"I couldn't put it down!" -Lisa Jackson, New York Times

bestselling author Fans of Laura Griffin and Jayne Ann Krentz won't want to miss this brand new thriller series by New York Times bestselling author Rebecca Zanetti, as FBI Special Agent Laurel Snow, a rising star profiler, strives to stay one step ahead of the criminal mind—and discovers that her own demons may be the hardest to outrun... "Be prepared to stay up all night...Rebecca Zanetti takes you on a thrill-ride, pitting

characters you love against impossible odds." -Christine Feehan, New York Times bestselling author Laurel Snow wouldn't call hunting a serial killer a vacation, but with a pile of dead bodies unearthed near her Genesis Valley, WA, hometown, she'll take what she can get. Yet something about this case stirs her in unexpected ways. Like the startling connection she feels to Dr. Abigail Caine, a fiercely intelligent witness with a disturbing knack for making Laurel feel like she has something on her. Then there's Laurel's attraction to Huck Rivers, the fish and wildlife officer guiding her to the crime scene—and into the wilderness...

A former soldier and a trained sniper, Huck's thirst for blood is rivaled only by his fierce pursuit of Laurel. He's been burned by love, wounded by the government, and betrayed before, and to say he has trust issues is the ultimate understatement. Plus, he might be closer to this killer than anybody knows... Once in the heart of darkness with Huck, Laurel must negotiate her distracting desire for him, her complex rapport with Abigail—and her mission to find a serial killer among a growing list of suspects and a danger that's far too close to home. So close in fact, Laurel fears she will never find her way back to the woman she once

was... "Pitch-perfect...[a] deliciously intricate mystery. Readers will delight in this smart take on classic trope." - Publishers Weekly STARRED REVIEW "Plot twists and red herrings abound in this fast-paced novel that will keep readers turning the pages." - Library Journal "Zanetti is a master...A strong start to a new series."— Kirkus Reviews, STARRED REVIEW

The Last Mission Laurel Leaf

Drawing on anthropologist Ana Mariella Bacigalupo's fifteen years of field research, *Shamans of the Foye Tree: Gender, Power, and Healing among Chilean Mapuche* is the first study to follow shamans' gender identities and performance in a variety of ritual, social, sexual, and political contexts. To Mapuche shamans, or machi, the foye tree is of special importance, not only for its medicinal qualities but also because of its hermaphroditic flowers, which reflect the gender-shifting components of machi healing practices. Framed by the cultural constructions of gender and identity, Bacigalupo's fascinating findings span the ways in which the Chilean state stigmatizes the machi as witches and sexual deviants; how shamans use paradoxical discourses about gender to legitimize themselves as healers and, at the same time, as modern men and women; the tree's political use as a symbol of resistance to national ideologies; and other components of these rich traditions. The first comprehensive study on Mapuche shamans' gendered practices, *Shamans of the Foye Tree* offers new perspectives on this crucial intersection of spiritual, social, and political power.

Life begins for our characters on an island created especially for their occupation by the twelve Lords of the Zodiac and their King. Although continuous, the story is split up into six episodes, each one being an adventure set around two signs of the zodiac with their responding characters. I have brought in a little mythology, albeit with a generous helping of poetic licence, but feel that it works! The idea is to highlight the way two very different beings behave in various circumstances and their interaction with one another. Hopefully with each adventure, individual personality traits emerge as a chain of events unfolds. The story reaches a crescendo with the most important event of the year, when the King of the Zodiac visits the island to oversee the New Year festivities. A prologue explains how the island came about; how the Lords of the Zodiac found their ideal beings and its occupants are introduced one by one. The full thirteen representatives of the zodiac, when not 'starring' in a tale, all play supporting roles to extend their influence on the plots. I have tried to make the pairing up of the zodiac signs interesting, which in itself was a challenge. Read on and enjoy! Emma Dil

In 1583 the Italian botanist and physician Andrea Cesalpino (1524-1603) published *De Plantis Libri XVI*, made of 16 books (libri), considered to be the first treatise where botany is treated independently from medicine. In so doing, he broke with a long tradition inherited in Western science from Antiquity and perpetuated during the Middle Age through the early Renaissance. *De Plantis* lays the foundations of scientific systematics through a new focus on plant morphology and natural similarities and became a milestone in the history of

Western botany. It is a precious testimony to the evolution of botanical and physiological knowledge in the Middle Ages and the Renaissance and illustrates the role of Aristotelian philosophy in 16th-century knowledge. The volume includes an introductory essay about Cesalpino's philosophy and botany, a critical edition of the Latin text, a translation, a commentary, and indexes. It should interest scholars in Renaissance studies, historians, and philosophers of science and medicine, as well as botanists and plant scientists curious about the history of plant sciences.

