new study Dr Orledge reveals what made Satie 'tick' as a composer, dealing with every aspect of Satie's complex career and relating his achievement to the other arts and to the society in which he lived. Almost every figure in contemporary art was involved with Satie in some way or another, from Matisse and Picasso to Apollinaire, Cocteau and Brancusi. This, however, is no mere life-and-

works study but rather an exploration of the technique behind Satie's art, which foreshadowed most of the 'advances' of twentieth-century music from serialism to minimalism, and even muzak. As the book progresses Satie appears as far more than just the composer of the popular *Gymnopédies* and *Parade*. *The Customer Centric Enterprise* National Academies Press In the third edition of A

Grammar of Akkadian, changes have been made in the section on the nominal morpheme -ân (§20.2) and the sections on the meaning of the D stem (§24.3) and the Gt stem (§33.1(b)); these revisions reflect recent scholarship in Akkadian grammar. Other changes include minor revisions in wording in the presentation of the grammar in a few other sections; a number of new notes to

some of the readings; additions to the glosses of a small number of words in the lesson vocabularies (and the Glossary and English-Akkadian word list); and updates of the resources available for the study of Akkadian, and of the bibliography. A new appendix (F) has been added, giving Hebrew and other Semitic cognates of the Akkadian words in the lesson vocabularies.

The pagination of the first and second editions has for the most part been retained, apart from the insertion of the new appendix and a few minor deviations elsewhere. importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter&Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss,

among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a customer centric enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology

and innovation management, customer behavior, as well as marketing. Die beiden Nemos Courier Corporation

The world has changed radically since 1989, when the General Assembly declared the

period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting

respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration .

Analyzing paintings produced between 1753 and 1781 and the comments of a number of critics who wrote about them, especially Dennis Diderot, Fried discovers a new emphasis in the art of the time, based not on subject matter or style but on values and effects.

Teach Yourself Combining superb investigative reporting with

incisive analysis, Jerry Mashaw and David Harfst provide a compelling account of the attempt to regulate auto safety in America. Their penetrating look inside the National Highway Traffic Safety Administration (NHTSA) spans two decades and reveals the complexities of regulating risk in a free society. Hoping to stem the tide of rising automobile deaths and injuries, Congress

passed the National Traffic and Motor Vehicle Safety Act in 1966. From that point on, automakers would build cars under the watchful eyes of the federal regulators at NHTSA. Curiously, however, the agency abandoned its safety mission of setting, monitoring, and enforcing performance standards in favor of the largely symbolic act of recalling defective autos. Mashaw and Harfst argue

that the regulatory shift from rules to recalls was neither a response to a new vision of the public interest nor a result of pressure by the auto industry or other interest groups. Instead, the culprit was the legal environment surrounding NHTSA and other regulatory agencies such as the EPA, OSHA, and the Consumer Product Safety Commission. The authors show how NHTSA's

decisions as well as its organization, processes, and personnel were reoriented in order to comply with the demands of a legal culture that proved surprisingly resistant to regulatory pressures. This broad-gauged view of NHTSA has much to say about political idealism and personal ambition, scientific commitment and professional competition, long-range vision and

political opportunism. A fascinating illustration of America's ambivalence over whether government is a source of--or solution to--social ills, *The Struggle for Auto Safety* offers important lessons about the design and management of effective health and safety regulatory agencies today. *An Etymological Dictionary of the Romance Languages* BRILL Redesigning

The book critiques the status quo

of stratified school systems, and the unequal distribution of cultural capital and value added schooling. The authors address one of today's most pressing questions: Are social, economic and cultural divisions between the nations, between school sectors, between schools and students growing or declining?

Education and Social Justice
Over the last

few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying

science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science,

engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is

limiting their careers. Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on

the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings. Complete
