Intuition of the Instant Spring Publications

Air and Dreams: An Essay on the Imagination of Movement - by Gaston Bachelard Trans. Edith and Frederick Farrell. Bachelard uses his extensive knowledge of the poetry of Poe, Blake, Shelley, and Nietzsche to amplify the images of the airy elements. THE BACHELARD TRANSLATIONS are the inspiration of Joanne H. Stroud, Director of Publications for The Dallas Institute of Humanities and Culture, who in 1981 contracted with Jose Corti to publish in English the untranslated works of Bachelard on the imagination. Gaston Bachelard is acclaimed as one of the most significant modern French thinkers. From 1929 to 1962 he authored twenty-three books addressing his dual concerns, the philosophy of science and the analysis of the imagination of matter. The influence of his thought can be felt in all disciplines of the humanities - art, architecture, literature, language, poetics, philosophy, and depth psychology. His teaching career included

posts at the College de Bar-sur-Aube, the University of Dijon, and from 1940 to 1962 the chair of history and philosophy of science at the Sorbonne. One of the amphitheatres of the Sorbonne is called "L'Amphi Gaston Bachelard," an honor Bachelard shared with Descartes and Richelieu. He received the Grand Prix National Lettres in 1961-one of only three philosophers ever to have achieved this honor. The influence of his thought can be felt in all disciplines of the humanities-art, architecture, literature, poetics, psychology, philosophy, and language."

**The Dialectic of Duration** Rowman & Littlefield

Selected, translated, and introduced by Colette Gaudin. Gaston Bachelard was considered one of the great minds of our times. His prodigious ability, displayed in twenty-three books and expressed in subtle, suggestive prose, has produced the single most important body of thought in the recovery of imagination in the twentieth century. These passages from his major works, their thematic organization, the authoritative prefaces by Colette Gaudin which place his work in the stream of current ideas, as well as the Bibliography of writings by and on Bachelard, together

provide a concise introduction and brilliantly capture Bachelard's genius. --Spring Publications.

**Brightfellow** Penguin

In *The Dialectic of Duration* Gaston Bachelard addresses the nature of time in response to the writings of his great contemporary, Henri Bergson. For Bachelard, experienced time is irreducibly fractured and interrupted, as indeed are material events. At stake is an entire conception of the physical world, an entire approach to the philosophy of science. It was in this work that Bachelard first marshalled all the components of his visionary philosophy of science, with its steady insistence on the human context and subtle encompassing of the irrational within the rational.

Young Children's Existential Encounters Northwestern University Press

A rich intellectual encounter, revolving around the hands of the experimenter and those of the artist, highlighting the relation between the sciences and the arts. This book is the first to explore in detail the encounter between Albert Flocon and Gaston Bachelard in postwar Paris. Bachelard was a philosopher and historian of science who was also involved in literary studies and poetics. Flocon was a student of the Bauhaus in Dessau, Germany, who specialized in copper engraving. Both deeply ingrained in the surrealist avant-garde movements, each acted at the frontiers of their respective métiers in exploring uncharted territory. Bachelard experienced the sciences of his time as constantly undergoing radical changes, and he wanted to create a historical epistemology that would live up to this experience. He saw the elementary gesture of the copper engraver—the hand

of the engraver—as meeting the challenge of resistant and resilient matter in an exemplary fashion. Flocon was fascinated by Bachelard's unconventional approach to the sciences and his poetics. Together, their relationship interrogated and celebrated the interplay of hand and matter as it occurs in poetic writing, in the art of engraving, and in scientific experimentation. In the form of a double biography, Hans-Jörg Rheinberger succeeds in writing a lucid intellectual history and at the same time presents a fascinating illustrated reading of Flocon's copper engravings. Hans-Jörg Rheinberger is Director Emeritus at the Max Planck Institute for the History of Science, Germany. Kate Sturge is a translator and editor based in Berlin, Germany, and Visiting Senior Lecturer in Translation Studies at Aston University, United Kingdom.

**The Poetics of Space** Grossman Publishers

Offering a major challenge to established textbooks and pointing to inspiring new ways of approaching sociology, this book presents a notable shift in introductory sociology. Too often the subject is taught as a dry and detached system of thought and practice. Passion is regarded as something to avoid or to treat with inherent suspicion. By asking questions about sociology and its relation to passion, the authors seek to revitalize the subject. The book introduces and develops a number of themes such as: identity, knowledge, magic, desire, power and everyday life. It argues that students should analyze these themes through practices including: reading, writing, speaking, storytelling and organizing. The authors aim to introduce students to sociology by a controlled engagement with practical sociological ideas and ways of seeing. In this way they hope that readers will participate

in the creative possibilities of sociology.

