### **Becoming an Australian Citizenship**

Cambridge University Press

Growing numbers of scholars, practitioners, politicians, and citizens recognize the value of deliberative civic engagement processes that enable

citizens and governments to come together in public spaces and engage in constructive dialogue, informed discussion, and decisive deliberation.

This book seeks to fill a gap in empirical studies in deliberative democracy by studying the assembly of the Australian Citizens' Parliament (ACP), which took place in Canberra on February 6-8, 2009. The ACP addressed the question "How can the Australian political system be strengthened to serve us better?"

The ACP's Canberra assembly is the first large-scale, face-to-face deliberative project to be completely audio-recorded and transcribed, enabling an unprecedented level of qualitative and quantitative assessment of participants' actual spoken discourse. Each chapter reports on different research questions for different purposes to benefit different audiences. Combined, they exhibit how diverse modes of research focused on a single event can enhance both theoretical and practical knowledge about deliberative democracy.

*Australian Citizenship . . . a Common Bond* Melbourne Univ. Publishing

"Becoming a Citizen is a terrific book.

Important, innovative, well argued, theoretically significant, and empirically grounded. It will be the definitive work in the field for years to come."—Frank D. Bean, Co-Director, Center for Research on Immigration, Population and Public Policy "This book is in three ways innovative. First, it avoids the domestic navel-gazing of U.S. immigration studies, through an obvious yet ingenious comparison with Canada. Second, it shows that official multiculturalism and common citizenship may very well go together, revealing Canada, and not the United States, as leader in successful immigrant integration. Thirdly, the book provides a compelling picture of how the state matters in making immigrants citizens. An outstanding contribution to the migration and citizenship literature!"—Christian Joppke, American University of Paris

Redefining Australians How To Books Ltd "When Paul Keating announced his plans for an Australian Republic in 1995, he emphatically appealed for Australia's head of state to be 'one of us.' But what does it mean to be 'one of us'? Who can be an Australian citizen? Who was entitled to citizenship in the past? By what paths can newcomers become 'one of us'? And how have these paths changed since 1901? "One of Us? A Century of Australian Citizenship" traces the meanings of citizenship and belonging that are evident in the Australian Government's civil policies. The book shows that, since Federation, Australian citizenship has had much less to do with questions of civil and political rights, democracy and sovereignty than with a determination to create a cohesive and loyal citizenry. The government's policies have addressed the problems it has faced in incorporating migrants and in controlling

the movement of people in and out of the country. At a time when questions of who can be 'one of us' are as alive as ever, and when citizenship, race and multiculturalism are vital issues in contemporary politics, this comprehensive examination of our past is vital to our understanding of the issue of citizenship today."

The year 2013 is the 40th anniversary of the end of the 'White Australia policy'. In these four decades Australia's immigration policy has shifted from a primary concern with cultural homogeneity or Britishness to a focus on demand-based skills through an increasingly fine-tuned system of points tests, occupation lists and employer-sponsored visas. Despite disproportionate politicisation of asylum seekers in recent public discourse, the intake of refugees and humanitarian entrants has remained relatively small. While Australia's contemporary migrant and refugee intake is truly multicultural, and governments continue to adhere to an official multicultural policy, integration into the Australian community and culture has been the dominant process, especially for second and third generation Australians. Australian identity and citizenship have changed in the last forty years, making Australia and its people more pluralistic and richly diverse. Becoming Australian focuses on the ways in which migrants and refugees meet the challenges of 'becoming Australian' and the transformative process for Australia and its people as they incorporate the continuing influx of multicultural peoples.

voices as they share with us their life stories, their migration experiences and citizenship decisions. The exploration of identity issues provides valuable insights into the patterns that immigrant group identity takes on and shows how it emerges as pluralistic rather than unitary.

This important, theoretically sophisticated work explores the concepts of liberal democracy, citizenship and rights. Grounded in critical original research, the book examines Australia's political and legal institutions, and traces the history and future of citizenship and the state in Australia. The central theme is that making proof of belonging to the national culture a precondition of

citizenship is inappropriate for a multicultural society such as Australia. This becomes an object lesson for the multicultural regional polities forming throughout the world.

Australian Citizenship Law Springer Australia and Canada are both lively, multicultural societies with British constitutional traditions. Historically, they have faced similar challenges in defining and sustaining citizenship that reach back into a common past. They also have similar approaches to address contemporary issues and anticipate the challenges of a 21st century future. New perspectives on the culture and politics of citizenship emerge in this timely text that is essential reading for those interested in the steadily expanding ties between Australia and Canada. The Uyghur population of Xinjiang is being systematically rounded up, with as many as a million citizens being held in detention. In Australia, Saddam was desperate to keep his wife Nadila and their baby son out of detention, but the clock was ticking. Saddam came to Australia as a political refugee, settling into the community and becoming a citizen. Then he returned to Xinjiang for a visit and met Nadila. Shortly afterwards, China's government began its massive crackdown on the Uyghurs.

Nadila was trapped in Xinjiang with their newborn son Lutfi. This is the epic story of Sadam's efforts to reunite his family. For a long time he battled indifference from both Australian and Chinese authorities, but with the assistance of Michael Bradley's legal team the obstacles were eventually cleared. Then came a nail-biting long journey for Nadila and Lutfi. *Freeing My Family* is an amazing true story with the happiest ending anyone could want. **Rethinking Australian Citizenship**

Cambridge University Press

Every Assistance and Protection is the first book presenting an in-depth history of the Australian passport. In charting the development of the passport from its early beginnings to its present form, the book traverses changes in government policy and social history from the early 19th century to the modern era. It shows how the Australian passport evolved from a signifier of British nationality into a badge of membership of one of the most multicultural countries in the world. The book explores the landmark events in this history: the great 19th century diasporas, resulting from relaxation of official controls on the movement of people; the early passport regime regulating the movement of "ticket-of-leave" convicts; the establishment of the centralised passport system during World War I; the enactment of the first passport legislation for the Commonwealth, The Passports Act 1920, and the reaction of some Australians who felt the new law infringed the

liberties of the British subject; changes to the laws in 1938 such that possession of a passport was no longer mandatory for an Australian to travel, though still a practical necessity; the use of the government's discretionary power to cancel or withhold passports to inhibit the movement of individual communists; the establishment of Australian citizenship in 1948 - the basis for possession of an Australian passport; the removal of the word "British" from the cover in 1967; the effects of globalisation and heightened security in the late 20th and early 21st century. It also touches on the lives of individuals: boxer Les Darcy, journalist Wilfred Burchett, and General Sir Thomas Blamey, are among the many Australians featuring in these pages. The book is based on an exhaustive examination of hitherto unexamined primary sources of many government departments, including the Departments of External Affairs, the Prime Minister's, the Attorney-General's, Defence, Home and Territories, Immigration and Foreign Affairs.
