Springer Science & Business Media Following the tradition and style of the acclaimed "Index Islamicus," the editors have created this new Bibliography of Art and Architecture in the Islamic World. The editors have surveyed and, in many cases, annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. The editors have ensured that material from a wide range of scholarly traditions and approaches has been consulted in order to make this comprehensive bibliography an indispensable tool for everyone involved in the study of material culture in Muslim societies.

Designed for the general reader, this splendid introduction to French literature from 842 A.D.—the date of the earliest surviving document in any Romance language—to the present decade is the most compact and imaginative single-volume guide available in English to the French literary tradition. In fact, no comparable work exists in either language. It is not the customary inventory of authors and titles but rather a collection of wide-angled views of historical and cultural phenomena. It sets before us writers, public figures, criminals, saints, and monarchs, as well as religious, cultural, and social revolutions. It gives us books, paintings, public monuments, even TV shows. Written by 164 American and European specialists, the essays are introduced by date and arranged in chronological order, but here ends the book's resemblance to the usual history of literature. Each date is followed by a headline evoking an event that indicates the chronological point of departure. Usually the event is literary—the publication of an original work, a journal, a translation, the first performance of a play, the death of an author—but some events are literary only in terms of their repercussions and resonances. Essays devoted to a genre exist alongside essays devoted to one book, institutions are presented side by side with literary movements, and large surveys appear next to detailed discussions of specific landmarks. No article is limited to the "life and works" of a single author. Proust, for

example, appears through various lenses: fleetingly, in 1701, apropos of Antoine Galland's translation of *The Thousand and One Nights*; in 1898, in connection with the Dreyfus Affair; in 1905, on the occasion of the law on the separation of church and state; in 1911, in relation to Gide and their different treatments of homosexuality; and at his death in 1922. Without attempting to cover every author, work, and cultural development since the Serments de Strasbourg in 842, this history succeeds in being both informative and critical about the more than 1,000 years it describes. The contributors offer us a chance to appreciate not only French culture but also the major critical positions in literary studies today. *A New History of French Literature* will be essential reading for all engaged in the study of French culture and for all who are interested in it. It is an authoritative, lively, and readable volume.

The history and evolution of the fields of science and medicine are symbiotically linked and thus are mutually dependent. Discoveries in one domain have allowed for progress in the other, and it is nearly impossible to study one area in isolation. The influence of science and technologic discoveries on medicine has profoundly impacted the way physicians practice and has resulted in an extended life expectancy and quality of life that our ancestors never dreamed possible. *Science and Technology in Medicine* is a collection of 99 essays based on landmark publications that have appeared in the medical literature over the past 500 years. Each essay includes a summary of the article or chapter; text and images reproduced directly from the original source; a short biography of the author(s); and a discussion about the significance of the discovery and its subsequent influence on later developments. Original material by the likes of Dürer, Bernoulli, Doppler, Pasteur, Trendelenburg, Curie and Röntgen offers readers a rare glimpse at

publications housed in archives around the world, beautifully reproduced in one fascinating volume.
