Differentiated Reading for Comprehension is designed to provide high-interest, nonfiction reading success for all readers. This 64-page book focuses on fifth grade reading skills defined by the Common Core State Standards. Each of 15 stories is presented separately for

the below-level, on-level, and advanced students, followed by a series of comprehension questions. Grade five covers such standards as quoting a text to explain an answer or draw inferences, identifying and explaining an author's reasons and evidence, and analyzing the structure of a text. -- This series allows teachers to present the same content to below-level, on-level, and advanced students with leveled nonfiction stories. It includes multiple-choice, fill-in-the-blank, and true/false questions; short-answer writing practice; and comprehension questions. Students stay interested, build confidence, and discover that reading can be fun! The reading passages are separated into sections with titles

such as Extreme Places, Amazing People, Wild Animals, Strange and Unexplained, Fascinating Machines, and Amazing Kids.

Chicago radio station WCFL was the first and longest surviving labor radio station in the nation, beginning in 1926 as a listener-supported station owned and operated by the Chicago Federation of Labor and lasting more than fifty years. The station emphasized popular entertainment and labor and public affairs programming, seeking during its early decades to help organize workers, increase public awareness and support for the union movement, and enhance working-class consciousness and culture. Nathan Godfried analyzes labor's challenge to the dominant media by examining the station's history and its dialectical relationship with the organized labor movement, the corporate radio world, and the federal government from 1926 to 1978. The station's story will be of interest to both labor and broadcast historians, showing how WCFL's development paralleled important changes in the

organized labor movement and in the movement's interaction with business and government.

In *Self-Reliance*, Emerson expounds on the importance of trusting your soul, as well as divine providence, to carve out a life. A firm believer in nonconformity, Emerson celebrates the individual and stresses the value of listening to the inner voice unique to each of us?even when it defies society's expectations. This new 2019 edition of *Self-Reliance* from Logos Books includes *The American Scholar*, a stirring speech of Emerson's, as well as footnotes and images throughout.

**School Life** *Inter-Parliamentary Union Peterson's Scholarships, Grants & Prizes 2013* is the must have guide for anyone looking for private aid money to help finance an education. This valuable resource provides up-to-date information on millions of privately funded awards available to college students. The

comprehensive scholarship and grant profiles include those awards based on ethnic heritage, talent, employment experience, military service, and other categories, which are available from private sources, such as foundations, corporations, and religious and civic organizations. In addition, there are informative articles containing advice on avoiding scholarship scams, winning scholarships with a winning essay, and getting in the minority scholarship mix.

Carson-Dellosa Publishing *Honeybees* make decisions collectively--and democratically. Every year, faced with the life-or-death problem of choosing and traveling to a new home, honeybees stake everything on a process that includes collective fact-finding, vigorous debate, and consensus building. In fact, as world-renowned animal behaviorist Thomas Seeley reveals, these incredible insects have much to teach us when it comes to collective wisdom and effective decision making. A remarkable and richly illustrated account of

scientific discovery, Honeybee Democracy brings together, for the first time, decades of Seeley's pioneering research to tell the amazing story of house hunting and democratic debate among the honeybees. In the late spring and early summer, as a bee colony becomes overcrowded, a third of the hive stays behind and rears a new queen, while a swarm of thousands departs with the old queen to produce a daughter colony. Seeley describes how these bees evaluate potential nest sites, advertise their discoveries to one another, engage in open deliberation, choose a final site, and navigate together--as a swirling cloud of bees--to their new home. Seeley investigates how evolution has honed the decision-making methods of honeybees over millions of years, and he considers similarities between the ways that bee swarms and primate brains process information. He concludes that what works well for bees can also work well for people: any decision-making group should consist of individuals with shared interests and mutual respect, a leader's

influence should be minimized, debate should be relied upon, diverse solutions should be sought, and the majority should be counted on for a dependable resolution. An impressive exploration of animal behavior, Honeybee Democracy shows that decision-making groups, whether honeybee or human, can be smarter than even the smartest individuals in them.

