Starting from the principal-agent perspective, this book offers a new analysis of government. It interprets political institutions as devices designed to solve the omnipresent principal-agent game in politics. In other words how to select, instruct, monitor and evaluate political agents or elites so that they deliver in accordance with the needs and preferences of their principal: the population. This book explores whether there are any evolutionary mechanisms in politics which guide mankind towards the rule of law regime, domestically and globally. It combines a cross-sectional approach with a longitudinal one. Comparing the extent of the rule of law among states, using a set of data from 150 countries concerning political and social variables, the author seeks to understand why there is such a marked difference among states. Taking a state-centred perspective and looking at countries with a population larger than one million people during the post Second World War period, the book examines: The stability and performance of states The conditions for the rule of law regime: economic, social, cultural and institutional ones The evolution of governments towards rule of law *Comparative Politics - The Principle-Agent Perspective* will be of interest to students and scholars of comparative politics, government, political theory and law.

*Comparative Politics: A Global Introduction* shows new students of world politics how the methods and concepts of comparative politics can lead them to ask critical questions to better understand the complex world around them. The majority of undergraduates in introductory comparative politics courses do not plan to pursue graduate education in political science nor embark upon careers as political scientists. Most hope to take part in public and perhaps international affairs as elected officials, civil servants, or engaged citizens. As such they will need to make countless decisions about public policy, including foreign policy, throughout their careers. *Comparative Politics: A Global Introduction* equips students to make better, more informed decisions. Central to that task are three important goals: (1) to introduce readers to the conceptual foundations of comparative politics, (2) to enhance their analytical and critical-thinking skills through an introduction to basic empirical techniques of political and social science, and (3) to promote their understanding of a wide range of countries and political leaders.

Serving as touchstones, the cases are set in chapters where they make the most sense topically—not separated from theory or in a separate volume—and vividly illustrate issues in cross-national context. In this edition, a brand new chapter on Contentious Politics covers ethnic fragmentation, social movements, civil war, revolutions, and political violence. New case studies on this topic include the Occupy and Tea Party movements in the US; Zapatista rebellion in Mexico; Boko Haram in Nigeria; and revolutions in China and Iran. The chapter on States and Identity has been substantially revised to better introduce students to the concept of identity and how countries handle identity-based demands. Case studies include nationalism in Germany; ethnicity in Nigeria; religion in India; race in the US; gender in Iran; and sexual orientation in Brazil. Content on states and markets, political economy, globalization, and development has all been consolidated into a new Part III of the book, focusing in a sustained way on economic issues.

*Introducing Comparative Politics* Praeger

It's tough to keep students afloat in a sea of detail when moving from country to country in a comparative course. While it's important to give students a sense of place, lengthy textbooks can overwhelm them with far too much description. Students are left with no clear path for understanding regional context or for making meaningful cross-national comparisons, and little sense of larger concepts and themes. *The Politics of Governing: A Comparative Introduction* answers this dilemma in a truly brief text—only 320 pages long—that frames country case studies within regional chapters. This approach equips students to see the bigger picture and understand how the issues of governing can no longer be separated from events outside a country's borders. The authors answer the same set of questions in each chapter—What are the purposes of government (the ends of politics)? What do governments do (the functions of politics)? Who exercises political power (the processes of politics)?—giving this concise text strong analysis of particular countries within a

powerful regional framework. The book incorporates the American experience as a familiar touch point for students and examines those areas of the world in which the U.S. is most engaged: The European chapters highlight the development of supranational institutions and their impact on politics in Great Britain, France, and Germany. These stand in contrast to the transitional politics underway to the east with Central Europe's new democracies and the upheavals in Russia, the Ukraine, and the Balkan states keeping those countries at the margins of this new Europe. The diversity of Asian governments is explored within the context of competing forces between markets and democracy, at the core of which stands mainland China. The forces of religion and culture across the Muslim world shape the chapter that encompasses North Africa, the Middle East, and Southeast Asia, with country case studies focused on Morocco, Iran, and Indonesia. The chapter on Latin America highlights the draw of North American markets and the appeal of distinctive political and economic patterns in South America, with case studies on Mexico and Brazil. A final chapter on regional convergence examines both developing countries and competing supranational markets to understand how people in countries caught in between larger, competing regional trading blocs are affected.
