Accelerated Learning for the 21st Century World Bank Publications
First published in 1973, this title examines the development patterns of small businesses. It considers why people found firms; the factors that contribute to entrepreneurial success; problems of management succession and inheritance; the strengths and weaknesses of family firms; the reasons why small firms are taken over; and the social, economic and managerial context of their growth, decline, and revival. Based on a survey of sixty-four firms,

each employing fewer than five hundred people, in engineering, hosiery, and knitwear, and on the records of 370 similar organisations, a striking gap in performance and management attitudes emerges as between dynamic, mostly founder-run firms and stagnant, mostly inherited ones. Where many books are either minutely specialised or highly abstract and over-generalised, Jonathan Boswell's work is practical and diagnostic, probing the inner recesses of the small firm sector. With particular relevance to the difficulties faced by entrepreneurs in today's economic environment, this title advances selective measures to deal with old firms and inheritance, and a wide range of policies to encourage new entrepreneurship.

Recent Trends in International Migration of Doctors, Nurses and Medical Students
Routledge

This book presents an overview of inter-municipal cooperation in eight European countries. Each country study sketches its attendant forms, their institutional design, the tasks and competencies attributed to joint authorities of

municipalities and the way inter-municipal cooperation operates in practice. Both performance and democratic aspects of cooperation are recurring topics.

Explanatory Report on the European Charter of Local Self-government Council of Europe

In this profound and profoundly controversial work, a landmark of 20th-century thought originally published in 1971, B. F. Skinner makes his definitive statement about humankind and society. Insisting that the problems of the world today can be solved only by dealing much more effectively with human behavior, Skinner argues that our traditional concepts of freedom and dignity must be sharply revised. They have played an important historical role in our struggle against many kinds of tyranny, he acknowledges, but they are now responsible for the futile defense of a presumed free and autonomous individual; they are perpetuating our use of punishment and blocking the development of more effective cultural practices. Basing his arguments on the massive results of the experimental analysis of behavior he pioneered, Skinner rejects traditional explanations of behavior in terms of states of mind, feelings, and other mental attributes in favor of explanations to be sought in the interaction between genetic endowment and personal history. He argues that instead of promoting freedom and

dignity as personal attributes, we should direct our attention to the physical and social environments in which people live. It is the environment rather than humankind itself that must be changed if the traditional goals of the struggle for freedom and dignity are to be reached. Beyond Freedom and Dignity urges us to reexamine the ideals we have taken for granted and to consider the possibility of a radically behaviorist approach to human problems--one that has appeared to some incompatible with those ideals, but which envisions the building of a world in which humankind can attain its greatest possible achievements.

The Yachtsman's Tidal Atlas Oxford University Press

This title, originally published in 1984, is based on a study of the work of general and production managers in companies in Britain and Germany, and gives a life-like account of the realities of management, including the problems, crises and unresolved tensions. Throughout the book the author draws comparisons between management style and performance in Britain and Germany. Designed primarily for management and business studies undergraduates, the book gives an excellent idea of what industry is really like. For students who are committed to a career in management but who lack experience of industry, this realistic and down-to-earth account will be invaluable.

Training in Organizations Canongate Books

In Central and Eastern European countries, inequalities for Roma families living in marginalized communities start early and are striking. Some of these inequalities reflect hard-wired family circumstances such as being born in poverty. Others reflect lack of opportunities such as limited access to

