Do not be afraid, join us, come back! You’ve had your anti-communist fun, and you are pardoned for it—time to get serious once again!—Slavoj Žižek Responding to Alain Badiou’s ‘communist hypothesis’, the leading political philosophers of the Left convened in London in 2009 to take part in a landmark conference to discuss the perpetual, persistent notion that, in a truly emancipated society, all things should be owned in common. This volume brings together their discussions on the philosophical and political import of the communist idea, highlighting both its continuing significance and the need to reconfigure the concept within a world marked by havoc and crisis.

Race, Islam and Power: Ethnic and Religious Violence in Post-Suharto Indonesia is the result of Andreas Harsono’s fifteen year project to document how race and religion have come to be increasingly prevalent within Indonesia’s politics. From its westernmost island of Sabang to its easternmost city of Merauke in West Papua, from Miangas Island in the north, near the Philippines border, to Ndana Island, close to the coast of Australia, Harsono reveals the particular cultural identities and localised political dynamics of this internally complex and riven nation.

In 1964 Faisal bin Abdul Aziz became king of a country holding a quarter of the world's oil reserves, also home to Mecca and Medina. He was called 'the most powerful Arab ruler in centuries'. Eleven years later, in front of television cameras, his nephew shot him at point-blank range. In this authoritative biography, Alexei Vassiliev tells the story of a pious, cautious and resolute leader who steered Saudi Arabia through a minefield of domestic problems, inter-Arab relations and the decline of Soviet influence in the Middle East. King Faisal maintained ties with both Egypt and the United States through two Arab-Israeli wars and the 1973 Arab oil embargo, which revolutionized the world energy market. Throughout, he staked high hopes on cooperation with the US, a relationship that is still vital to both countries' interests.

From the taunting videos of Osama Bin Laden to the partisan euphoria of the embedded journalist, from the visual rhetoric of the anti-globalisation movement to the empire of spin to the scalding polemics of American campaign advertising, propaganda is back. This book provides a full and detailed analysis of the phenomenon of propaganda, its meaning, content and urgent significance. It is one of the most original works ever published on the subject. How did cranes come to symbolize matrimonial happiness? Why were magpies the only creatures that would not go inside Noah's Ark? Birds and bird imagery are integral parts of our language and culture. With her remarkable ability to dig up curious and captivating facts, Diana Wells hatches a treat for active birders and armchair enthusiasts alike. Meet the intrepid adventurers and naturalists who risked their lives to describe and name new

birds. Learn the mythical stories of the gods and goddess associated with bird names. Explore the avian emblems used by our greatest writers--from Coleridge's albatross in "The Ancient Mariner" to Poe's raven. A sampling of the bird lore you'll find inside: Benjamin Franklin didn't want the bald eagle on our National Seal because of its "bad moral character," (it steals from other birds); he lobbied for the turkey instead. Chaffinches, whose Latin name means "unmarried," are called "bachelor birds" because they congregate in flocks of one gender. Since mockingbirds mimic speech, some Native American tribes fed mockingbird hearts to their children, believing it helped them learn language. A group of starlings is called a murmuration because they chatter so when they roost in the thousands. Organized alphabetically, each of these bird tales is accompanied by a two-color line drawing. Dip into 100 Birds and you'll never look at a sparrow, an ostrich, or a wren in quite the same way.

Supernova: The Knight, The Princess and the Falling Star presents a series of intertwined and unconventional love stories, straight and gay, with a bit of science and spirituality added to the mix. The major characters are young, urban, and technologically highly aware. They are caught up in major forms of contemporary social conflict. The work has been highly acclaimed. The poet Taufiq Ismail has written: "A renewal has taken place in Indonesian literature over the past decade. Supernova is an intelligent, unique and truly exciting exploration of science, spirituality and the nature of love." The literary critic Jacob Soemardjo suggests: "This is an attractive novel by a young writer. It is an intellectual work in the form of a work of pop art, set in the real world. It opposes old values with new ways of understanding, so that readers can see the world in a different way."

