Essay is basically the act of 'trying out... or an act of attempting to accomplish something. It is also an analytic or interpretive literary composition. Essays; therefore; essentially reveal the personality of the writer besides giving his/her viewpoints on a specific subject matter. Essays help us express ourselves; our thoughts; our ideas and our perceptions about things we are associated with or about things we are impacted with or wish to have an impact on. Essays not only provide the required space and tool; they also let us leisurely saunter along. Tweeting or emailing cannot achieve this. This answers why we should write essays. We should write because we cannot

always speak out minds coherently. There is no fixed length of an essay. It could be written in just about 100 words or even in several thousand words. Generally speaking; essays are not very long. But they need not be too small either. On an average; an essay in one thousand words should be adequate. A range of 1;000 to 1;500 is generally accepted as ideal for competitive exams and that is the length of the majority of the essays in this book. What is Good Academic Writing? McFarland "It is possible to say that resistance in education has always been resisted; the point, of course, is who is doing the resisting. Why they are resisting, what they are resisting, and whose interests are being served by these acts of resistance. David M. Moss and Terry A. Osborn's provocative collection of essays on educational resistance

gives new scope and meaning to the term 'resistance' in the context of today's challenges to and on behalf of social justice education. It is an important contribution to the field of critical education."---Peter McLaren, Graduate School of Education and Information Studies, University of California, Los Angeles --Book Jacket. **High School Essays** Penn State Press EVERYTHING YOU NEED to write the TOEFL essay with confidence. This book brings together thirty of the best essays from Radical Teacher. The journal is devoted to feminist and socialist approaches to teaching--to showing teachers how to democratize the classroom and empower students. The articles included here have been chosen for their continuing usefulness to school and college teachers with emphasis on critical pedagogy as well as radical course content. These essays provide not only a wealth of ideas for teachers already involved in radical education but also an accessible, readable, and wide-ranging introduction for those new to it.

Bloomsbury Publishing Desert, Wilderness, Wasteland, and Word features an English translation of a recently discovered and until-now unpublished essay of Jacques Ellul's that examines the significance of the desert from biblical, theological, and ethical perspectives. It also provides an introduction that contextualizes Ellul's piece, and five incendiary essays that critically reflect on Ellul's work. Altogether, this volume offers fresh and

provocative insight into the writings of Jacques Ellul during a historical moment that appears to be on its way to, or already in, a desert, wilderness, and wasteland, with many people in it who are desperate for encounters with a new, revitalizing Word.

This volume contributes to the study of the identity of Jesus, focusing on how he was originally perceived both by his contemporaries and in the earliest Christian writings. The essays include studies of methodology, archaeology, background, individual gospel perspectives, gospel relationships, intertextuality in the gospels, the earliest reception of the Jesus tradition in the post-Easter writings of the New Testament, and the missiological and pedagogical implications of Jesus' teaching. John Nolland is the reason for this volume, and his important writings on the gospels are its backdrop. The contributors, who include N.T. Wright, Craig Evans, Darrell Bock, Rainer Riesner and Roland Deines, pay tribute to

Nolland's work and ideas, by drawing on his writings, and by exploring questions and issues close to his heart.

An In-Depth Look at Bible Translation ·The concerns, issues, and approaches ·The history ·The ins and outs of the translation task With a reach that covers the entire globe, the Bible is the best-selling, most earnestly studied book of all time. It has been translated into well over 1,000 languages, from those of global reach such as English, French, and Arabic, to a myriad of isolated tribal tongues. Yet while most readers of the English Bible have a favorite version, few understand how the different translations

came about, or why there are so many, or what determines whether a particular translation is trustworthy. Written in tribute to one of today's true translation luminaries, Dr. Ronald Youngblood, *The Challenge of Bible Translation* will open your eyes to the principles, the methods, the processes, and the intricacies of translating the Bible into language that communicates clearly, accurately, and powerfully to readers of many countries and cultures. This remarkable volume marshals the contributions of foremost translators and linguists. Never before has a single book shed so much light on Bible translation in so accessible a fashion. In three parts, this compendium gives scholars, students, and interested Bible readers an unprecedented grasp of: 1. The Theory of Bible Translation 2. The History of Bible Translation 3. The Practice of Bible Translation *The Challenge of Bible Translation* will give you a new respect for the diligence, knowledge, and care required to produce a good translation. It will awaken you to the enormous cost some have paid to bring

the Bible to the world. And it will deepen your understanding of and appreciation for the priceless gift of God's written Word.

The Liberal Imagination is one of the most admired and influential works of criticism of the last century, a work that is not only a masterpiece of literary criticism but an important statement about politics and society. Published in 1950, one of the chillier moments of the Cold War, Trilling's essays examine the promise—and limits—of liberalism, challenging the complacency of a naïve liberal belief in rationality, progress, and the panaceas of economics and other social sciences, and asserting in their stead the irreducible

complexity of human motivation and the tragic inevitability of tragedy. Only the imagination, Trilling argues, can give us access and insight into these realms and only the imagination can ground a reflective and considered, rather than programmatic and dogmatic, liberalism. Writing with acute intelligence about classics like Huckleberry Finn and the novels of Henry James and F. Scott Fitzgerald, but also on such varied matters as the Kinsey Report and money in the American imagination, Trilling presents a model of the critic as both part of and apart from his society, a defender of the reflective life that, in our ever more rationalized world, seems ever more necessary—and ever more remote.