those basic goods and services that are necessary not only for realizing one's potential in life, but also for living with dignity. Gaps between Roma and non-Roma widen over the lifecycle in a way that reinforces and perpetuates disadvantage and translates into significantly unequal outcomes, despite the fact that Roma report having similar aspirations to those of their non-Roma neighbors. Promoting equal opportunities for disadvantaged Roma is not only an imperative for societies that want to call themselves fair, but it is also a smart economic choice, especially in those countries where populations are aging rapidly. Investing early, with a particular emphasis on supporting healthy and cognitive development for disadvantaged Roma children, is likely to go a long way in promoting fair chances. However, leveling the playing field in childhood is likely not enough: disadvantaged Roma continue being exposed to unequal opportunities at key nodes in their lives, such as when pursuing education or when looking for a job. Therefore, it is as important that a broader set of policies address some of the circumstances in which a large share of Roma children grow up, including access to employment and decent living conditions for their families. Implementing interventions that help overcome these interrelated barriers will require strong ownership at the national level, coordinated policies across different ministries and government levels, and an integrated delivery system that is grounded in approaches that are customized to local conditions and implemented in a participatory manner. Good practices in Europe and elsewhere show that inclusion of the most disadvantaged - including many Roma - is possible and the current

programming cycle for European Funds represents a unique opportunity to fund such interventions.

Beyond Freedom and Dignity McGraw-Hill/Irwin

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind, Acquire, Search, Trigger, Exhibit, and Review), and is enhanced by the latest findings on the value of emotion and memory on the process of learning. Combined with motivational stories of success applying these principles, and putting forth a clear vision of how the United States can dramatically improve the education system to remain competitive in the next century, Accelerated Learning into the 21st Century is a dynamic tool for self-improvement by individuals as diverse as schoolchildren and corporate executives.

Teaching and the Case Method

A renowned economist argues for the importance of property rights in "the most intelligent book yet written about

the current challenge of establishing capitalism in the developing world" (Economist) "The hour of capitalism's greatest triumph," writes Hernando de Soto, "is, in the eyes of four-fifths of humanity, its hour of crisis." In *The Mystery of Capital*, the world-famous Peruvian economist takes up one of the most pressing questions the world faces today: Why do some countries succeed at capitalism while others fail? In strong opposition to the popular view that success is determined by cultural differences, de Soto finds that it actually has everything to do with the legal structure of property and property rights. Every developed nation in the world at one time went through the transformation from predominantly extralegal property arrangements, such as squatting on large estates, to a formal, unified legal property system. In the West we've forgotten that creating this system is what allowed people everywhere to leverage property into wealth. This persuasive book revolutionized our understanding of capital and points the way to a major transformation of the world economy. Being Fair, Faring Better Routledge

This report describes recent trends in the international migration of doctors and nurses in OECD countries. Over the past decade, the number of doctors and nurses has increased in many OECD countries, and foreign-born and foreign-trained doctors and nurses have contributed to a significant extent. New in-depth analysis of the internationalisation of medical education

shows that in some countries (e.g. Israel, Norway, Sweden and the United States) a large and growing number of foreign-trained doctors are people born in these countries who obtained their first medical degree abroad before coming back. The report includes four case studies on the internationalisation of medical education in Europe (France, Ireland, Poland and Romania) as well as a case study on the integration of foreign-trained doctors in Canada.

Principles and Practice of Management Dell

A chronicle of recent events that have shaken the world, from the author of Capital in the Twenty-First Century "What makes this manifesto noteworthy is that it comes from . . . an economist who gained his reputation as a

researcher with vaguely left-of-center sensibilities but was far from a radical. Yet the times are such . . . that even honest moderates are driven to radical remedies.”—Robert Kuttner, *New York Times* As a correspondent for the French newspaper *Le Monde*, world-renowned economist Thomas Piketty has documented the rise and fall of Trump, the drama of Brexit, Emmanuel Macron’s ascendance to the French presidency, the unfolding of a global pandemic, and much else besides, always from the perspective of his fight for a more equitable world. This collection brings together those articles and is prefaced by an extended introductory essay, in

which Piketty argues that the time has come to support an inclusive and expansive conception of socialism as a counterweight against the hypercapitalism that defines our current economic ideology. These essays offer a first draft of history from one of the world’s leading economists and public figures, detailing the struggle against inequalities and tax evasion, in favor of a federalist Europe and a globalization more respectful of work and the environment.
