Role Development in Professional Nursing Practice Cengage Learning

A unique, fundamental resource for nursing students in a clinical environment. The Clinical Placement, 2nd Edition: An essential guide for nursing students is an interactive textbook designed to guide nursing students through their clinical placement journey. The first edition of this nursing reference proved extremely valuable in helping nursing students use their clinical placements as opportunities to develop the skills, knowledge, attitude and understanding that underpin quality practice. The Clinical Placement, 2nd Edition is fully revised with a fresh new appeal. It builds upon the success of the first edition, while incorporating a wealth of new, topical content written in easy-to-understand language. Designed to challenge and inspire students, The Clinical Placement, 2nd Edition: An essential guide for nursing students introduces foundational knowledge in early chapters before addressing more complex issues. This indispensable nursing resource will motivate students to think deeply and critically about important professional and clinical issues.

- stories and scenarios to help students relate theory to the reality of practice
- 'something to think about' boxes offering valuable advice
- 'student experience' sections
- reflective thinking activities to encourage self-assessment and experiential learning
- new sections to address contemporary issues such as Indigenous health, patient safety, clinical reasoning, therapeutic communication, interprofessional communication, clinical handover, emotional intelligence, information and communication technology and social networking
- issues of relevance to the New Zealand health care context
- discussion of topical issues such as national registration
- enhanced attention to cultural safety
- refers to the most recent professional standards and codes of practice

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles-including limits on nurses' scope of practice-should be

removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Scholarly Project John Wiley & Sons

Clinical Instruction and Evaluation: A Teaching Resource, Third Edition is designed to guide instructors through the learning process by providing clinical nurses with the theoretical background and practical tools necessary to succeed as a clinical nursing instructor. The theory used to support the practice of clinical education is presented in a straightforward, easy-to-understand manner. This text offers approaches to structuring clinical experiences for students, evaluating student performance, and solving problems encountered in clinical settings. The Third Edition has been completely revised and updated and now includes a larger focus on teaching people from other cultures and traditions as well as the critical issues around the nursing shortage. The nursing shortage has increased the demand for nursing educators and as a result, nursing programs are now turning to clinically expert nurses to play a role in the educational process. Clinical Instruction and Evaluation helps the clinical nurse make a smooth transition to nurse instructor. Key Features:

- Emphasizes the clinical component of the faculty role
- Employs a practical approach to make the process of teaching in the complex clinical area accessible
- Chapters can be used independently allowing instructors to use content creatively without being bound by the organization of the text
- Unique focus on the interpersonal relationship between the instructor and student found in specific chapters (15 & 16) as well as throughout the text
- Provides concrete examples for instructors to leverage in the classroom to elicit critical thinking and clinical judgment responses from students

This report describes a preceptorship model that provides student nurses with clinical practice in rural health facilities. The development and implementation of a preceptorship model reflects a partnership between nursing education and nursing service--between the urban nursing school and the rural hospital. A five-stage preceptorship model is presented that includes development of guidelines, selection of participants, orientation of participants, implementation, and evaluation. The model draws on a literature review plus feedback from nurse preceptors and graduating nursing students. The model emphasizes the importance of clearly stated purposes and objectives; guidelines outlining the roles and responsibilities of the student, the preceptor, and the faculty liaison; and careful selection and preparation of all participants. In spring 1992, 24 students completed their senior practicums in rural hospitals using the preceptorship model; all were satisfied with the experience, met their clinical objectives, and completed their learning contracts. Evaluations of the model by the faculty liaison person, preceptors, and students resulted in 18 recommendations to improve implementation of the model. The strongest preceptor recommendation was that students and preceptors work identical hours with identical patient assignments. Contains 53 references. Appendices include preceptor questionnaire, terminal nursing competencies, agreement between nursing school and health care facility, form for assessing potential preceptors, and evaluation forms for students and preceptors.
