In this casebook, Jarvis, Goodwin, and Henslee provide a comprehensive introduction to the field of travel law. Combining leading cases and scholarly writings with numerous explanatory notes and thought-provoking questions, each chapter examines a different substantive topic: travel agents, common carriers (airlines, cruise ships, buses and trains), hotels, and attractions. The growing number of legal cases related to travel in the last decade indicates that this book will be of increased importance to attorneys interested in legal cases related to the travel, tourism, and hospitality industries. A teacher's manual is available. "[A] very well-written, dynamic, and entertaining tour of each of the major components of the travel marketing and delivery system. It provides much needed definition and structure to the teaching of Travel Law and should inspire U.S. law schools to offer Travel Law courses to their students. I only wish that I could have taken a course in Travel Law when I attended law school and that this extraordinary casebook had been available." -- International

Calories—too few or too many—are the source of health problems affecting billions of people in today's globalized world. Although calories are essential to human health and survival, they cannot be seen, smelled, or tasted. They are also hard to understand. In *Why Calories Count*, Marion Nestle and Malden Nesheim explain in clear and accessible language what calories are and how they work, both biologically and politically. As they take readers through the issues that are fundamental to our understanding of diet and food, weight gain, loss, and obesity, Nestle and Nesheim sort through a great deal of the misinformation put forth by food manufacturers and diet program promoters. They elucidate the political stakes and show how federal and corporate policies have come together to create an "eat more" environment. Finally, having armed readers with the necessary information to interpret food labels, evaluate diet claims, and understand evidence as presented in

popular media, the authors offer some candid advice: Get organized. Eat less. Eat better. Move more. Get political. *Welcome to the United States* Skyhorse
If your business isn't growing then it's dying. To attract agents to your real estate team or brokerage, you must evidence your ability to increase their productivity and help them sell more real estate. In his most important work to date, veteran coach and real estate consultant, Brian Icenhower, shares the systems and strategies he used to build some of the fastest growing real estate companies in the United States. Recruiting is the single most valuable skillset in real estate and the linchpin of all successful real estate businesses. To exponentially and sustainably increase the net profit of your real estate business, it is essential that you operate a committed and systematic recruitment practice. From sourcing recruits and recruiting with technology to setting, conducting, and closing recruiting appointments, this exhaustive book provides invaluable insights and practical instruction for

creating a production-centric growth environment that attracts agents to your real estate team or brokerage. With our consultative approach, recruits guide agents to a place where they self-discover that the best way to sell more real estate, become more successful, and increase their net income is by joining your team or company.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new

government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

requires that most packaged foods carry a standardized label-the Nutrition Facts panel-that provides nutrition information intended to help consumers make healthful choices. In recent years, manufacturers have begun to include additional nutrition messages on their food packages. These messages are commonly referred to as 'front-of-package' (FOP) labeling. As FOP labeling has multiplied, it has become easy for consumers to be confused about critical nutrition information. In considering how FOP labeling should be used as a nutrition education tool in the future, Congress directed the Centers for Disease Control and Prevention to undertake a two-phase study with the IOM on FOP nutrition rating systems and nutrition-related symbols. The Food and Drug Administration is also a sponsor. In Phase 1 of its study, the IOM reviewed current systems and examined the strength and limitations of the nutrition criteria that underlie them. The IOM concludes that it would be useful for FOP labeling to display calorie information and serving sizes in

familiar household measures. In addition, as FOP systems may have the greatest benefit if the nutrients displayed are limited to those most closely related to prominent health conditions, FOP labeling should provide information on saturated fats, trans fats, and sodium.
