The education of young people is context bound. This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education. There is not a single context across this broad geographical expanse, rather different religions, different political systems and different values exert influences that create distinctive programmes that characterise different countries. Yet there are also commonalities such as the post-colonial nature of most of the countries portrayed in this book, determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities. There are also voices of resistance in these chapters, recognising the realities of local contexts but also recognising the need for change. Social studies education in these contexts may well be descended from its origins in North America, but in South and South Asian contexts, it has taken on new purposes, new forms and new values. Education researchers, policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them.

A 360 Degree—Amplify the cause & effect There is more to student life than the academic zones. The book's content comes from the author's self-realization, experience, and observation throughout her career span in education. A change in the outlook of education as "Education for life" is always a healthy perspective. Therefore, a need to pause, retrospect, and make a conscious decision is right at the starting point of early childhood and education. The purpose of a school, its model, the vision, and the mission is essential. This book's content discusses numerous topics and shares a broader angle to look at a school beyond its academic excellence. The author tries to highlight different yardsticks to measure the parameters of an efficacious school.

The book celebrates the School and its success through a 360-degree enhanced vision accommodating quantitative and qualitative factors. Society needs a 360-degree view on defining the school's purpose; a school needs a 360-degree view to amplify the cause and its effect; a parent needs a 360-degree viewpoint on choosing a school for their child.

This work contains a Foreword by Dorothy Marriss, Deputy Vice Chancellor and Dean, School of Health and Social Care, University of Chester. This practical guide promotes evidence-based teaching. It provides a thorough, critical analysis of various healthcare teaching strategies, offering new strategies and an integrative approach promoting blended learning, self-directed study, simulation, the use of medical humanities and story-telling. Health and social care educators in all sectors and across all fields will find this book invaluable, as will education policy makers and shapers, and health and social care professionals with an interest in education and professional development. 'This book gives the reader an immensely readable account of the move healthcare education has made into the 21st Century. The move from a syllabus of training detailing concise statements in relation to learning to a curriculum for education that emphasises learning strategy and outcomes is a fairly recent development in education planning. Now the teacher is a facilitator of learning with the expertise to create a stimulating learning environment. I highly recommend this book as a rich source of education development for the new teacher and as a refresher for the more experienced teacher' - Dorothy Marriss, in the Foreword.
