Over 120 new original and unique fundraising ideas for nonprofits across the globe. All new Fundraisers that have never been seen before and come complete with sample logos and instructions on how to implement the idea and hold the charity event. When your nonprofit organization is in need of a fresh new fundraiser, Fundraiser Rescue is the guide for you!

The Confessions of J. J. Rousseau. Translated from the French. With Illustrations U of Nebraska Press
The Standards of Conduct Office of the Department of Defense General Counsel's Office has assembled an "encyclopedia" of cases of ethical failure for use as a training tool. These are real examples of Federal employees who have intentionally or unwittingly violated standards of conduct. Some cases are humorous, some sad, and all are real. Some will anger you as a Federal employee and some will anger you as an American taxpayer. Note the multiple jail and probation sentences, fines, employment terminations and other sanctions that were taken as a result of these ethical failures. Violations of many ethical standards involve criminal statutes. This updated (end of 2009) edition is organized by type of violations, including conflicts of interest, misuse of Government equipment, violations of post-employment restrictions, and travel.

The Confessions of Jean Jacques Rousseau DigiCat

In the years between the historic first moon landing by Apollo 11 on July 20, 1969, and his death at age 82 on August 25, 2012, Neil Armstrong received hundreds of thousands of cards and letters from all over the world, congratulating him, praising him, requesting pictures and autographs, and asking him what must have seemed to him to be limitless—and occasionally intrusive—questions. Of course, all the famous astronauts received fan mail, but the sheer volume Armstrong had to deal with for more than four decades after his moon landing was staggering. Today, the preponderance of those letters—some 75,000 of them—are preserved in the archives at Purdue University in West Lafayette, Indiana. Dear Neil Armstrong: Letters to the First Man on the Moon publishes a careful sampling of these letters—roughly 400—reflecting the various kinds of correspondence that Armstrong received along with representative samples of his replies. Selected and edited by James

R. Hansen, Armstrong's authorized biographer and author of the New York Times best seller First Man: The Life of Neil A. Armstrong, this collection sheds light on Armstrong's enduring impact and offers an intimate glimpse into the cultural meanings of human spaceflight. Readers will explore what the thousands of letters to Neil Armstrong meant not only to those who wrote them, but as a snapshot of one of humankind's greatest achievements in the twentieth century. They will see how societies and cultures projected their own meanings onto one of the world's great heroes and iconic figures.

John Whitehead began life in Montclair, New Jersey, as a child of the Depression and went on to lead an exemplary life in the years of the Greatest Generation. In this intimate, charming autobiography, he shares his stories and the lessons he's learned about quiet leadership. He describes how on D-Day he commanded one of the landing crafts at Omaha Beach, and witnessed one of the greatest battles in American military history. Later, in his role as co-chair of Goldman Sachs, he was one of the pioneers of the globalization of international finance that was to change the face of American business. In 1985, Whitehead was appointed Deputy Secretary of State under President Ronald Reagan and became the architect of the Reagan administration's successful efforts to wean the countries of Eastern Europe from the Soviet Union and to open up space there for the democratic movements that eventually resulted in the fall of the Berlin Wall. Most recently, he was appointed by New York Governor George Pataki as Chairman of the Lower Manhattan Development Corporation, which is charged with the task of rebuilding Ground Zero. Whitehead provides a first-hand account of the difficult decisions the LMDC has made in meeting its goals of re-developing lower Manhattan and honoring the victims of 9/11 as the capstone of his remarkable career.

As Britain and France became more powerful during the eighteenth century, small states such as Geneva could no longer stand militarily against these commercial monarchies. Furthermore, many Genevans felt that they were being drawn into a corrupt commercial world dominated by amoral aristocrats dedicated to the unprincipled pursuit of wealth. In this book Richard Whatmore presents an intellectual history of republicans who strove to ensure Geneva's survival as an independent state. Whatmore shows how the Genevan republicans grappled with the ideas of Rousseau, Voltaire, Bentham, and others in seeking to make modern Europe safe for small states, by vanquishing the threats presented by war and by empire.

This book presents 21 papers given at a workshop held to demonstrate future policy towards hunting by tourists in Tanzania. The volume brings together contributions from experts from eastern and southern African countries. Papers cover a range of topics from administration of hunting, setting quotas, safari volume and returns from hunting, the involvement of local communities, and the professional hunter. The volume also includes recommendations from the workshop that were used to guide the preparation of policy. A comprehensive guide to different aspects of hunting as a form of wildlife use in Africa.

