ERNESTO COLEMAN

Maths New Africa Books

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

Library of Congress Catalogs Penguin Random House South Africa Join one of South Africa's former tax sleuths Johann van Loggerenberg in a wild ride through the double-dealing world of tobacco's colourful characters and ruthless corporates. Meet the femme fatales, mavericks, mercenaries and grandmasters, and learn how the crime-busting unit led by Van Loggerenberg at SARS and its 'Project Honey Badger' became a victim of a war between industry players and a high-stakes political game driven by state capture. This is the tale of a few good men and women who dared to try to hold to account a billion-dollar international industry rife with private spy network.

Cosmonauts do it in Heaven Penguin Random House South Africa

Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by their local success, the protestors issued new and ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this

fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux "progressivism".

National Union Catalog Penguin UK

Keith Gottschalk is one of very few English language poets after Walt Whitman to compose poems celebrating engineers, inventions, and scientists. With wit and paradox, these poems explore our solar system, and celebrate astronomers and spaceflight. This collection opens with an imaginary trip through time from Copernicus to Einstein those who literally made space as we conceptualise it today. It closes with an imaginary trip through our solar system. In between, we find moving elegies to astronauts who lost their lives, and celebrations of a glittering international constellation of engineers, inventors, mathematicians, and researchers. Irony, allusions, double-entendres, and wonderment are always looking over the readers shoulder. Many of these poems, composed over thirty-four years, have already been individually published to acclaim in literary and other magazines.

History Gr12 T/g*afrikaans Penguin Random House South Africa

Educators need to empower learners to be prepared for the Fourth Industrial Revolution, to be thinkers with the ability to pioneer the future. This book cracks teaching and learning myths that led to learners being perceived as knowledge duplicators instead of being knowledge creators. Thinking tools move the

focus of learning from mastering content to critical thinking. This requires the critical thinking toolkit, which is the mothership of all thinking. It engages learners' forever-wandering minds with the learning task at hand, which is the substitute for the traditional expectations of "paying attention" and "memorising". When employing thinking tools, learners become thinking engineers—taking ownership of what they must discover, create or solve. Within this paradigm of teaching, teachers directly engage with learners' brains, which goes beyond learner-centred teaching and defining learning as visual, auditory or kinaesthetic. The book is based on examples of thinking tools sessions.

Providing plenty of practice questions for children to work through, this Maths skills book helps to build confidence and improve Maths skills at Key Stage 2. Children can use this book at home for SATS revision, and to build on topics covered in the classroom. Written by educational experts, this Maths skills book saves time with ready-to-practise questions that comprehensively cover the basics of addition, subtraction, multiplication and division for KS2 Maths. Packed with engaging pictures and clear practice questions, this handy study guide gives a strong foundation in Maths for Key Stage 2. Content includes: lots of practice in number (addition, number families, subtraction, place value, 2-6 times tables), money (coin values, shopping with 10p, 15p, 20p and change from 5p, 10, 15p) as well as time (o'clock, 1/2 past, 1/4 past and 1/4 to, calendar) length (cm) mass (1 kg, 500 g, 250 g) and simple graphs.

Potential Development Using Thinking Tools Elsevier

Twee dinge gebeur daardie dag met my: Ek kry die vreeslike nuus, en ek kry 'n groot geskenk. Ma het my my hand gevat en dit sag aan my probeer verduidelik: "Elmar, sulke dinge gebeur maar tussen grootmense. Ek en jou pa het gedink ons het mekaar lief, maar dinge het verander." Maar toe ontdek ek die rooi vlieër ...

Subject Catalog Penguin Random House South Africa

Set in nineteenth-century rural Africa, *Fiela's Child* tells the gripping story of Fiela Komoetie and a white, three-year old child, Benjamin, whom she finds crying on her doorstep. For nine years Fiela raises Benjamin as one of her own children. But when census takers discover Benjamin, they send him to an illiterate white family of woodcutters who claim him as their son. What follows is Benjamin's search for his identity and the fundamental changes affecting the white and black families who claim him. "Everything a novel can be: convincing, thought-provoking, upsetting, unforgettable, and timeless."—Grace Ingoldby, *New Statesman* "*Fiela's Child* is a parade that broadens and humanizes our understanding of the conflicts still affecting South Africa today."—Francis Levy, *New York Times Book Review* "A powerful creation of time and place with dark threads of destiny and oppression and its roots in the almost Biblical soil of a storyteller's art."—Christopher Wordsworth, *The Guardian* "The characters in the novel live and breathe; and the landscape is so brightly painted that the trees, birds, elephants, and rivers of old South Africa are characters themselves. A book not to miss."—Kirkus Reviews

The Influence of English on Afrikaans University of Chicago Press

This is the ninth annual report on the situation pertaining to language rights and language matters in general in South Africa. It cultivates an awareness of language rights and promotes a culture of taking proactive measures in order to oppose violations of language rights. Such awareness could lead, on the one hand, to the further democratisation of the community, and on the other, to increasing participation in public life.