The Encyclopedia of Herbs and Spices provides comprehensive coverage of the taxonomy, botany, chemistry, functional properties, medicinal uses, culinary uses and safety issues relating to over 250 species of herbs and spices. These herbs and spices constitute an important agricultural commodity; many are traded globally and are indispensable for pharmaceuticals, flavouring foods and beverages, and in the perfumery and cosmetic industries. More recently, they are increasingly being identified as having high nutraceutical potential and important value in human healthcare. This encyclopedia is an excellent resource for researchers, students, growers and manufacturers, in the fields of horticulture, agriculture, botany, crop sciences, food science and pharmacognosy.

Gary Soto writes that when he was five "what I knew best was at ground level." In this lively collection of short essays, Soto takes his reader to a ground-level perspective, resreating in vivid detail the sights, sounds, smells, and textures he knew growing up in his Fresno, California, neighborhood. The "things" of his boyhood tie it all together: his Buddha "splotched with gold," the taps of his shoes and the "engines of sparks that lived beneath my soles," his worn tennies smelling of "summer grass, asphalt, the moist sock breathing the defeat of basesall." The child's world is made up of small things--small, very important things.

That's the only way he'll have a chance of making it to the pros someday. But his street smarts haven't prepared him for the pressures of tough classes, high-stakes college ball, and the temptation to fix games for local gamblers. Everyone plays by a whole new set of rules -- including Sherry, who's determined to be a track star. Her independence attracts Lonnie, but their on-again, off-again relationship is driving him crazy. Lonnie has one year to learn how to make it as a "college man." It's his outside shot at a bright future. Does he have what it takes?

The Encyclopedia of Herbs and Spices CABI

The acclaimed historian demonstrates a link between climate change and social unrest across the globe during the mid-17th century. Revolutions, droughts, famines, invasions, wars, regicides, government collapses—the calamities of the mid-

seventeenth century were unprecedented in both frequency and severity. The effects of what historians call the "General Crisis" extended from England to Japan and from the Russian Empire to sub-Saharan Africa and the Americas. In this meticulously researched volume, historian Geoffrey Parker presents the firsthand testimony of men and women who experienced the many political, economic, and social crises that occurred between 1618 to the late 1680s. He also incorporates the scientific evidence of climate change during this period into the narrative, offering a strikingly new understanding of the General Crisis. Changes in weather patterns, especially longer winters and cooler and wetter summers, disrupted growing seasons and destroyed harvests. This in turn brought hunger, malnutrition, and disease; and as material conditions worsened, wars, rebellions, and revolutions rocked the world.

In a prose that is so beautiful it is poetry, we see the world of growing up and going somewhere through the dust and heat of Fresno's industrial side and beyond: It is a boy's coming of age in the barrio, parochial school, attending church, public summer school, and trying to fall out of love so he can join in a Little League baseball team. His is a clarity that rings constantly through the warmth and wry reality of these sometimes humorous, sometimes tragic, always human remembrances.

Survival in the wilderness--Gary Paulsen writes about it so powerfully in his novels *Hatchet* and *The River* because he's lived it. These essays recount his adventures alone and with friends, along the rivers and in the woods of northern Minnesota. There, fishing and hunting are serious business, requiring skill, secrets, and inspiration. Luck, too--not every big one gets away. This book takes readers through the seasons, from the incredible taste of a spring fish fresh from the smokehouse, to the first sight of the first deer, to the peace of the winter days spent dreaming by the stove in a fishhouse on the ice. In Paulsen's north country, every expedition is a major one, and often hilarious. Once again Gary Paulsen demonstrates why he is one of America's most beloved writers, for he shows us fishing and hunting as pleasure, as art, as companionship, and as sources of life's deepest lessons.

Bill Barich burst onto the literary scene more than twenty-five years ago with this remarkable account of racetrack life. Holed up in a cheap motel in Albany, California, only a few miles from Golden Gate Fields, he looked to the track to help him make sense of his life during a dark period of loss and challenge. With rare sensitivity, he captured the gritty world of the backstretch,

and also its poetry, as few other writers have done. *Laughing in the Hills*, which was first serialized in the *New Yorker*, has become a classic of sporting literature and a must for anyone who loves horses and the world they create. "It is a lovely, valuable book, introspective without being self-servingly so, affectionate but never saccharine in its evocation of racetrack life, witty and perceptive throughout." —Jonathan Yardley, *Sports Illustrated*