**On Poetic Imagination and Reverie** Coffee House Press  
Fans of the style of William Faulkner will want to read Henri Bosco, four-time nominee for the Nobel Prize in Literature. Available in English for the first time, *Malicroix* tells the story of a recluse living in the French countryside, unraveling how he came to a life of solitude. Henri Bosco, like his contemporary Jean Giono, is one of the regional masters of modern French literature, a writer who dwells above all on the grandeur, beauty, and ferocious unpredictability of the natural world. *Malicroix*, set in the early nineteenth century, is widely considered to be Bosco's greatest book. Here he invests a classic coming-of-age story with a wild, mythic glamour. A nice young man, of stolidly unimaginative, good bourgeois stock, is surprised to inherit a house on an island in the Rhône, in the famously desolate and untamed region of the Camargue. The terms of his great-uncle's will are even more surprising: the young man must take up solitary residence in the house for a full three months before he will be permitted to take possession of it. With only a taciturn shepherd and his dog for occasional company, he finds himself surrounded by the huge and turbulent river (always threatening to flood the island and surrounding countryside) and the wind, battering at his all-too-fragile house, shrieking from on high. And there is another condition of the will, a challenging task he must perform, even as others scheme to make his house their own. Only under threat can the young man come to terms with both his strange inheritance and himself.

**Architecture's Historical Turn** New York Review of Books  
The famous French scientist-psychologist-literary critic provides a

virtual bestiary for depth psychology and literary criticism in his study of Isidore Ducasse, known by the pen-name Lautreamont. Includes essays by James Hillman "Bachelard's Lautreamont, or Psychoanalysis without a Patient," and Robert Scott Dupree, "Bachelard as Literary Critic." Bachelard's only book devoted to a single author/poet. 152 pages, indexed. THE BACHELARD TRANSLATIONS are the inspiration of Joanne H. Stroud, Director of Publications for The Dallas Institute of Humanities and Culture, who in 1981 contracted with Jose Corti to publish in English the untranslated works of Bachelard on the imagination. Gaston Bachelard is acclaimed as one of the most significant modern French thinkers. From 1929 to 1962 he authored twenty-three books addressing his dual concerns, the philosophy of science and the analysis of the imagination of matter. The influence of his thought can be felt in all disciplines of the humanities - art, architecture, literature, language, poetics, philosophy, and depth psychology. The influence of his thought can be felt in all disciplines of the humanities-art, architecture, literature, poetics, psychology, philosophy, and language."

My Little Paris State University of New York Press

In this, his last significant work, an admired French philosopher provides extraordinary meditations on the relations between the

imagining consciousness and the world, positing the notion of reverie as its most dynamic point of reference. In his earlier book, *The Poetics of Space*, Bachelard considered several kinds of "praiseworthy space" conducive to the flow of poetic imagery. In *Poetics of Reverie* he considers the absolute origins of that imagery: language, sexuality, childhood, the Cartesian ego, and the universe. Approaching the psychology of wonder from the phenomenological viewpoint, Bachelard demonstrates the auragative potential of all that awareness. Thus he distinguishes what is merely a phenomenon of relaxation from the kind of reverie which "poetry puts on the right track, the track of expanding consciousness"

#### **Fragments of a Poetics of Fire** Springer

A sweeping history of premodern architecture told through the material of stone. Spanning almost five millennia, *Painting in Stone* tells a new history of premodern architecture through the material of precious stone. Lavishly illustrated examples include the synthetic gems used to simulate Sumerian and Egyptian heavens; the marble temples and mansions of Greece and Rome; the painted palaces and polychrome marble chapels of early modern Italy; and the multimedia revival in 19th-century England. Poetry, the lens for understanding costly marbles as an artistic medium, summoned a spectrum of imaginative associations and responses, from princes and patriarchs to the populace. Three salient themes sustained this "lithic imagination": marbles as images of their own elemental substance according to premodern concepts of matter and geology; the perceived indwelling of astral light in earthly stones; and the enduring belief that colored marbles exhibited a form of

natural—or divine—painting, thanks to their vivacious veining, rainbow palette, and chance images.

