In *The Long Southern Strategy*, Angie Maxwell and Todd Shields trace the consequences of the GOP's decision to court white voters in the South. Over time, Republicans adopted racially coded, anti-feminist, and evangelical Christian rhetoric and policies, making its platform more southern and more partisan, and the remodel paid off. This strategy has helped the party reach new voters and secure electoral victories, up to and including the 2016 election. Now, in any Republican primary, the most southern-presenting candidate wins, regardless of whether that identity is real or performed. Using an original and wide-ranging data set of voter opinions, Maxwell and Shields examine what southerners believe and show how Republicans such as Donald Trump stoke support in the South and among southern-identified voters across the nation.

The Innovation Revolution in Agriculture Schwartz & Wade
This open access book is an important reframing of the role of

innovation in agriculture. Dr. Campos and his distinguished coauthors address the need for agriculture to feed a growing global population with a reduced environmental footprint while adapting to and mitigating the effects of changing climate. The authors expand the customary discussion of innovation in terms of supply driven R&D to focus on the returns to investors and most importantly, the value to end-users. This is brought to life by exploring effective business models and many cases from agricultural systems across the globe. The focus on converting the results of innovation in R&D into adoption by farmers and other end-users is its greatest contribution. Many lessons from the book can be applied to private and public sectors across an array of agricultural systems. This book will be of enormous value to agri-business professionals, NGO leaders, agricultural and development researchers and those funding innovation and agriculture across the private and public sectors. Tony Cavalieri, Senior Program Officer, Bill & Melinda Gates Foundation Hugo Campos, Ph.D., MBA, has 20+ years of international corporate and development experience. His distinguished coauthors represent a rich collection of successful innovation practice in industry, consultancy, international development and academy, in both developed and developing countries."

The essays in this volume examine the future of public schooling in the United States and what it will mean to be a leader in public schools. It focuses on the issues most likely to have an impact on American society within the next 20 years. The essays are as follows: "Introduction" (Milli Pierce, Deborah L. Stapleton); "The Limits of Change" (Richard F. Elmore); "The Six Principles of Effective Accountability" (Douglas B. Reeves); "The Challenge of a Changing Nation" (Marcelo M. Suarez-Orozco); "Does More Choice Mean Less Equity?" (Chester E. Finn, Jr.); "Closing the

Achievement Gap" (Belinda Williams); "Using Afterschool Programs to Raise Achievement" (Gil G. Noam); and "Learning to Challenge Assumptions" (Richard Rothstein). Some essays are followed by responses by other authors. All essays are followed by suggested discussion questions. (WFA).

The essays selected here for translation derive largely from Thomasius's work on Staatskirchenrecht, or the political jurisprudence of church law. These works, originating as disputations, theses, and pamphlets, were direct interventions in the unresolved issue of the political role of religion in Brandenburg-Prussia, a state in which a Calvinist dynasty ruled over a largely Lutheran population and nobility as well as a significant Catholic minority. In mandating limited religious toleration within the German states, the provisions of the Peace of Westphalia (1648) also provided the rulers of Brandenburg-Prussia with a way of keeping the powerful Lutheran church in check by guaranteeing a degree of religious freedom to non-Lutherans and thereby detaching the state from the most powerful territorial church. Thomasius's writings on church-state relations, many of them critical of the civil claims made by Lutheran theologians, are a direct response to this state of affairs. At the same time, owing to the depth of intellectual resources at his disposal, these works constitute a major contribution to the broader discussion of the relation between the religious and political spheres.

The Letters of Alcuin Heinemann Educational Books

This book is concerned with the strivings, satisfactions, hopes, and heartaches that pervade the teacher's life and work. It is based in part on a study of more than 1000 teachers and students of education. "Professor Jersild writes with disarming lucidity about many abstruse conceptions. He has the courage to discuss forthrightly important topics that are generally skirted in discussions about education. I believe that When Teachers Face Themselves will help any but the most recalcitrant reader to face himself more realistically." —From the Foreword by Stephen M. Corey, Director, Horace Mann-Lincoln Institute of School Experimentation

In today's healthcare environment of scarce resources and challenges related to safety and quality, nurses must make decision after decision to ensure timely, accurate, and efficient provision of care. Solid decision-making, or lack thereof, can significantly affect patient care and outcomes. Clinical reasoning – how a nurse processes information and chooses what action to

take – is a skill vital to nursing practice and split-second decisions. And yet, developing the clinical reasoning to make good decisions takes time, education, experience, patience, and reflection. Along the way, nurses can benefit from a successful, practical model that demystifies and advances clinical reasoning skills. In *The Essentials of Clinical Reasoning for Nurses*, authors RuthAnne Kuiper, Sandra O'Donnell, Daniel Pesut, and Stephanie Turrise provide a model that supports learning and teaching clinical reasoning, development of reflective and complex thinking, clinical supervision, and care planning through scenarios, diagnostic cues, case webs, and more.

This book examines major issues in theory and research related to leader succession. It looks at the persistent problems confronted by people assigned to lead established social and professional groups like those found in schools. The author demonstrates how interaction between new leaders and established school organizations shape succession events (with illustrations drawn from educational administration) and provides

a framework for understanding succession as a dynamic and interactive process.

"The mine where Floyd, Paul, and Jack work is old, nearly picked clean and about to be closed, when part of it collapses, trapping them. The women left above race to the foreman, only to receive the company line: Go home and pray. We'll handle it. Though the men are seen as "no-counts" in a class-conscious South, to Addie, May, and Ruth they are beloved fathers, husbands, and brothers. Those above and below are left to whistle in the dark, desperate for a miracle -- but the mine holds a terrible secret that will change their lives forever."--Publisher's website.

Corynebacterium glutamicum was discovered in Japan in 1956 as a natural glutamate producer. Its "microbial factory" qualities, such as its physiological plasticity and robust catalytic functionalities, have since facilitated the development of efficient production processes for amino acids, nucleotides and vitamins. This monograph illustrates how the information gleaned from complete genome sequencing allows the rational engineering of the entire cellular metabolism and how systems biology permits the further optimization of *C. glutamicum* as a biocatalyst.

 "A remarkably nuanced, empathetic, and well-crafted work of journalism, [The Inevitable] explores what might be called the right-to-die underground, a world of people who wonder why a medical system that can do so much to try to extend their lives can do so little to help them end those lives in a peaceful and painless way."—Brooke Jarvis, *The New Yorker* More states and countries are passing right-to-die laws that allow the sick and suffering to end their lives at pre-planned moments, with the help of physicians. But even where these laws exist, they leave many people behind. The Inevitable moves beyond margins of the law to the people who are meticulously planning their final hours—far from medical offices, legislative chambers, hospital ethics committees, and polite conversation. It also shines a light on the people who help them: loved ones and, sometimes, clandestine groups on the Internet that together form the "euthanasia underground." Katie Engelhart, a veteran journalist, focuses on six people representing different aspects of the right to die debate. Two are doctors: a California physician who runs a boutique assisted death clinic and has written more lethal prescriptions than anyone else in the U.S.; an Australian named Philip Nitschke who lost his medical license for teaching people how to end their lives painlessly and peacefully at "DIY Death" workshops. The other four chapters belong to people who said they wanted to die because they were suffering unbearably—of old age, chronic illness, dementia, and mental anguish—and saw suicide as their only option. Spanning North America, Europe, and Australia, *The Inevitable* offers a deeply reported and fearless look at a morally tangled subject. It introduces readers to ordinary people who are fighting to find dignity and authenticity in the final hours of their lives.
