s Literary Award, The Nowhere Child is screenwriter Christian White’s internationally bestselling debut thriller of psychological suspense about a woman uncovering devastating secrets about her family—and her very identity... Kimberly Leamy is a photography teacher in Melbourne, Australia. Twenty-six years earlier, Sammy Went, a two-year old girl vanished from her home in Manson, Kentucky. An American accountant who contacts Kim is convinced she was that child, kidnapped just after her birthday. She cannot believe the woman who raised her, a loving social worker who died of cancer four years ago, crossed international lines to steal a toddler. On April 3rd, 1990, Jack and Molly Went’s daughter Sammy disappeared from the inside their Kentucky home. Already estranged since the girl’s birth, the couple drifted further apart as time passed. Jack did his best to raise and protect his other daughter and son while Molly found solace in her faith. The Church of the Light Within, a Pentecostal fundamentalist group who handle poisonous snakes as part of their worship, provided that faith. Without Sammy, the Wents eventually fell apart. Now, with proof that she and Sammy are in fact the same person, Kim travels to America to reunite with a family she never knew she had. And to solve the mystery of her abduction—a mystery that will take her deep into the dark heart of religious fanaticism where she must fight for her life against those determined to save her soul...

The Nowhere Child Simon and Schuster

The first comprehensive presentation for clinicians of the groundbreaking approach popularized in Ross Greene’s acclaimed parenting guide, The Explosive Child, this book provides a detailed framework for effective, individualized intervention with highly oppositional children and their families. Many vivid examples and Q&A sections show how to identify the specific cognitive factors that contribute to explosive and noncompliant behavior, remediate these factors, and teach children and their adult caregivers how to solve problems collaboratively. The book also describes challenges that may arise in implementing the model and provides clear and practical solutions. Two special chapters focus on intervention in schools and in therapeutic/restrictive facilities.

It’s time to say NO to trying to fit square-peg kids into rounds holes, and YES to raising them from a place of acceptance and joy. Today millions of kids are stuck in a world that doesn’t embrace who they really are. They are the one in five “differently wired” children with ADHD, dyslexia, giftedness, autism, anxiety, or other neurodifferences, and their challenges are many. And for the parents who love them, the challenges are just as numerous, as they struggle to find the right school, the right support, the right path. But now there’s hope. Differently Wired is a revolutionary book—weaving together personal stories and a tool kit of expert advice from author Deborah Reber, it’s a how-to, a manifesto, and a reassuring companion for parents who can so often feel that they have no place to turn. At the heart of Differently Wired are 18 paradigm-shifting ideas—what the author calls “tilts,” which include how to accept and lean in to your role as a

parent (#2: Get Out of Isolation and Connect). Deal with the challenges of parenting a differently wired child (#5: Parent from a Place of Possibility Instead of Fear). Support yourself (#11: Let Go of Your Impossible Expectations for Who You “Should” Be as a Parent). And seek community (#18: If It Doesn’t Exist, Create It). Taken together, it’s a lifesaving program to shift our thinking and actions in a way that not only improves the family dynamic, but also allows children to fully realize their best selves. “In this generous and urgent book, Deborah Reber lets the light in. She helps parents see that they’re not alone, and even better, delivers a positive action plan that will change lives.”—Seth Godin, author of Linchpin “Differently Wired will help parents of children who think differently to accept their child for who they are and facilitate their successful development.”—Temple Grandin, author of Thinking in Pictures and The Autistic Brain

NATIONAL BESTSELLER From a leading child psychologist comes this groundbreaking new understanding of children’s behavior, offering insight and strategies to support both parents and children. Nominated for Malcolm Gladwell, Susan Cain, Adam Grant, and Daniel H. Pink’s Next Big Idea Club Over her decades as a clinical psychologist, Dr. Mona Delahooke has routinely counseled distraught parents who struggle to manage their children’s challenging, sometimes oppositional behaviors. These families are understandably focused on correcting or improving a child’s lack of compliance, emotional outbursts, tantrums, and other “out of control” behavior. But, as she has shared with these families, a perspective shift is needed. Behavior, no matter how challenging, is not the problem but a symptom; a clue about what is happening in a child’s unique physiologic makeup. In Brain-Body Parenting, Dr. Delahooke offers a radical new approach to parenting based on her clinical experience as well as the most recent research in neuroscience and child psychology. Instead of a “top-down” approach to behavior that focuses on the thinking brain, she calls for a “bottom-up” approach that considers the essential role of the entire nervous system, which produces children’s feelings and behaviors. When we begin to understand the biology beneath the behavior, suggests Dr. Delahooke, we give our children the resources they need to grow and thrive—and we give ourselves the gift of a happier, more connected relationship with them. Brain-Body Parenting empowers parents with tools to help their children develop self-regulation skills while also encouraging parental self-care, which is crucial for parents to have the capacity to provide the essential “co-regulation” children need. When parents shift from trying to secure compliance to supporting connection and balance in the body and mind, they unlock a deeper understanding of their child, encouraging calmer behavior, more harmonious family dynamics, and increased resilience.

