Evaluating Environment in International Development

World Bank Publications

This volume constitutes the refereed proceedings of 11 international workshops held as part of OTM 2010 in Hersonissos, Greece in October 2010. The 68 revised full papers presented were carefully reviewed and selected from a total of 127 submissions to the workshops. The volume starts with 14 poster papers of the OTM 2010 main conferences COOPIS 2010, DOA 2010 and OSBASE 2010. Topics of the workshop papers are adaption in service-oriented architectures, ambient intelligence and reasoning, data integration approaches, modeling in ADI, web and enterprise data visualization, enterprise integration and semantics, industrial enterprise interoperability and networking,

process management in distributed information system development, improving social networking, ontology engineering, master data management and metamodeling, extensions to fact-oriented modeling, logic and derivation, patterns in input data models.

Foreign Assistance and Related Agencies Appropriations for 1972
Oxford University Press

Stemming from the recent growth of the creative industry sector, this book presents practical policy advice to countries seeking to benefit from it.

Creative Industries and Developing Countries EOLSS Publications

This book applies a justice framework to analysis of the actual and potential role of international law with respect to people on the move in the context of anthropogenic climate change. That people are affected by the impacts of climate change is no longer doubted, including with implications for people movement (migration, displacement, relocation, etc.). Climate Change and People on the Move tackles unique questions concerning international responsibility for people movement arising from the

inequities inherent to climate change. Corrective and distributive justice provide the analytical backbone, and are explored in a substantial theoretical chapter and then applied to subsequent contextual analysis. Corrective justice supports analysis as to whether people movement in the climate change context could be conceived or framed as harm, loss, or damage which is compensable under international law, either through fault-centred regimes or no-fault regimes (i.e. insurance). Distributive justice supports analysis as to whether such movement could be conceived or framed as a disproportionate burden, either for those faced with movement or those faced with sheltering people on the move, from which duties of re-distribution may stem. This book contributes to the growing scholarship and analysis concerning international law or governance and people movement in response to the impacts of climate change by investigating the bounds of the law where the phenomenon is viewed as one of (in)justice.

Global HR Copenhagen Business School Press DK

This policy note is one in a series of four notes that summarize key findings and recommendations from 32 seminars organized by IFPRI between 2016 and 2020 under the Evaluating Impact and Building Capacity Project funded by the United States Agency for International Development (USAID) and from related research done in collaboration with national and international partners in Egypt. The briefs have been prepared on the basis of a joint symposium and are intended to give policymakers and program designers in the areas of social protection, nutrition, agricultural policy, and the digitalization of agriculture a quick overview of research-based recommendations on key policy issues that will

better enable Egypt to achieve several of the goals outlined in the Sustainable Development Strategy 2030. Addressing all forms of malnutrition – both undernutrition and overnutrition – remains a human and economic development challenge that Egypt must overcome. This brief highlights three areas of action to significantly improve the nutritional status of all Egyptians: Make domestic food policies more nutrition-sensitive and incentivize food producers and marketers to shift to the production, processing, and marketing of healthier foods. Expand ongoing awareness and educational campaigns, such as the 100 Million Healthy Lives initiative, to promote improved nutrition and to disseminate nutrition knowledge. The COVID-19 pandemic is an additional reminder and rationale for investing in healthy diets and sustainable food systems. Promote research to make nutrition policy more effective and efficient, including by increasing collection of nutrition-related data and better sharing of already collected data among ministries, research institutes, and other stakeholders.

Budgetary Issues Related to Energy Conservation and Development Routledge

Sean D. Murphy's wide-ranging and in-depth 2002 survey of U.S. practice in international law in the period 1999–2001 draws upon the statements and actions of the executive, legislative and judicial branches of the U.S. government to examine its involvement across a range of areas. These areas include diplomatic and consular relations, jurisdiction and immunities, state responsibility and liability, international organizations, international economic law, human rights, and international criminal law. At the time of its first publication this summary of

the most salient issues was a central resource on U.S. practice in international law. The volume contains extracts from hard-to-find documents, generous citations to relevant sources, tables of cases and treaties, and a detailed index. Revealing international law in the making, this essential tool for researchers and practitioners was the first in a series of books capturing the international law practice of a global player.