Student Voice: A Companion to Democracy and Its Discontents serves two primary purposes. First, as the title of the volume suggests, it serves as a companion text to *Democracy and Its Discontents: Critical Literacy across Global Contexts* (Sense Publishers, 2015). Second, the volume features critical dialogues between emerging and established scholars in the field of critical literacy education, broadly defined. It brings together a collection of essays that speak to the possibilities of taking a critical approach to language and literacy education. The contributing authors draw on their life stories and professional experiences to make a strong case for

taking a critical approach to education. They demonstrate that the act of teaching always involves a grappling with the entanglement of social, cultural and political forces. In this sense, education is always a normative and ethical enterprise. The authors featured in this book will encourage readers to re-imagine critical education and its emancipatory potential in an age of neo-conservative and corporate assaults on education. This volume, written in a lucid and accessible manner, will appeal to a broad readership interested in education. It will be an informative and engaging text in graduate and undergraduate courses on language and literacy education, teacher education, education policy studies, and curriculum studies. In-service teachers, teacher-educators, and school administrators will also find it to be a valuable resource. Karyn Cooper is an Associate Professor and Sardar M. Anwaruddin is a PhD candidate in the Department of Curriculum, Teaching and Learning at the Ontario Institute for Studies in Education (OISE) of the

University of Toronto.

This book examines how music education presents opportunities to shape democratic awareness through political, pedagogical, and humanistic perspectives. Focusing on democracy as a vital dimension in teaching music, the essays in this volume have particular relevance to teaching music as democratic practice in both public schooling and in teacher education.

Although music educators have much to learn from others in the educational field, the actual teaching of music involves social and political dimensions unique to the arts. In addition, teaching music as democratic practice demands a pedagogical foundation not often examined in the general teacher education community. Essays include the teaching of the arts as a critical response to democratic participation; exploring democracy in the music classroom with such issues as safe spaces, sexual orientation, music of the Holocaust, improvisation, race and technology; and music teaching/music teacher

education as a form of social justice. Engaging with current scholarship, the book not only probes the philosophical nature of music and democracy, but also presents ways of democratizing music curriculum and human interactions within the classroom. This volume offers the collective wisdom of international scholars, teachers, and teacher educators and will be essential reading for those who teach music as a vital force for change and social justice in both local and global contexts.

Stance and voice are among the most significant concepts in writing theory and pedagogy today. Referring to the ways we express a point of view and engage with others, the terms are particularly controversial in the domain of academic writing, long considered a faceless and impersonal kind of discourse. But while corpus research shows that stance is

scarcer in academic genres than in many other contexts, the complex, and distinctive ways scholars and students present their attitudes to their texts, their readers and their content offers a rich area of study for discourse analysts and students of academic writing. This book reappraises the notions of stance and voice and reconsiders their relevance in applied linguistics, showing their expression and impact in a broad range of written academic genres. In its fifteen chapters, leading authorities offer their thoughts and research on the following issues:

- The key frameworks, methods, theories and areas of research
- The expression of stance and voice in a range of genres and disciplines
- The centrality of community and context in the expression of stance and voice
- The main factors of variation: channel, discipline, culture and time
- Questions of authenticity, distinctiveness, empowerment and identity

New Perspectives on Education for Democracy brings together diverse communities of education research in an innovative way to develop a nuanced understanding of the relationship between education and democracy. This book synthesises a range of theoretical,

conceptual, and empirical approaches to address the complex challenges faced by young people and societies in the 21st century. Each chapter provides accounts of local democratic encounters in education, while engaging with global debates and issues, such as de-democratisation and growing social, economic, and educational inequality. This book presents new ways of thinking about democracy, local-global enactments of democracy through teaching and learning, and future thinking for a new era of democracy. This book will be relevant for educators, researchers, and policymakers who are interested in educational sociology, critical pedagogy, and democratic education.

Ethical discourse about the institution of voting rarely includes the option of abstaining for principled reasons. This collection of nine articles widens the discussion in that direction by giving readers a new question: At what point and on what grounds might one choose not to vote as an act of conscience? Contributors offer both ethical and

faith-based reasons for not voting. For some, it is a matter of candidates not measuring up to high standards; for others it is a matter of reserving political identity and allegiance for the church rather than the nation-state. These writers--representing a wide range of Christian traditions--cite texts from diverse sources: Mennonites, Pentecostals, and pre-Civil Rights African Americans. Some contributors reference the positions of Catholic bishops, Karl Barth, or John Howard Yoder. New Testament texts also figure strongly in these cases for conscientious abstention from voting. In addition to cultivating the ethical discussion around abstention from voting, the contributors suggest alternative ways beneficially to engage society. This volume

creates a new freedom for readers within any faith tradition to enter into a dialogue that has not yet been welcomed in North America.

Is democracy as we know

it in danger? More and

more we confront one

another as aggrieved