#### Painting in Stone Cambridge University Press

*Rhythmanalysis* displays all the characteristics which made Lefebvre one of the most important Marxist thinkers of the twentieth century. In the analysis of rhythms -- both biological and social -- Lefebvre shows the interrelation of space and time in the understanding of everyday life. With dazzling skills, Lefebvre moves between discussions of music, the commodity, measurement, the media and the city. In doing so he shows how a non-linear conception of time and history balanced his famous rethinking of the question of space. This volume also includes his earlier essays on "The Rhythmanalysis Project" and "Attempt at the Rhythmanalysis of Mediterranean Towns."

#### *Thinking with Water* McGill-Queen's Press - MQUP

Praise for Rikki Ducornet: "A novelist whose vocabulary sweats with a kind of lyrical heat." —New York Times  
 "Ducornet—surrealist, absurdist, pure anarchist at times—is one of our most accomplished writers, adept at seizing on the perfect details and writing with emotion and cool detachment simultaneously. I love her style because it is penetrating and

precise but also sensual without being overwrought. You experience a Ducornet novel with all of your senses.” —Jeff VanderMeer “Linguistically explosive. . . . One of the most interesting American writers around.” —The Nation “Ducornet celebrates the playful and rebellious nature of art, and the anarchic ability of the imagination to subvert physical limitations.” —Times Literary Supplement A feral boy comes of age on a campus decadent with starched sheets, sweating cocktails, and homemade jams. Stub is the cause of that missing sweater, the pie that disappeared off the cooling rack. Then Stub meets Billy, who takes him in, and Asthma, who enchants him, and all is found, then lost. A fragrant, voluptuous novel of imposture, misplaced affection, and emotional deformity. An artist and writer, Rikki Ducornet has illustrated books by Robert Coover, Jorge Luis Borges, Forrest Gander, and Joanna Howard. Her paintings have been exhibited widely, including, most recently, at the Pierre Menard Gallery in Cambridge, Massachusetts, and the Salvador Allende Museum in Santiago, Chile.

**Lautréamont** Beacon Press

This book presents a psychoanalysis of technoscience. Basic concepts and methods developed by Freud, Jung, Bachelard and Lacan are applied to case histories (palaeoanthropology, classical conditioning, virology). Rather than by disinterested curiosity, technoscience is driven by desire, resistance and the will to control. Moreover, psychoanalysis focusses on primal scenes (Dubois' quest for the missing link, Pavlov's discovery of the conditioned reflex) and opts for triangulation: comparing technoscience to "different scenes" provided by novels, so that

Dubois's work is compared to missing link novels by Verne and London and Pavlov's experiments with Skinner's Walden Two, while virology is studied through the lens of viral fiction.

*Malicroix* Dallas : Dallas Institute Publications, Dallas Institute of Humanities and Culture

This research explores new approaches to composition and performance with interactive audiovisual systems which draw on the ideas of Gaston Bachelard. The composition *Blue Space* for oboe and interactive audiovisual system is a central component of this thesis. This practice-based research project explores music composition and performance incorporating sound, visuals and gesture. Written from the perspective of a composer-performer, it examines ways in which sound and image can be connected in a musical context. Although this work is highly individual, it is contextualised within the existing knowledge and practices of audiovisual music.

**The Experience of Human Communication** Dallas Inst Humanities & Culture

A beloved multidisciplinary treatise comes to Penguin Classics Since its initial publication in 1958, *The Poetics of Space* has been a muse to philosophers, architects, writers, psychologists, critics, and readers alike. The rare work of irresistibly inviting philosophy, Bachelard's seminal work brims with quiet revelations and stirring, mysterious imagery. This lyrical journey takes as its premise the emergence of the poetic image and finds an ideal metaphor in the intimate spaces of our homes. Guiding us through a stream of meditations on poetry, art, and the blooming of consciousness itself, Bachelard examines the domestic places that shape and hold our dreams and memories. Houses and

rooms; cellars and attics; drawers, chests, and wardrobes; nests and shells; nooks and corners: No space is too vast or too small to be filled by our thoughts and our reveries. In Bachelard's enchanting spaces, "We are never real historians, but always near poets, and our emotion is perhaps nothing but an expression of a poetry that was lost." This new edition features a foreword by Mark Z. Danielewski, whose bestselling novel *House of Leaves* drew inspiration from Bachelard's writings, and an introduction by internationally renowned philosopher Richard Kearney who explains the book's enduring importance and its role within Bachelard's remarkable career. For more than sixty-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,500 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Water and Dreams Spring Publications