Agriculture, Rural Development, and Related Agencies Appropriations for Fiscal Year 1980: Congressional witnesses, Department of Agriculture, General Accounting Office, nondepartmental witnesses Springer

"In global politics, women's bodies are policed, objectified, surveilled, and feared, with particular attention paid to both their met or unmet procreative potential. By illuminating and interrogating representations and narratives of maternity, this volume shows how practices of global politics shape and are shaped by the gendered norms and institutions that underpin motherhood. The guiding theoretical idea in this volume is that motherhood matters in global politics. However - as with so many political phenomena coded 'female' in the binary cognitive architectures of the West - the diverse ways in which performances and practices of motherhood are constituted by and are constitutive of other dimensions of political life they are frequently obscured or assumed to be of little interest to scholars, policy makers, and practitioners. Featuring innovative and diverse interrogations of the politics of motherhood as an institution, this collection shows that maternity is troubled, complicated, and heterogeneous in global politics and thus performances and practices of motherhood warrant closer and

more sustained scrutiny"--

Foreign Operations, Export Financing, and Related Programs Appropriations for 2001 Routledge

The HR function is having to adjust itself to the implications of the globalisation of business activity. This has meant adjusting its philosophy, policies and practices to fit new organisational imperatives, as well as creating its own refashioned service delivery model. Peter Reilly and Tony Williams's *Global HR* explores the key issues of building an international brand, culture and talent pool, whilst contributing to business and functional transformation, drawing on examples from multinationals in telecoms, fast-moving consumer goods, manufacturing, software, services and commodities. In doing so, they offer insights into managing people and businesses that no organization can ignore.

Agriculture, Rural Development, and Related Agencies Appropriations for 1983: Agricultural programs Taylor & Francis

The growing population of Europe needs adequate and wholesome food at reasonable prices and a sufficient supply of pure drinking water. Accommodating this need and the many other pressures on land while maintaining biodiversity, ecosystems, and cultural landscapes is a matter of continuing concern and debate in Europe. The changing nature of agriculture, concerns about agricultural subsidies and surpluses, food and water quality issues, and discussion of the future of the European Union (EU)'s Common Agricultural Policy have all increased the intensity of this debate in recent years. Through its discussion of how best to achieve sustainable land use, *Agriculture and Sustainable Land Use in Europe* tackles this wide range of issues, examining problems faced by the EU concerning

the future of rural communities, the maintenance of an attractive and diverse countryside, and more. This work comprises papers presented at two conferences organised by groups of European Environmental Advisory Councils. These papers offer the reader access to a broad range of experience and points of view, making *Agriculture and Sustainable Land Use in Europe* a contribution of particular value to the debate on these issues.

International Transportation: Moving the Global Economy Forward Springer Science & Business Media

This book examines whether a global consensus is emerging on climate change and human mobility and presents evidence of a slow-moving but dynamic, step-by-step process of international policy development on climate-related mobility. Naser reviews the range of solutions offered to address climate-related mobility problems, such as extending the 1951 UN Refugee Convention, adopting an additional protocol to the UNFCCC or creating a new international treaty to support those facing climate-related migration and displacement problems. He examines the accumulating stock of international policies and initiatives relevant to climate-related mobility using a framework of six policy areas: human rights, refugees, climate change, disaster risk reduction, migration, and sustainable development. He uses this framework to define and summarise the main UN actions and milestones on climate-related mobility. Despite the difficult context affecting the global community of worsening climate change impacts and human rights under threat, Naser asserts that the foundations of global consensus on climate-related mobility have been built, particularly in the last decade. This book will be of great relevance to students, scholars and policy-makers

with an interest in the increasing interface between climate change and human mobility policy issues.

Global Migrants, Global Refugees Food & Agriculture Org.

This book focuses on one critical challenge: climate change. Climate change is predicted to lead to an increased intensity and frequency of natural disasters. An increase in extreme weather events, global temperatures and higher sea levels may lead to displacement and migration, and will affect many dimensions of the economy and society. Although scholars are examining the complexity and fragmentation of the climate change regime, they have not examined how our existing international development, migration and humanitarian organizations are dealing with climate change. Focusing on three institutions: the United Nations High Commissioner for Refugees, the International Organization for Migration and the United Nations Development Programme, the book asks: how have these inter-governmental organizations responded to climate change? And are they moving beyond their original mandates, given none were established with a mandate for climate change? It traces their responses to climate change in their rhetoric, policy, structure, operations and overall mandate change. Hall argues that international bureaucrats can play an important role in mandate expansion, often deciding whether and how to expand into a new issue-area and then lobbying states to endorse this expansion. They make changes in rhetoric, policy, structure and operations on the ground, and therefore forge, frame and internalize new issue-linkages. This book helps us to understand how institutions established in the 20th century are adapting to a 21st century world. It will be of great interest to scholars and students of International Relations, Development

Studies, Environmental Politics, International Organizations and Global Governance, as well as international officials.