The Confessions e-artnow

In the late seventeen hundreds and early eighteen hundreds, I was Beethovens prized pupil, if you can believe it. Unfortunately I had to quit him for reasons not concerning music. It was really quite silly. I was supposed to be protecting my good name. You see, it was rumored that the maestro, Beethoven, was a womanizer and while conducting orchestras he also conducted many affairs with his young female students. In those times, although mostly behind their backs, some men and even some women were referred to as libertines. Of course any man as emotional as Beethoven had to be romantically exotic, but I didnt consider him a libertine; it was just that young women threw themselves at him and he used the opportunities. The saddest part was this remarkable man was almost deaf; in later years, he became almost completely and totally deaf. Yet this man was such a genius, just by reading the written notes, he could hear the music inside his head. Often, he laid his hands on the piano as I played. At times, when I played particularly when we were alone, after hed closed the piano, thus containing the soundhed then lay his head down on the piano; by doing so, with his temple held tightly on the lid, it enabled him to hear it fully the way it was meant to be heard. This was done only prudently and only witnessed by certain people as he was embarrassed and, at first, not wanting to admit being deaf. No matter how much relief Id get by forgetting the music, I never would forget it on purpose. That music is a part of me, more so than my arms and limbs even; the music is more part of me than my perceived beauty or my immortality.

The Confessions was two distinct works, each part consisting of six books. Books I to VI were written between 1765 and 1767 and published in 1782, while books VII to XII were written in 1769-1770 and

published in 1789.[citation needed] Rousseau alludes to a planned third part, but this was never completed. Though the book contains factual inaccuracies—in particular, Rousseau's dates are frequently off, some events are out of order, and others are misrepresented, incomplete, incorrect—Rousseau provides an account of the experiences that shaped his personality and ideas. For instance, some parts of his own education are clearly present in his account of ideal education, Emile, or On Education. Rousseau's work is notable as one of the first major autobiographies. Prior to the Confessions, the two great autobiographies were Augustine's own Confessions and Saint Teresa's Life of Herself. However, both of these works focused on the religious experiences of their authors; the Confessions was one of the first autobiographies in which an individual wrote of his own life mainly in terms of his worldly experiences and personal feelings. Rousseau recognized the unique nature of his work; it opens with the famous words: "I have resolved on an enterprise which has no precedent and which, once complete, will have no imitator. My purpose is to display to my kind a portrait in every way true to nature, and the man I shall portray will be myself." His example was soon followed: not long after publication, many other writers (such as Goethe, Wordsworth, Stendhal, and De Quincey) wrote their own similarly-styled autobiographies. The Confessions is also noted for its detailed account of Rousseau's more humiliating and shameful moments. For instance, Rousseau recounts an incident when, while a servant, he covered up his theft of a ribbon by framing a young girl—who was working in the house—for the crime. In addition, Rousseau explains the manner in which he disposes of the five children he had with Thérèse Levasseur.

The Greatest Works of French Literature

In 1945 some experts still considered the so-called sound barrier an impenetrable wall, while winged rocket planes remained largely relegated to science fiction. But soon a series of unique rocket-powered research aircraft and the dedicated individuals who built, maintained, and flew them began to push the boundaries of flight in aviation's quest to move ever higher, ever faster, toward the unknown. *Beyond Blue Skies* examines the thirty-year period after World War II during which aviation experienced an unprecedented era of progress that led the United States to the boundaries of outer space. Between 1946 and 1975, an ancient dry lakebed in California's High Desert played host to a series of rocket-powered research aircraft built to investigate the outer reaches of flight.

The western Mojave's Rogers Dry Lake became home to Edwards Air Force Base, NASA's Flight Research Center, and an elite cadre of test pilots. Although one of them—Chuck Yeager—would rank among the most famous names in history, most who flew there during those years played their parts away from public view. The risks they routinely accepted were every bit as real as those facing NASA's astronauts, but no magazine stories or free Corvettes awaited them—just long days in a close-knit community in the High Desert. The role of not only the test pilots but the engineers, aerodynamicists, and support staff in making supersonic flight possible has been widely overlooked. *Beyond Blue Skies* charts the triumphs and tragedies of the rocket-plane era and the unsung efforts of the men and women who made amazing achievements possible.
