View the mix of people and cultures that make up South Africa today, including a special section on traditional beliefs and customs.

### **Hydropolitical Vulnerability and Resilience Along International Waters**

Wipf and Stock Publishers

The purpose of the book is to provide a collection of perspectives from various parts of Africa on what scholars in religion studies are currently engaged with, whether it refers to topics or methodology. Each chapter is written from the

perspective of a scholar working within a particular context on a particular theme or topic related to religion studies. Several methodologies have been implemented in each contribution to the book. Each contribution applies a different methodology for the purpose of investigating a specific topic or research theme. In general, the majority of the contributions follow a method of critical literature review as applied to a specific field. The book is not intended to provide an exhaustive list of all possible topics and themes addressed in current research in Africa. From a decolonized perspective, the book gives voice to African scholars who exhibit their scholarly work as related to religion studies. Topics addressed

include curriculum design and pedagogical approaches in teaching religion studies, the relation between religion and culture in an African context, religion and health, religion and gender, interreligious relations in Africa, religion and ecology, and religion and mission.

### Secrets for a Successful Dissertation

Walter de Gruyter GmbH & Co KG

In this scholarly book, a century's theology presented by the Faculty of Theology at the University of Pretoria, is celebrated. All authors are academics or research associates of the University of Pretoria. A historical and futuristic overview with perspectives from the past, present and future, are examined. The past is not only portrayed by means of societal and

scientific contributions and achievements, but the authors also reflect on malfunctions, ill behaviour and disappointments of church and theology, presented at the University of Pretoria within the South African context over 100 years. The book commences with a chapter in which institutional transformation is discussed, as well as the changes that demonstrate the role of the Faculty of Theology within a secular state university. It includes an explanation of the importance of research impact, research productivity and research reputation. Among various discipline indicators, the category Theology and Religion Studies plays a significant role in the measurement of world university rankings of universities. With regard to scientific and encyclopaedic content, the book focuses on the theological disciplines presented in the academic curricula: first the biblical sciences (Old and New Testament Studies), then the historical disciplines (Systematic Theology, Church History and Church Polity), and finally the practical disciplines (Practical Theology, Science of Religion and Missiology). The role of Religion Studies in a newly

established Faculty of Theology and Religion not only enhances the diversity of interreligious tolerance and an atmosphere of dialogue, but it serves as platform to interconnect with the fields of Humanities, Social and Natural Sciences and other academic disciplines. In the conclusive part of the book, contributions highlight the role of the centres in the Faculty (Centre for Contextual Ministry and Centre for Sustainable Communities), as well as the continental and international footprints of the two theological journals whose title ownership is attached to the Faculty of Theology of the University of Pretoria, namely HTS Theological Studies and Verbum et Ecclesia. The methodology comprised in all the chapters amounts to a literature and contextual study. Since the book describes the histories of formal academic departments, these texts are of a descriptive, interpretative and critical character. Reference is made in some chapters to exegetical methods, like the historical critical methods. The target audience of the book is academic scholars and theologians, who specialise in the different fields of Theology, the Humanities and other Social Sciences. The

book is also accessible to scholars of other academic disciplines outside these disciplines. The book comprises original research by several authors and is not plagiarised from other scientific publications of this nature.

[AF Press Clips](#) Pretoria University Law Press

The past two decades have seen a huge growth in interest in doctoral studies, not only in South Africa but elsewhere as well. Changes in the funding framework for universities in South Africa, in particular, has meant that from 2005 onwards, more funding has been available. However, postgraduate studies are challenging. The "digital revolution", as one example, has had a radical impact on the way research is done in the 21st century. Because of the more widespread availability of information (including personal information), students have had to become more accountable when they conduct research. How to succeed in your master's and doctoral studies is organised around eight steps that should be followed for the successful and ethical completion of postgraduate studies, whether they be traditional master's theses, mini-theses or

doctoral dissertations. How to succeed in your master's and doctoral studies is based on first-hand knowledge of students' experiences with postgraduate studies: what the challenges and problems were, how they navigated the supervisory process and the different styles and approaches of supervisors, the support (or lack thereof) they received from the universities where they had enrolled, and much more. -- Page 4 of cover.

