"A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times Years ago, when House of Leaves was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.

Isaiah of Jerusalem in the Authorized English Version Pantheon

"English is so illogical!" It is generally believed that English is a language of exceptions. For many, learning to spell and read is frustrating. For some, it is impossible... especially for the 29% of Americans who are functionally illiterate. But what if the problem is not the language itself, but the rules we were taught? What if we could see the complexity of English as a powerful tool rather than a hindrance? --Denise Eide Uncovering the Logic of English challenges the notion that English is illogical by systematically explaining English spelling and answering questions like "Why is there a silent final E in have, large, and house?" and "Why is discussion spelled with -sion rather than -tion?" With easy-to-read examples and anecdotes, this book describes: - the phonograms and spelling rules which explain 98% of English words - how English words are formed and how this knowledge can revolutionize vocabulary development - how understanding the reasons behind English spelling prevents students from needing to guess The author's inspiring commentary makes a compelling case that understanding the logic of English could transform literacy education and help solve America's literacy crisis. Thorough and filled with the latest linguistic and reading research, Uncovering the Logic of English demonstrates why this systematic approach should be as foundational to our education as 1+1=2.

Revised and updated, this compelling collection of essays, interviews, and course syllabi is the ideal tool to help teachers and students keep up in the rapidly changing field of graphic design. Top

designers and educators talk theory, offer proposals, discuss a wide range of educational concerns—such as theory versus practice, art versus commerce, and classicism versus postmodernism—and consider topics such as emerging markets, shifts in conventions, global impact, and social innovation. Building on the foundation of the original book, the new essays address how graphic design has changed into an information-presenting, data-visualization, and storytelling field rooted in art and technology. The forward-thinking course syllabi are designed for the increasingly specialized needs of undergraduate and graduate students. Personal anecdotes from these designers about their own educations, their mentors, and their students make this an entertaining and illuminating idea book. The book features writing from: Lama Ajeenah, Roy R. Behrens, Andrew Blauvelt, Max Bruinsma, Chuck Byrne, Moira Cullen, Paula J. Curran, Louis Danziger, Liz Danzico, Meredith Davis, Sheila de Bretteville, Carla Diana, Johanna Drucker, Milton Glaser, Rob Giampietro, April Greiman, Sagi Haviv, Lorraine Justice, Jeffery Keedy, Julie Lasky, Warren Lehrer, Ellen Lupton, Victor Margolin, Andrea Marks, Katherine McCoy, Ellen McMahon, J. In English Decoration, architectural and interior designer Ben Pentreath presents a major new survey of the best of the English style. Eighteen homes, many of which have never been previously photographed, provide the source material for his wide-ranging investigation of this classic look. The houses include Ben's own homes in London and West Dorset, alongside those of Earls and artists, writers and architects, book designers and gardeners. The book opens with an essay on the English style in decoration, and then entrance halls, living rooms, kitchens and dining rooms and bedrooms and bathrooms are considered in turn, together with simple Rooms of Utility and spectacular Rooms of Display. There is also a foreword by Nicky Haslam, suggestions for further reading, and a style directory that reveals Ben's own favorite sources—helping you to achieve the classic English look, wherever you live.

Structuring Sense explores the difference between words however defined and structures however constructed. It sets out to demonstrate over three volumes that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure, from memory of words to manipulation of rules. Its reformulation of how grammar and lexicon interact has profound implications for linguistic, philosophical, and psychological theories about human mind and language. Hagit Borer departs from language specific constructional approaches and from lexicalist approaches to argue that universal hierarchical structures determine interpretation, and that language variation emerges from the morphological and phonological properties of inflectional material. Taking Form, the third and final volume of Structuring Sense, applies this radical approach to the construction of complex words. Integrating research in syntax and morphology, the author develops a new model of word formation, arguing that on the one hand the basic building blocks of

language are rigid semantic and syntactic functions, while on the other hand they are roots, which in themselves are but packets of phonological information, and are devoid of both meaning and grammatical properties of any kind. Within such a model, syntactic category, syntactic selection and argument structure are all mediated through syntactic structures projected from rigid functions, or alternatively, constructed through general combinatorial principles of syntax, such as Chomsky's Merge. The meaning of 'words', in turn, does not involve the existence of lexemes, but rather the matching of a well-defined and phonologically articulated syntactic domain with conceptual Content, itself outside the domain of language as such. In a departure from most current models of syntax but in line with many philosophical traditions, then, the Exo-Skeletal model partitions 'meaning' into formal functions, on the one hand, and Content, on the other hand. While the former are read off syntactico-semantic structures as is usually assumed, Content is crucially read off syntactico-phonological structures.

An Old English Home and Its Dependencies by S. Baring-Gould is a quaint and cozy tale about an old lady who lives in a house that is falling apart. This novel is an affectionate look at the variety of homes in England, squatters, and other owners of dilapidated homes. Excerpt: "When we reached that part of the road to Nymet Rowland where their field touched, we stopped, and in a moment some very angry, excited women and children rushed out. I bade them be quiet and hear what I had to say and then told them that Lord ---- had asked me to bring these comforts to the sick man and that I was come to offer him my services in his illness. They were instantly pacified and pleased, and begged me to come to what they called the farm—a place with half a roof and three walls."

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons for how we live our lives,

select our leaders, run our companies, and think about our world.