Emphasizing the role that vivid personalities – including engineers John Laing Weller and Alex Grant as well as contractors and labourers – played in the construction of the canal, Roberta Styran and Robert Taylor use archival sources, government documents, newspapers, maps, and original plans to describe a saga of technological, financial, geographical, and social obstacles met and overcome in an accomplishment akin to the building of the Canadian Pacific Railway. A story of Canadian skill, courage, vision, and hardship, *This Colossal Project* details the

twenty-year excavation of the giant channel and the creation of huge concrete locks amidst war, the Great Depression, political change, and labour unrest.

The REAL Parisian woman's guide to the city, with all her secret addresses and charming original drawings by Kanako Kuno.

Air and Dreams State University of New York Press

This book is a psychoanalytic observation of five children's existential encounters in their ordinary life at the nursery. It is among the first within psychosocial literature to go beyond adult experiences and explore the existential in young children's lives as it plays out in their everydayness in symbolic and sensory articulations and in relationship with others; including with the author as someone who arrived looking for it. The author offers analysis in the form of a writing inquiry into meaning, by means of an on-going movement between the self and the other, the interior and the exterior, and psychoanalytic and existential-phenomenological ideas. This is illustrated through a kaleidoscopic account of May, Nadia, Edward, Baba and Eilidhs' encounters with nothingness, strangeness, ontological insecurity, death and selfhood as these emerged in the time they spent with the author embodying different forms – from concrete objects to dreams – exemplifying an attunement to existential ubiquity. With its relational ground, this work suggests the potential for adults – including researchers, therapists, trainees, educators and parents – to attune to their own existential encounters as a path to understanding those of children.

Lefebvre, Love and Struggle SAGE

This book deals with matters of embodiment and meaning—in

other words, the essential components of what Continental thought, since Heidegger, has come to consider as “communication.” A critical theme of this book concerns the basic tenet that consciousness of one’s Self and one’s body is only possible through human relationship. This is, of course, the phenomenological concept of intersubjectivity. But rather than let this concept remain an abstraction by discussing it as merely a function of language and signs, this work attempts to explicate it empirically. That is, it discusses the manner in which—from infancy to childhood and adolescence (and the dawning of our sexual identities) through physical maturity and old age—we come to experience the ecstasy of what Merleau-Ponty has so poetically termed “flesh.” It is rarely clear what someone means when she or he uses the word “communication.” An important objective of this book is, thus, to advance understanding of what communication is. In academic discourse, “communication” has come to be understood in a number of contexts—some conflicting and overlapping—as a process, a strategy, an event, an ethic, a mode or instance of information, or even a technology. In virtually all of these discussions, the concept of communication is discussed as though the term’s meaning is well known to the reader. When communication is described as a process, the meaning of the term is held at an operational level—that is, in the exchange of information between one person and another, what must unambiguously be inferred is that “communication” is taking place. In this context, information exchange and

communication become functionally synonymous. But as a matter of embodied human psychological experience, there is a world of difference between them. As such, this book attempts to fully consider the question of how we experience the event of human communication. The author offers a pioneering study that advances the *raison d’être* of the emergent field of “communicology,” while at the same time offering scholars of the human sciences a new way of thinking about embodiment and relational experience.

Felicitous Space State University of New York Press

This is the first study of Renaissance architecture as an immersive, multisensory experience that combines historical analysis with the evidence of first-hand accounts. Questioning the universalizing claims of contemporary architectural phenomenologists, David Karmon emphasizes the infinite variety of meanings produced through human interactions with the built environment. His book draws upon the close study of literary and visual sources to prove that early modern audiences paid sustained attention to the multisensory experience of the buildings and cities in which they lived. Through reconstructing the Renaissance understanding of the senses, we can better gauge how constant interaction with the built environment shaped daily practices and contributed to new forms of understanding. Architecture and the Senses in the Italian Renaissance offers a stimulating new approach to the study of Renaissance architecture and urbanism as a kind of 'experiential trigger' that shaped ways of both thinking and being in the world.