International Law and Policy of Sustainable Development

Routledge

In the era of rapid globalization, the ITC plays a significant and wide ranging role working with both governments and trade support institutions to nurture an export culture, this work will provide a much needed overview of this dynamic organization. This book: Details the history of the organization since its inception Examines its current mandate and the impact of recent reforms Analyses the ability of the ITC to provide trade intelligence, and its role in the development of national export strategies Evaluates the future challenges, and emphasises that the ITC must continue to broaden its mandate and continue to be responsive and results orientated to remain a key player The status of ITC – half-in and half-out of the UN – could prove to be an interesting model for the future, and this work will be of interest to not only to academics but also government trade specialists and negotiators, the "aid for trade" donors, NGOs, and those involved in the running of international organizations.

Comprises a collection of papers.

Container Shipping and Economic Development Cambridge

University Press

This book analyses the relation between different discourses and actors through an ethnographic approach, showing not only how fishermen in Slovenia respond to international political economy, how they struggle to survive but also how they generate small changes. Fishing in the northeastern part of the Adriatic Sea

makes for a substantial economy anchored in many stories. Regional conflicts, wars, the demise of empires and the rise of nation states with ensuing maritime border issues, socialist heritage, transnational and transformational processes in Europe, and the growth of capitalist relations between production and consumption in coastal areas, have all contributed to the specific discourses that have affected this relatively under-researched area. How this complex, layered and ambiguous quarrelling is constituted at different levels and how this situation is lived and experienced by the local fishermen working along the present Slovene coast effectively forms the core of this book.

On the Move to Meaningful Internet Systems: OTM 2010 Oxford University Press, USA

Water Related Education, Training and Technology Transfer is a component of Encyclopedia of Water Sciences, Engineering and Technology Resources in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty one Encyclopedias. Learning processes offer knowledge, skills, and competencies to the individual through different methods of education and training. The learning society and the concept of lifelong learning form the basis for the so-called "knowledge-based" economy. Since water resources development and management are an essential part of this economy, education, training, and transfer of technology for water resources should be seen as important aspects of societal policies for a sustainable future. This book starts with a little history, and introduces several issues related to water resources in the learning environment. What does the water profession expect from education? We must consider the methods and tools used the

need to match demand and supply, and quality assessment of education and training. Transfer of technology to close the technology gap between countries can only be effective if an enabling learning environment exists. Capacity building must ensure that this environment is sustainable. This volume is aimed at the following five major target audiences: University and College students Educators, Professional practitioners, Research personnel and Policy analysts, managers, and decision makers and NGOs.

Foreign Assistance and Related Agencies Appropriations for 1974, Hearings..., 93-1, Subcommittee on Foreign Operations and Related Agencies... Routledge

By analysing A P Moller -- Maersk's activities in South East Asia, the book contributes to our understanding of the role of container shipping services in economic development processes.

Displacement, Development, and Climate Change Springer
The Global Dialogue on the Role of Food and Agriculture in the Post-2020 Global Biodiversity Framework was convened virtually by the Food and Agriculture Organization of the United Nations (FAO) and the Secretariat of the Convention on Biological Diversity (CBD) on 6 and 7 July 2021. This is the summary report of the meeting.

The Emerging Global Consensus on Climate Change and Human Mobility Berghahn Books

It is now generally accepted that sustainable development has become a central objective of the international community. This text examines the politics and history of the term, before moving on to analyse relevant principles of international law in this context.

Moving for Prosperity: Global Migration and Labor Markets
FrancoAngeli

This book provides novel and in-depth perspectives on evaluating environment and sustainability issues in developing countries. Evaluating Environment in International Development focuses on the approaches and experiences of leading international organizations, not-for-profits, and multilateral and bilateral aid agencies to illustrate how systematic evaluation is an essential tool for providing evidence for decision-makers. Moving beyond projects and programmes, it explores normative work on the environment as well as environmental consequences of economic and social development efforts. This new edition reflects on the 2030 Agenda for Sustainable Development and Sustainable Development Goals and considers how they have influenced efforts in a wide range of countries and what the implications are for evaluation. It also explores ways in which Big Data and geospatial approaches might be utilized. Significantly updated throughout to reflect recent developments in climate change research, and on the implications of the 2020 pandemic, this volume will be of great interest to students and scholars of environment studies, development studies, international relations, sustainable development and evaluation, as well as practitioners in international organizations and development and environmental NGOs. The Open Access version of this book, available at <http://www.taylorfrancis.com/books/9781003094821>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.
