some

creatures still alive with stories, whose personalities refuse to be relegated to the dusty corners of an exhibit. The fame of these beasts during their lifetimes has given them an iconic status in death. More than just museum specimens, these animals have attained a second life as historical and cultural records. This collection of essays—from a broad array of contributors, including anthropologist

s, curators, fine artists, geographers, historians, and journalists—comprises short "biographies" of a number of famous taxidermized animals. Each essay traces the life, death, and museum "afterlife" of a specific creature, illuminating the overlooked role of the dead beast in the modern human-animal encounter through practices as disparate as hunting and zookeeping. The contributors

offer fresh examinations of the many levels at which humans engage with other animals, especially those that function as both natural and cultural phenomena, including Queen Charlotte's pet zebra, Maharajah the elephant, and Balto the sled dog, among others. Readers curious about the enduring fascination with animals who have attained these strange afterlives will be drawn to

the individual narratives within each essay, while learning more about the scientific, cultural, and museological contexts of each subject. Ranging from autobiographical to analytical, the contributors' varying styles make this delightful book a true menagerie.

Raphael's Ostrich begins with a little-studied aspect of Raphael's painting—the ostrich, which appears as an attribute of

Justice, painted in the Sala di Costantino in the Vatican. Una Roman D'Elia traces the cultural and artistic history of the ostrich from its appearances in ancient Egyptian hieroglyphs to the menageries and grotesque ornaments of sixteenth-century Italy. Following the complex history of shifting interpretations given to the ostrich in scientific, literary, religious,

poetic, and satirical texts and images, D'Elia demonstrates the rich variety of ways in which people made sense of this living "monster," which was depicted as the embodiment of heresy, stupidity, perseverance, justice, fortune, gluttony, and other virtues and vices. Because Raphael was revered as a god of art, artists imitated and competed with his

ostrich, while religious and cultural critics complained about the potential for misinterpretin g such obscure imagery. This book not only considers the history of the ostrich but also explores how Raphael's painting forced viewers to question how meaning is attributed to the natural world, a debate of central importance in early modern Europe at a time when the disciplines of modern art history and

natural history were developing. The strangeness of Raphael's ostrich, situated at the crossroads of art, religion, myth, and natural history, both reveals lesser-known sides of Raphael's painting and illuminates major cultural shifts in attitudes toward nature and images in the Renaissance. More than simply an examination of a single artist or a single subject, Raphael's

Ostrich offers an accessible, erudite, and charming alternative to Vasari's pervasive model of the history of sixteenth-century Italian art.

Over a lifetime, CNN founder Ted Turner has dedicated two million private acres to a globally unparalleled project to reintroduce and restore the species that once roamed freely there. Ted Turner was for many years the largest private-property owner in America and known for his

establishment of the largest bison herds in the world. From this beginning, his holdings have grown to be refuges of biodiversity for some of the most endangered species in the world, from migratory birds to fish and insects, and from wolves to grizzly bears. Rhett Turner explores his father's devotion to leaving nature in better shape than he found it by taking us across nearly two dozen of

the Turner family's properties—from the northern Rockies to the prairies of the Dakotas to the southeastern Atlantic coastal plains and pine forests—land equal to the size of Yellowstone National Park.

the fear of fat black women, which Sabrina Strings shows took root more than two hundred years ago. Strings weaves together an eye-opening historical narrative ranging from the Renaissance to the current moment, analyzing important works of art, newspaper and magazine articles, and scientific literature and medical journals—where fat bodies were once praised—showing that fat

phobia, as it relates to black women, did not originate with medical findings, but with the Enlightenment era belief that fatness was evidence of “savagery” and racial inferiority. The author argues that the contemporary ideal of slenderness is, at its very core, racialized and racist. Indeed, it was not until the early twentieth century, when racialized attitudes against fatness were

already entrenched in the culture, that the medical establishment began its crusade against obesity. An important and original work, *Fearing the Black Body* argues convincingly that fat phobia isn't about health at all, but rather a means of using the body to validate race, class, and gender prejudice. *The Last Great Wild Places* Rizzoli Publications The

This fabulous version of the classic nursery song “Old MacDonald” introduces children to a menagerie of African animals and their sounds. It is beautifully illustrated by Caldecott Honor winner Rachel Isadora, with her signature collage-style artwork. Old Mikamba had a farm, E-I-E-I-O. And on this farm he had . . . a giraffe, a baboon, and an elephant! Meet Old Mikamba, who watches over a wide variety of animals on

his game farm in the plains of Africa.

Children will discover a whole new set of fun animal sounds as they are invited to sing along and roar with the lions, bellow with the rhino, whinny with the zebras, honk with the wildebeests, and more! A wonderful introduction to African wildlife that is great fun to read aloud, this truly irresistible rendition of a beloved song includes a list of animal fun facts and

gives children a huge variety of animal sounds to imitate as they pore over the detailed animals, landscapes and patterns in the stunning illustrations.