A guide to the systematic analytical results for ridge, LASSO, preliminary test, and Stein-type estimators with applications Theory of Ridge Regression Estimation with Applications offers a comprehensive guide to the theory and methods of estimation. Ridge regression and LASSO are at the center of all penalty estimators in a range of standard models that are used in many applied statistical analyses. Written by noted experts in the field, the book contains a thorough introduction to penalty and shrinkage estimation and explores the role that ridge, LASSO, and logistic regression play in the computer intensive area of neural

network and big data analysis. Designed to be accessible, the book presents detailed coverage of the basic terminology related to various models such as the location and simple linear models, normal and rank theory-based ridge, LASSO, preliminary test and Stein-type estimators. The authors also include problem sets to enhance learning. This book is a volume in the Wiley Series in Probability and Statistics series that provides essential and invaluable reading for all statisticians. This important resource: Offers theoretical coverage and computer-intensive applications of the procedures presented Contains solutions and alternate methods for prediction accuracy and selecting model procedures Presents the first book to focus on ridge regression and unifies past research with current methodology Uses R throughout the text and includes a companion website containing convenient data sets Written for graduate students, practitioners, and researchers in various fields of science, Theory of Ridge Regression Estimation with Applications is an authoritative guide to the theory and methodology of statistical estimation. Virtually all churches aim to invest meaningfully in the faith development of the younger generations who have been entrusted into their care. Some churches have a longstanding track record of faithfulness in living out this commitment. Some lose sight of this priority over time and allow their intentionality to fade. This book makes a distinctive contribution to our understanding of children's, youth, and young adult ministries by appropriating Erik Erikson's concept of generativity ("the interest in establishing and guiding the next generation") as a way of exploring congregational life. Eleven accomplished authors representing five different countries provide diverse theological and cultural perspectives on key aspects of what it means for churches to invest intentionally in the faith development of the members of emerging generations. Their chapters challenge us to think about the intergenerational dynamics of our churches, the crucial partnership between church and parents, and what it means to involve young people meaningfully in the life of the church. The intriguing topics explored by

this group of authors--and the diverse contexts from which they write--promise to broaden and enrich our thinking about caring for children, youth, and young adults as a vital responsibility shared by the entire congregation.

*National Union Catalog* Karger Medical and Scientific Publishers

The bestseller that pioneered the comparison of qualitative, quantitative, and mixed methods research design continues in its Fourth Edition to help students and researchers prepare their plan or proposal for a scholarly journal article, dissertation or thesis.

Accounting Standards John Wiley & Sons Minerals are solid, naturally occurring inorganic substances that form the building blocks of rocks, and, therefore, our planet's crust. *Minerals & Crystals* examines a selection of important minerals that occur on Earth, how they form, their physical characteristics, and how to go about identifying them. Mineral species descriptions detail their gemological properties, history, occurrence and uses, and are illustrated with striking full-colour photographs. An invaluable guide for collectors,

gemologists, students and anyone with an interest in earth sciences. Sales points: Highly illustrated accessible guide to minerals, their chemistry and morphology; full-colour photographs of each mineral; easy ID of more than 120 minerals.

Fast Facts: Comprehensive Genomic Profiling Springer

"Accounting Standards" introduces students to general accounting principles and the disclosure requirements of company financial statements. The emphasis is on the requirements of Accounting Statements and Interpretations issued by the South African Institute of Chartered Accountants, which form the basis of Generally Accepted Accounting Practice (GAAP) in South Africa.

Incorporated into this latest edition are the changes brought about by new accounting standards, issued as a consequence of the South African Institute of Chartered Accountants' Harmonisation and Improvement of Accounting Standards Project. The book is intended to satisfy the specific requirements of students and to reduce the workload of educators.

*The Art of Human Rights* SAGE

Cancer is a multifaceted disease in which

genetic changes induce uncontrolled tumor growth. Genomic characterization of cancer is now leading to better diagnostic, prognostic and predictive biomarkers, and effective individualized management. 'Fast Facts: Comprehensive Genomic Profiling' provides a crash course in the science, methods and application of genomic profiling. Assuming only the most basic knowledge – or memory – of cell biology, the authors provide an overview of DNA and RNA biology and next-generation sequencing. This sets in context the descriptions of prognostic and predictive biomarkers for different cancer types and genomic-based treatments. Finally, but importantly, some of the practicalities of gaining and interpreting genomic information are described. Whether you need a primer or a refresher, this short colorful book demystifies this complex subject. Contents: • Genetic mutations and biomarkers • Understanding next-generation sequencing • Elements of comprehensive genomic profiles • Role in precision oncology • Predictive and prognostic biomarkers • Overcoming barriers to genotype-directed therapy

