I Wandered Lonely as a Cloud Spectra

One moment Joseph Schwartz is a happily retired tailor in Chicago, 1949. The next he's a helpless stranger on Earth during the heyday of the first Galactic Empire. Earth, as he soon learns, is a backwater, just a pebble in the sky, despised by all the other 200 million planets of the Empire because its people dare to claim it's the original home of man. And Earth is poor, with great areas of radioactivity ruining much of its soil--so poor that everyone is sentenced to death at the age of sixty. Joseph Schwartz is sixty-two. This is young Isaac Asimov's first novel, full of wonders and ideas, the book that launched the novels of the Galactic Empire, culminating in the Foundation series. This is Golden Age SF at its finest. At the Publisher's request, this title is

being sold without Digital Rights Management Software (DRM) applied.

The Long Way Home Jabberwocky Literary Agency, Inc. Winner of the Coretta Scott King illustrator award, *I, Too, Am America* blends the poetic wisdom of Langston Hughes with visionary illustrations from Bryan Collier in this inspirational picture book that carries the promise of equality. *I, too, sing America. I am the darker brother. They send me to eat in the kitchen When company comes, But I laugh, And eat well, And grow strong.* Langston Hughes was a courageous voice of his time, and his authentic call for equality still rings true today. Beautiful paintings from Barack Obama illustrator Bryan Collier accompany and reinvent the celebrated lines of the poem "I, Too," creating a breathtaking reminder to all Americans that we are united despite our differences. This picture book of Langston Hughes's celebrated poem, "I, Too, Am America," is also a Common Core Text Exemplar for Poetry.

SECOND FOUNDATION One man understood the shifting patterns of the inhabited cosmos. This was Hari Seldon, the last great scientist of the First Empire. The mathematics of psychohistory enabled Seldon to predict the collapse of the Empire and the onset of civilisation in the shortest possible time, Seldon set up two Foundations. The First was established on Terminus in the full daylight of publicity. But the Second, 'at the other end of the galaxy', took shape behind a veil of total silence. Because the Second Foundation guards the laws of psychohistory, which are valid only so long as they remain secret. When the First Foundation was conquered by a force Seldon had not foreseen - the overwhelming power of a single individual, a mutant called the Mule - the Second Foundation was forced to reveal its existence and, infinitely worse, a portion of its power. But so far its location, its most closely guarded secret of all, has been kept hidden. So far. The Mule and the remnants of the First Foundation will do anything to discover it. This is the story of the Second Foundation. "One of the most staggering achievements in modern SF" THE TIMES

The monumental story of a Galactic Empire in decline and a secret society of scientists who seek to shorten the coming Dark Age with tools of Psychohistory, Foundation pioneered many themes of modern science fiction. Now, with the approval of the Asimov estate, three of today's most acclaimed authors have completed the epic the Grand Master left unfinished. The Second Foundation Trilogy begins with Gregory

Greg Bear's Foundation and Chaos relates the epic tale of Seldon's downfall and the first stirrings of robotic rebellion. Now, in David Brin's Foundation's Triumph, Seldon is about to escape exile and risk everything for one final quest - a search for knowledge and the power it bestows. The outcome of this final journey may secure humankind's future - or witness its final downfall...

Pandora's Star is the first part of Peter F. Hamilton's epic Commonwealth Saga duology – a fantastic galaxy-spanning novel from the master of space opera. For fans of Iain M. Banks and Alastair Reynolds. At the edge of the galaxy something awakens – and it's coming for us . . . Earth AD 2329: Humanity has colonized over four hundred planets, all interlinked by wormholes. For the first time in mankind's history there is peace. Then a star over a thousand light years away suddenly vanishes, imprisoned inside a force field of immense size. Yet who – or what – has that sort of technology? And what could this mean for us? Only a faster-than-light starship, captained by ex-NASA astronaut Wilson Kime, can reach that distance to investigate. For Wilson, getting inside the force field could be easy. It may be harder to stop something else from getting out. What if there was a very good reason to seal off an entire star system? The Commonwealth Saga duology concludes with Judas Unchained. “Hard to put down. From the compelling opening sentence to the last, *The Horns of Ruin* is much like its protagonist: powerful, relentless and impossible to ignore.”—Miami Herald When humanity ascended, there were three gods. Three became two. Then two became one... Eva Forge is the last of her kind—a Paladin of the dead god Morgan, whose might is slowly waning. Trained for a life of combat in the city of Ash, she remains ever wary of the scions of the other gods, who have their own beliefs and agendas. So when Eva accompanies her lifelong mentor to retrieve a strange young girl of a rival faith, she is both curious and suspicious. And above all, she is ready for a fight. But nothing could have prepared her for an ambush by armored, machine-driven corpses. When the smoke clears both her mentor and the girl are gone—taken captive or worse. Though ordered to stand down and let the authorities handle the investigation, Eva cannot let such a disgrace go unpunished by the power of Morgan. Soon, her initial desire for bloody vengeance becomes a quest for answers. Because the more Eva learns in her search for the truth, the less she realizes she truly knows about her city, her destiny, and the gods themselves. And what Eva uncovers will either transform the world or leave it in ruins... Tim Akers, author of the acclaimed *Burn Cycle* series, introduces readers to a mystical world where men can become gods, and gods can become murderers... “A complex steampunk world.”— Publishers Weekly “A solidly created world, populated with magic, action and adventure...we haven’t come across such a refreshing take on multiple sci-fi and fantasy forms in a while.”—Sci Fi Now “Establishes itself as a unique fantasy adventure in a world all it’ own...should be at the top of your list.”—Examiner.com

Now, with the permission -- and blessing -- of the Asimov estate, the epic saga continues. As the story opens, Hari is about to leave his quiet professorship and take on the all but impossible task of administering 25 million inhabited worlds from the all-steel planet of Trantor. With the help of his beautiful bio-engineered "wife" Dors and his alien companion Yugo, Seldon is still developing the science that will transform history, never dreaming that it will ultimately pit him against future history's most awesome threat.