A moving portrait of Africa from Poland's most celebrated foreign correspondent - a masterpiece from a modern master. Famous for being in the wrong places

at just the right times, Ryszard Kapuscinski arrived in Africa in 1957, at the beginning of the end of colonial rule - the "sometimes dramatic and painful, sometimes enjoyable and jubilant" rebirth of a continent. The *Shadow of the Sun* sums up the author's experiences ("the record of a 40-year marriage") in this place that became the central obsession of his remarkable

career. From the hopeful years of independence through the bloody disintegration of places like Nigeria, Rwanda and Angola, Kapuscinski recounts great social and political changes through the prism of the ordinary African. He examines the rough-and-ready physical world and identifies the true geography of Africa: a little-understood spiritual universe, an African way of

being. He looks also at Africa in the wake of two epoch-making changes: the arrival of AIDS and the definitive departure of the white man. Kapuscinski's rare humanity invests his subjects with a grandeur and a dignity unmatched by any other writer on the Third World, and his unique ability to discern the universal in the particular has never been more powerfully displayed than in this work.

Kolb has produced a thoroughly researched essay on this painting, which is in the Getty Museum. The study focuses on Brueghel's depiction of nature, especially his exacting representation of identifiable species of animals and birds, the names of which are listed. Brueghel's collaboration with other painters, his

and other painters' re-use of the same theme and composition, and the history and practice of natural history collection and representation are central themes. The volume, which is printed in a horizontal format (it's 11x8") and heavily illustrated, is written for a general audience, though art historians will also find much of interest. something more than a common occurrence, more than a woman in her ordinary skin. Stealing Water Hachette UK Renowned photographer Thomas D. Mangelsen's latest project focuses on a celebrated Yellowstone grizzly bear family, which he has been tracking and photographing for ten years. The grizzly bears of Yellowstone and Grand Teton National Parks are the most famous wild bruins in the world.

Millions of people and generations of travelers annually make special pilgrimages to the northern Rockies just to catch sight of these powerful, breathtaking animals. But like a lot of large predator populations on earth, grizzlies in the lower 48 states have struggled for survival. In Grizzly, renowned nature photographer Thomas D. Mangelsen and environmental writer Todd Wilkinson

team up to tell the inspiring if sometimes harrowing story of a remarkable bear clan: Mother Grizzly 399 and her generations of offspring. While tracking this charismatic band of bears, Mangelsen has amassed an incomparable photographic portfolio that offers an intimate glimpse into the lives of this celebrated bear family. The rescue of Yellowstone grizzlies ranks as one of the

The white South actively resisted these efforts, battling the legal strictures of

Reconstruction on the ground. Meanwhile, white southern storytellers worked to recast the South's image, romanticizing the Lost Cause and heralding the birth of a New South. Prince argues that this cultural production was as important as political competition and economic striving in turning the South and the nation away from the egalitarian promises of

Reconstruction and toward Jim Crow. **The Book of Animals** Booksales An American natural history primer for children which includes a couple of Australian marsupials. *Old Mikamba Had a Farm* Harper Collins 'Endlessly fascinating.' - Bill Bryson 'Eye-opening, informative and very funny!' - Chris Packham 'Well-informed and downright funny' - Richard Dawkins History is full of strange

 The long-overdue, definitive career retrospective of an

early-20th-century gag cartoonist. From the 1880s to the Roaring 1920s, Sullivant took to the drawing board and dreamed up all manner of hilarious gag cartoons featuring animals of all stripes, perennial American "types" like hayseeds and hobos, and classic characters from myths and biblical tales. These comics haven't seen the light of day since their initial

appearance in pioneering humor magazines like Puck and Judge over a century ago. Includes essays by John Cuneo, Peter de Seve, Barry Blitt, Steve Brodner, Rick Marshall, Nancy Beiman, and R.C. Harvey, with a foreword by cartoonist Jim Woodring. [Some African Highways](#)

 Not since the likes of Robert Bateman has there been a masterpiece such as African Menagerie--

one of the largest and most ambitious paintings in the history of wildlife art-- here reproduced in exquisite detail in this oversize volume with gatefolds. Depicting more than 220 African species, the stunning large-scale mural African Menagerie is artist Brian Jarvi's masterwork. Lavishly reproduced in an oversize format with a gatefold, this book brings this landscape

masterpiece to the conservationist, lover of Africa, and fan of wildlife art. In oversized color reproductions, the book African Menagerie offers readers a look at the finer details of the realist renderings of the animals and birds across the seven panels and thirty feet. There are also reproductions of the animal studies Jarvi created in the seventeen years leading up to the final work.

Measuring 28 feet across and a full one-story tall, and connected via seven interlocking panels, Brian Jarvi's painting includes more than 200 different African wildlife species, presented as if they are looking at us, the human viewers, seemingly challenging us to save this planet. Many of the species featured in Jarvi's painting are, according to experts, expected to be extinct in the wild by the middle of

this century unless humankind takes bold action to ensure their continued existence. In oversized color reproductions, African Menagerie brings the masterpiece home in an accessible manner. The studies offer a glimpse into the work and mind of a creative genius. In addition, the book tells the story of the work, and tracks the evolution and unlikely journey of

Jarvi--from once being a Duck Stamp artist to becoming one of the most notable wildlife painter of this generation.