Lost at School HarperCollins

What’s an explosive child? A child who responds to routine problems with extreme frustration-crying, screaming, swearing, kicking, hitting, biting, spitting, destroying property, and worse. A child whose frequent, severe outbursts leave his or her parents feeling frustrated, scared, worried, and desperate for help. Most of these parents have tried everything-reasoning, explaining, punishing, sticker charts, therapy, medication-but to no avail. They can’t figure out why their child acts the way he or she does; they wonder why the strategies that work for other kids don’t work for theirs; and they don’t know what to do instead. Dr. Ross Greene, a distinguished clinician and pioneer in the treatment of kids with social, emotional, and behavioral challenges, has worked with thousands of explosive children, and he has good news: these kids aren’t attention-seeking, manipulative, or unmotivated, and their parents aren’t passive, permissive pushovers. Rather, explosive kids are lacking some crucial skills in the domains of flexibility/adaptability, frustration tolerance, and problem solving, and they require a different approach to parenting. Throughout this compassionate, insightful, and practical book, Dr. Greene provides a new conceptual

framework for understanding their difficulties, based on research in the neurosciences. He explains why traditional parenting and treatment often don't work with these children, and he describes what to do instead. Instead of relying on rewarding and punishing, Dr. Greene's Collaborative Problem Solving model promotes working with explosive children to solve the problems that precipitate explosive episodes, and teaching these kids the skills they lack.

Like parenting, leadership is difficult, challenging and rewarding - sometimes all in the first hour of the day! This enlightening new book explores the common principles of parenting and leading that will help you become a better leader and create great leaders in your team. You don't need to be a parent to be able to see the comparisons between raising children and creating next generation leaders (or indeed becoming a better leader yourself). We have all been raised by someone - if not a parent, another relative or carer - who traditionally shows the actions and considerations parents are known for. When you focus on observing the behaviour of leaders you admire, you will see similarities between them and your own experiences as a child or parent. Like parenting, leadership is difficult, challenging and rewarding - sometimes all in the first hour of the day. Whether parenting or leading you need to focus on five core areas to get the best out of your people: 1. Love 2. Environment 3. Health and wellbeing 4. Language 5. Vision. Each of these core areas is discussed in detail through the book. Author, Wendy Born, uses a unique framework drawn from the principles of parenting that will help you to build and lead great teams. All you need is: Foresight to have a vision, strategy and purpose to guide your way into the future and manage your talent to fit. Plain sight to lead by example, establish boundaries and expectations creating a culture of accountability. Insight into the importance of a positive attitude and mindset, good work/life balance and establishing trust and connection as the foundation of your team. Packed with fascinating case studies and practical advice.

Parenting Your Out-of-Control Teenager AMACOM

"Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging and important." --Washington Post "What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play." --NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the "wrong" program, their child won't get into the "right" college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about

preparing and safeguarding our children's future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility.

Summary of Dr. Ross W. Greene's The Explosive Child Simon and Schuster

Teaching children how to manage their intense emotions is one of the most difficult aspects of parenting or educating gifted children. Emotional Intensity in Gifted Students: Helping Kids Cope With Explosive Feelings provides a much-needed resource for parents and educators for understanding of why gifted children are so extreme in their behavior and how to manage the highs and lows that accompany emotional intensity. Presented in an easy-to-read, conversational style, this revised and updated second edition contains additional chapters addressing temperament and personality development, as well as expanded role-plays and strategies designed to show parents and teachers how to interact and guide gifted children in a way that teaches them how to recognize, monitor, and adjust their behavior. Updated resources and worksheets make this practical resource a must-read for anyone wishing to make a positive and lasting impact on the lives of gifted children.

For children who respond to regular problems with extreme frustration which manifests in crying, screaming, biting, hitting, and worse. Those kids are not "impossible children", they can be soothed but you need to know the real reason why they behave that way. If you are thinking that it's because they are trying to seek attention or get what they want, you're wrong. In this book, you'll find the correct answer and learn how to use that knowledge in order to approach your explosive children. (Note: This summary is wholly written and published by Abbey Beathan. It is not affiliated with the original author in any way) "Behaviorally challenging kids are challenging because they're lacking the skills to not be challenging." - Ross W. Greene Dr. Ross Greene has treated thousands of explosive children and knows very well the true reason behind their behaviour. It's not because kids are seeking attention and it's not because their parents are

pushovers. What he discovered is that explosive children are lacking of crucial skills that are able to regulate frustration. Because they are completely different from other children, they also need a different approach. Luckily, Dr Greene will reveal it to you in this book. Dr. Ross Greene provides a new mentality for parents in order for them to understand their explosive child and properly communicate with him. P.S. The Explosive Child is an extremely sincere book that will open your eyes to the inner world of explosive children and give helpless parents hope again. P.P.S. Differently Wired Da Capo Lifelong Books

Please note: This is a companion version & not the original book. Sample Book Insights: #1 When it came to breakfast, Jennifer would often scream that her brother could not have the waffles, even if he asked for them. She would become physically aggressive towards her mother if her mother tried to give her brother something else. #2 Jennifer's parents have had to deal with her extreme volatility and inflexibility for years, as it constantly drains their energy and attention. They have sought help from numerous mental health professionals, but none have been able to help them understand why Jennifer acts the way she does or when her outbursts are likely to occur. #3 I used to think of myself as a kind, patient, and sympathetic person. But Jennifer has caused me to act in ways in which I never thought myself capable. I'm emotionally spent. I can't keep living like this. #4 The first realization that parents need to make is that there is something different about the Jennifers of the world. They need us to understand and accept this, and then they can receive the help they need.