The gap between the New Testament and the Imprecatory Psalms is less than we think. When faced with prayers against enemies in the Psalms, we are too quick to assume that these Old Testament authors were ignorant of some basic New Testament ethics. They are self-righteous, thinking they have earned God's favor. They don't know that the wicked can

repent and be forgiven. They believe in vengeance and hating their enemies. We assume wrongly. These prayers are far more aware than many modern churchgoers of how deeply our own sin runs, so that even when persecuted, we are not automatically entitled to divine help. Even when we are truly entitled to justice against unrighteous attackers, if God rescues us, that is unmerited grace. Further, the psalms are fully aware that their enemies can repent, and they show mercy to them. The Book of Psalms teaches its readers--individuals and the whole people of God--to desire the repentance, forgiveness, and divine blessing of all nations, even the people's most vicious enemies.

Public Library, Astor, Lenox and Tilden Foundations Walter de Gruyter GmbH & Co KG The field of English for Academic Purposes (EAP) developed to address the needs of students whose mother tongue is not English. However, the linguistic competence required to achieve academic success at any university where English is the medium of instruction is a challenge for all students. While there are linguistic features common to academic literacy as a general genre, closer investigation reveals significant differences from one academic field to another. This volume asks what good writing is within specific disciplines, focussing on student work. Each chapter provides key insights by EAP professionals, based on their research in which they bring together analysis of student writing and interviews with subject specialists and markers who determine what 'good writing' is in their discipline. The volume includes chapters on established disciplines which have had less attention in the EAP and academic writing literature to date, including music, formal

linguistics, and dentistry, as well as new and growing fields of study such as new media. The role of the Internet in changing literacy and education has been a topic of much speculation, but very little concrete research. This book is one of the first attempts to document the role of the Internet and other new digital technologies in the development of language and literacy. Warschauer looks at how the nature of reading and writing is changing, and how those changes are being addressed in the classroom. His focus is on the experiences of culturally and linguistically diverse

learners who are at special risk of being marginalized from the information society. Based on a two-year ethnographic study of the uses of the Internet in four language and writing classrooms in the state of Hawai'i--a Hawaiian language class of Native Hawaiian students seeking to revitalize their language and culture; an ESL class of students from Pacific Island and Latin American countries; an ESL class of students from Asian countries; and an English composition class of working-class students from diverse ethnic backgrounds--the book includes data from interviews with students and teachers, classroom observations, and analysis of student texts. This rich ethnographic data is combined with theories from a broad range of disciplines to develop conclusions about the relationship of technology to language, literacy, education, and culture. Central to Warschauer's discussion and conclusions is how contradictions of language, culture, and class affect the impact of Internet-based education. While Hawai'i is a special place, the issues confronted here are

similar in many ways to those that exist throughout the United States and many other countries: How to provide culturally and linguistically diverse students traditionally on the educational and technological margins with the literacies they need to fully participate in public, community, and economic life in the 21st century.

From the Foreword— In a very short stretch of years, the Judaic Studies Program at the University of California, San Diego, has developed into one of the most important centers for teaching and research in biblical studies, in ancient Near Eastern and biblical archaeology, and more generally in Judaic studies. The program now rivals far older centers of study in these fields in eastern research universities. I have been an admirer of the program for some years, proud of former students of mine whose energy and foresight have contributed to the developments in La Jolla, including the establishment of endowed

chairs that guarantee the future of this center and its program. This collection of essays honoring the Judaic Studies Program and its faculty is a testimony to the fecundity of the program in producing scholars, whose essays dominate the collection. Several essays come from other scholars whose home base is in the West and who have engaged in colloquia and common pursuits with the San Diego faculty. . . . There are sections on Genesis, poetry and prophecy, narrative and history, lexicon, archaeology, and (not least) paleography. —Frank Moore Cross

Paul the apostle is usually imagined as a man of prestige and power – comfortably conversing with philosophers, seeking an audience with the emperor, and composing compelling letters for Christians throughout the Mediterranean. Yet this portrait of a safe and conventional figure at the origins of Christianity airbrushes out many strange things about him. This volume repositions Paul as a man at the periphery of power. Recovering an

Undomesticated Apostle explores the ways that Paul has been “domesticated” in both popular and scholarly imagination. By isolating selected crises of the apostle’s life and legacy and examining the social and material dimensions of his world, these essays collectively chip away at the received image of his strength and status. The result is a series of glimpses of Paul that frame the apostle as surprisingly marginal and weak within Roman society. Published in honour of New Testament scholar Leif E. Vaage, *Recovering an Undomesticated Apostle* presents Paul as a man operating from a position of desperation, making virtue out of necessity as he attempted to claw his way up in the dog-eat-dog world of the ancient Mediterranean.

The built and landscaped spaces of colleges and universities radiate and absorb the values of the cultures in which they were created. As economic and political forces exert pressure on administrators and as our understanding of higher education shifts, these spaces can transform dramatically. Focusing on the utopian visions and the dystopian realities of American campus life, this collection of new essays examines campus spaces from the perspective of those who live and work there. Topics include disability, sustainability, first-year writing, underrepresented groups on campus, online education, adjunct labor, and the way profit-driven agendas have shaped colleges and universities.