**How to Succeed in Your Master's and**

**Doctoral Studies** Juta and Company Ltd Tensions in South African universities have traditionally centred around equity (particularly access and affordability), historical legacies (such as apartheid and colonialism), and the shape and structure of the higher education system. What has not received sufficient attention, is the contribution of the university to place-based development. This volume is the first in South Africa to engage seriously with the place-based developmental role of universities. In the international literature and policy there has been an increasing integration of the university with place-based development, especially in cities. This volume weighs in on the debate by drawing attention to the place-based roles and agency of South African universities in their local towns and cities. It acknowledges that universities were given specific development roles in regions, homelands and towns under apartheid, and comments on why sub-national, place-based development has not been a key theme in post-apartheid, higher education planning. Given the developmental crisis in the country, universities could be expected to play a

more constructive and meaningful role in the development of their own precincts, cities and regions. But what should that role be? Is there evidence that this is already occurring in South Africa, despite the lack of a national policy framework? What plans and programmes are in place, and what is needed to expand the development agency of universities at the local level? Who and what might be involved? Where should the focus lie, and who might benefit most, and why? Is there a need perhaps to approach the challenges of college towns, secondary cities and metropolitan centers differently? This book poses some of these questions as it considers the experiences of a number of South African universities, including Wits, Pretoria, Nelson Mandela University and especially Fort Hare as one of its post-centenary challenges.

**Fast Facts: Managing immune-related Adverse Events in Oncology** John Wiley & Sons

About the publication This volume of essays, *A life interrupted: essays in honour of the lives and legacies of Christof Heyns*, honours Christof Heyns, renowned human rights lawyer, advocate, activist and

educator, but also down-to-earth family man, friend and colleague. Christof's sudden and most untimely passing on 28 March 2021 deeply saddened those close to him but also evinced an outpouring of grief from the national and international human rights community. His passing brought a deep sense of loss, in part because, at age 62, he was fully engaged in contributing to the betterment of society and still had so much more to give. His is a life interrupted. But at the same time, looking back over the varied lives he lived, he had already left his mark in so many ways. His influences and impacts are manifold and magical. This collection not only testifies to the legacy that he has left us, but also to the ongoing efforts of many to continue building on his legacy. This collection contains two sets of essays by family members, friends, colleagues, collaborators and students. Part A contains essays of a more reflective and personal nature, while the contributions in Part B link to the scholarly or academic themes Christof had worked on and explored, including international human rights systems, international law, the right to life, freedom of association, international

humanitarian law, the impact of human rights treaties, constitutionalism and legal philosophy. However, a neat distinction between the personal and professional is not possible in respect of such a warm, generous and enthusiastic person as Christof. Most of the essays in Part A integrate some of Christof's professional and academic achievements, while many of the essays in Part B also reflect on Christof as a person. The editors, all based at the Faculty of Law, UP, are colleagues and friends who worked closely with Christof. Frans Viljoen succeeded Christof as Director of the Centre for Human Rights. Christof was his doctoral supervisor, mentor and research collaborator. Charles Fombad worked with Christof at ICLA, and took over as ICLA Director after Christof's passing. Dire Tladi, an ICLA fellow, had his office just across from Christof in ICLA. As member of the International Law Commission, he shared with Christof high level engagement with the UN. While Christof served on the Human Rights Committee, his colleague Ann Skelton serves on the Committee on the Rights of the Child. Magnus Killander worked closely with

Christof as co-author and co-editor. Christof was also his doctoral supervisor. The publication date of this book is 10 January 2022, which is the date marking 63 years since Christof's birth. The publisher is the Pretoria University Law Press (PULP), of which Christof was also a founder.

Gluten-Free Ancient Grains SAGE Publications

Discusses how white South African students learn and confront their Apartheid past, and explores how this knowledge transforms both the students and the author, the first black dean of an historically white university.

**Theory of Ridge Regression Estimation with Applications** SAGE

The GnRH Neuron and its Control examines the developmental biology of GnRH neurons including their birth in the nasal placode of the early embryo, perinatal programming, and sexual differentiation, in addition to the hypothalamic mechanisms that control GnRH neurons in adulthood to generate pulsatile and surge modes of GnRH secretion throughout the major life stages including aging. The morphology,

electrophysiology, signal transduction pathways, transcriptional regulators, and genomics underlying function of the adult GnRH neuron is discussed in detail, as is the neuroendocrinology and cell biology governing the generation of both modes of GnRH release. The book also reviews the neurobiological mechanisms and circuitry responsible for the modulation of the activity of GnRH neurons by season, stress, nutrition, and metabolism, and covers the current and potential therapeutic approaches to regulating GnRH secretion and action. Filled with newly identified research and classical fundamental knowledge to GnRH biology, it will provide students, researchers, and practitioners with an in-depth understanding of reproductive neuroendocrinology. This is the fifth volume in the Masterclass in Neuroendocrinology Series, a co-publication between Wiley and the INF (International Neuroendocrine Federation) that aims to illustrate highest standards and encourage the use of the latest technologies in basic and clinical research and hopes to provide inspiration for further exploration into the exciting field

of neuroendocrinology.