The English-language debut of Indonesia's rising star. The epic novel Beauty Is a Wound combines history, satire, family tragedy, legend, humor, and romance in a sweeping polyphony. The beautiful Indo prostitute Dewi Ayu and her four daughters are beset by incest, murder, bestiality, rape, insanity, monstrosity, and the often vengeful undead. Kurniawan’s gleefully grotesque hyperbole functions as a scathing critique of his young nation’s troubled past:the rapacious offhand greed of colonialism; the chaotic struggle for independence; the 1965 mass murders of perhaps a million “Communists,“ followed by three decades of Suharto’s despotic rule. Beauty Is a Wound astonishes from its opening line: One afternoon on a weekend in May, Dewi Ayu rose from her grave after being dead for twenty-one years.... Drawing on local sources—folk tales and the all-night shadow puppet plays, with their bawdy wit and epic scope—and inspired by Melville and Gogol, Kurniawan’s distinctive voice brings something luscious yet astringent to contemporary literature.

Kau mengalir seperti air sungai, dari sebuah mata air, menuruni bukit, masuk ke selokan, bergabung dengan aliran yang lebih besar, menjadi banjir yang mematikan--dan mungkin juga menyuburkan--menderu sampai ke muara, tanpa pernah melihat ke belakang, tanpa pernah mengingat mata air yang menjadi titik awalmu. Seperti ketika terdampar di lautan dengan hanya ditemani sebatang kayu, Jimmy pun merasakan kehidupannya terombang-ambing. Apa yang dia yakini saat masih kecil berbenturan dengan kenyataan yang dia lihat, dengar, dan rasakan sepanjang tumbuh dewasa. Membuatnya bak bulir air yang mencari jati diri di tengah lautan yang menyesatkan. Sampai suatu ketika dia menemukan angin dan arus yang menggerakkan gelombang dalam kehidupannya pada sosok atasannya--Lembayung, Pemimpin Redaksi Harian Express yang juga mantan aktivis yang pernah diculik dan disiksa penguasa. Lalu peristiwa itu terjadi. Dua pengeroyokan berbeda yang menimpa Jimmy dan seorang bapak yang hanya ingin membelikan sepatu baru untuk anaknya. Membuat angin bersilir kian lesat, menciptakan pusaran amuk yang menyeret segala hal di sekelilingnya ke dalam kisarannya. Tak ada yang luput.

In the land of the rising sun, you have to look hard to find a person who is not kind and peaceful; even the most peaceful nations, there are dark alleys where the sun does not rise—where shadowy figures emerge full of rage and hatred...most with a thirst for revenge. In this book, you will read about 15 of Japan's most horrifying killers. Many of the people profiled in this book didn't just kill their victims—they tortured and mutilated them. Be warned: This is NOT a book for the faint at heart.

Modeling in Transport Phenomena, Second Edition presents and clearly explains with example problems the basic concepts and their applications to fluid flow, heat transfer, mass transfer, chemical reaction engineering and thermodynamics. A balanced approach is presented between analysis and synthesis, students will understand how to use the solution in engineering analysis. Systematic derivations of the equations and the physical significance of each term are given in detail, for students to easily understand and follow up the material. There is a strong incentive in science and engineering to understand why a phenomenon behaves the way it does. For this purpose, a complicated real-life problem is transformed into a mathematically tractable problem while preserving the essential features of it. Such a process, known as mathematical modeling, requires understanding of the basic concepts. This book teaches students these basic concepts and shows the similarities between them. Answers to all problems are provided allowing students to check their solutions. Emphasis is on how to get the model equation representing a physical phenomenon and not on exploiting various numerical techniques to solve mathematical equations. A balanced approach is presented between analysis and synthesis, students will understand how to use the solution in engineering analysis. Systematic derivations of the equations as well as the physical significance of each term are given in detail Many more problems and examples are given than in the first edition - answers provided
