Looks at the USA, Britain

and Canada to offer an international comparative study of public policy systems, as well as a recent history of the evolution of each national health care system. The book explores what drives change and why certain changes occur in some nations and not in others. Essays in the History of Canadian Law Dartmouth Publishing Company
The perceived rise in claims against doctors, coupled with the problems of gaining access to the legal system, have led over recent years to

reconsideration of the basis on which clinicians are held liable for accidents or negligence. This book explores these problems through analysis of a number of jurisdictions, in some of which change has been instituted and in others of which the traditional fault-based model still applies. Critical evaluation of these systems provides the reader with a picture of the problems and benefits of different liability models. *Ulrich's Periodicals Directory 2005* McClelland

& Stewart
As part of its work, The Expert Committee on Aids in Prisons (ECAP) prepared this Final Report in which it addresses issues that HIV/AIDS & drug use raise in federal correctional institutions & contains recommendations. Analyses issues, such as testing, housing & activities, educational programs preventive measures for inmates, protective measures for staff, health care, women inmates, etc. **The Politics of**

Pollution Published for the Osgoode Society by University of Toronto Press

This text presents the most comprehensive resource available that focuses on exam preparation for the MCCQE Part 1 and the USMLE Step 2. Written in a concise, easy-to-read style, this annually revised text includes relevant clinical information on 29 medical subspecialties.

Current Law Index OECD Publishing

This volume is the second

in the Essays in the History of Canadian Law series, designed to illustrate the wide possibilities for research and writing in Canadian legal history. In combination, these volumes reflect the wide-ranging scope of legal history as an intellectual discipline and encourage others to pursue important avenues of inquiry on all aspects of our legal past. Topics include the role of civil courts in Upper Canada; legal education; political corruption; nineteenth-

century Canadian rape law; the Toronto Police Court; the Kamloops outlaws and commissions of assize in nineteenth-century British Columbia; private rights and public purposes in Ontario waterways; the origins of workers' compensation in Ontario; and the evolution of the Ontario courts. Contributors include Brendan O'Brien, Peter N. Oliver, William N.T. Wylie, G. Blaine Baker, Paul Romney, Constance B. Backhouse, Paul Craven, Hamar Foster, Jamie Bendickson, R.C.B. Risk,

and Margaret A. Banks.

**Management Des
Stratégies À Découvrir**

Oxford University Press

This book is an authoritative history of the Federal Court of Canada. The judges' work in various areas of substantive law provides illustrations of the functioning of the Court in the adjudication of disputes.

Health care reform has become one of the most prevalent topics in recent policy discourse within and across nations. In the 1990s, common features of the health care arena elevated the importance

of bargaining relationships among large, sophisticated entities as the dominant mode of decision-making, fundamentally challenging the traditional dominance of the medical profession, which had been grounded in individualized "agency" relationships between providers and patients. These developments have played out in varying ways around the globe. Carolyn Hughes Tuohy looks at the experiences of the United States, Britain, and Canada, offering an international

comparative study of public policy systems, as well as a recent history of the evolution of each national health care system. What drives change in health care systems? Why do certain changes occur in some nations and not in others? Tuohy argues that the answer lies in understanding the "accidents" of history that have shaped national systems at critical moments and in the distinctive "logics" of these systems. Her study carefully delineates both

the common logic of the health care arena, deriving from micro-economic characteristics and technological change, and the particular logics of national systems, put in place by specific episodes of policy change. She goes on to explore how in the wake of these episodes, the mixed market in the United States, hierarchical corporatism in Britain, and the single-payer system in Canada determined the subsequent direction and pace of change in all three countries. Finally,

Tuohy provides suggestions to guide the strategic judgments that decision-makers must make within the health care system of each country. *Accidental Logics* uniquely departs from the descriptive literature currently available by presenting an extensive review of the evidence regarding the evolution of the health care arenas in the United States, Britain, and Canada, integrated within an explanatory framework. It is essential up-to-date reading for political scientists working

in comparative politics and public policy, health policy analysts, government agency officials, and students in political science, health policy, and administration programs.

Based on a survey of all national business associations, and interviews with many interest-group executives, *Business and Politics* outlines the wide variety of roles assumed by interest groups in the Canadian policy process. Coleman argues that the present fragmentation of business interests makes

consultation with major socio-economic producer groups highly unlikely. Instead, adjustment takes place as a series of ad hoc bailouts related to an electoral calculus rather than to a more reflective consideration of the longer-term evolution of the Canadian economy and the relative economic position of Canadians. As there are no organizations that prompt business to take a broad look at its responsibilities to society at large, some economic policy options that political leaders might

want to consider are ruled out. Attempts to redress difficulties in the Canadian economy and social welfare system consequently suffer. Coleman concludes that the business community is not appropriately accountable to Canadians for its actions, nor is it sufficiently organized to assume the political responsibilities that come with the private economic power it possesses. He argues that Canada could benefit from examining models of the political institutions in smaller

European states and adopting some of their solutions for reform in this country.