Provides a review of novel pharmaceutical approaches for Tuberculosis drugs

Presents a novel perspective on tuberculosis prevention and treatment

Considers the nature of disease, immunological responses, vaccine and drug delivery, disposition and response

Multidisciplinary appeal, with contributions from microbiology, immunology, molecular biology, pharmaceuticals, pharmacokinetics, chemical and mechanical engineering

**Handbook of Forensic Medicine** IGI Global

For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The book considers the active role the

Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of African Minds, co-publisher with De Gruyter writes: From Memory to Marble is an open access monograph in the true sense of the word. Both volumes of the digital version of the book are available in full and free of charge from

the date of publication. This approach to publishing democratises access to the latest scholarly publications across the globe. At the same time, a book such as From Memory to Marble, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of From Memory to Marble to a range of interested readers. For more material you can browse at Stanford's database "Voortrekker Monumentality: a digital archive".

Woodhead Publishing

Immunotherapeutic products, and immune checkpoints inhibitors in particular, are increasingly used in the management of malignancies, both as monotherapies and in combination. Adverse events tend to be mild to moderate, but they can be severe or even life-threatening. Prompt

recognition and effective management are vital. 'Fast Facts: Managing Immune-Related Adverse Events' is an accessible overview that brings together clear explanations and management summaries. This highly readable handbook examines the possible effects of immunotherapies on the skin, gastrointestinal tract, liver, endocrine system and lungs, as well as less frequent reactions. Detailed descriptions and evidence-based guidance for practical application make 'Fast Facts: Managing Immunotherapy-Related Adverse Events' an invaluable resource for all healthcare professionals who may encounter patients using immunotherapy, including nurses, who are particularly well placed to identify changes linked to use of immunotherapy, those working in the emergency department and primary care providers.

Table of Contents: • Immunotherapy and its side effects: an overview • Gastrointestinal and hepatic adverse events • Dermatologic adverse • Endocrine-related adverse events • Pulmonary adverse events • Less frequent adverse events • Optimizing patient care and early recognition of immune-related

adverse events • Management summaries

*South African national bibliography*  
Penguin Random House South Africa

Gluten-Free Ancient Grains: Cereals, Pseudocereals and Legumes covers grains that are not related to wheat. This includes sorghum, the major millets - pearl, foxtail, proso and finger millet, as well as teff, the major pseudocereals - quinoa, amaranth and buckwheat, and emerging legume grains - lupin, cowpea, Bambara groundnut and marama beans. These are all characterized as gluten-free grains. The book provides key information on the sustainable production of these grains. Ancient grains are characterized by their ability to produce a crop under harsh environmental conditions where the major cereals are not-sustainable or even fail. In order to meet growing food demand, and with water resources becoming scarce, this is a highly valuable quality. Chapters review the major grains, analyzing their production and manufacture processes and detailing their impact on long-term good health. Of interest to many people and organizations in the food production chain, this book will be of significant value to agricultural scientists, food company

innovation and R&D managers, academic and food company nutritionists and dietitians and governmental and non-governmental health ministries and research institutes. Provides a comprehensive overview of non-wheat grains Reviews the manufacture and sustainable production of these grains, detailing their abilities to grow in harsh conditions Analyzes the nutritional value of ancient grains and their health-promoting qualities

#### **Research Design** AOSIS

In Africa, most major rivers, freshwater lakes, and aquifers are shared by two or more countries. These nations are becoming increasingly vulnerable to conflict, and their vulnerabilities are made more acute by climatic variations in precipitation, increasing urbanization, industrialization and environmental degradation. The concept of resilience and vulnerability as it relates to water resources is tackled in this report within the framework of sustainability and relates to the ability of the human and biophysical systems to adapt to change.

*The GnRH Neuron and its Control* John Wiley & Sons

Plant pathogens and diseases are among the most significant challenges to survival that plants face. Disease outbreaks caused by microbial or viral pathogens can decimate crop yields and have severe effects on global food supply.

Understanding the molecular mechanisms underlying plant immune response and applying this understanding to develop biotechnological tools to enhance plant defense against pathogens has great potential for moderating the impact of plant disease outbreaks. Plant Pathogen

Resistance Biotechnology's main focus is an in depth survey of the biological strategies being used to create transgenic disease resistant plants for sustainable plant resistance. Plant Pathogen Resistance Biotechnology is divided into four sections. The first section covers biological mechanisms underpinning disease resistance in plants, while the second highlights case studies of important pathogen-crop groups and then considers why the application of important pathogen-crop groups, transgenic-based strategies designed to selectively target

pathogens could benefit crop production. The third section provides information on the status of transgenic crops around the world, and finally the last part explores high-tech alternatives to genetic engineering for developing disease resistant traits in plants. Edited and authored by leaders in the field, Plant Pathogen Resistance Biotechnology will be an invaluable resource to those studying or researching plant biotechnology, plant pathology, plant biology, plant and crop genetics, in addition to crop science.
