GROSS MELENDEZ

Repositioning Organization Theory Princeton University Press

This book is a thoroughly revised version of the 1999 edition, which was welcomed at the time as a classic. It now extends the period of coverage to 2012 and includes an entirely new chapter on current developments, making this updated edition an essential

The Political Writings of St. Augustine Edinburgh University Press

What kind of literature is the Talmud? To answer this question, Daniel Boyarin looks to an unlikely source: the dialogues of Plato. In these ancient texts he finds similarities, both in their combination of various genres and topics and in their dialogic structure. But Boyarin goes beyond these structural similarities, arguing also for a cultural relationship. In Socrates and the Fat Rabbis, Boyarin suggests that both the Platonic and the talmudic dialogues are not dialogic at all. Using Michael Bakhtin's notion of represented dialogue and real dialogism, Boyarin demonstrates, through multiple close readings, that the give-and-take in these texts is actually much closer to a monologue in spirit. At the same time, he shows that there is a dialogism in both texts on a deeper structural level between a voice of philosophical or religious dead seriousness and a voice from within that mocks that very high solemnity at the same time. Boyarin ultimately singles out Menippean satire as the most important genre through which to understand both the Talmud and Plato, emphasizing their seriocomic peculiarity. An innovative advancement in rabbinic studies, as well as a bold and controversial new way of reading Plato, Socrates and the Fat Rabbis makes a major contribution to scholarship on thought and culture of the ancient Mediterranean.

Repositioning Organization Theory studies the political positioning of organization theory. The book argues that there are two main projects in organization theory: the hegemonic project of positioning and postmodern project of de-positioning. To critique the theoretical and political limits of these two projects, Böhm employs a range of critical and post-structural philosophies. Having conceptualized the need for a 'political event', the book is a passionate call for repositioning and repoliticizing organization theory. This book discusses the impossibilities of, and strategies for, such a project.

New Strategies in Locust Control UN

In the late eighties large-scale control operations were carried out to control a major desert locust upsurge in Africa. For the first time since the banning of organochlorine pesticides these operations relied mainly on non-persistent pesticides such as organophosphates and pyrethroids. The amount of pesticides sprayed and the area covered were probably the highest in the history of locust control and raised criticism with respect to efficacy, economic viability and environmental impact. As a consequence, applied research into the problem was intensified, both at the national and the international level, with the goal of finding new and environmentally sound approaches and solutions to locust and grasshopper control. Emphasis was laid on developing new control agents and techniques.

Proceeding by means of intensive readings of passages from the early midrash on Exodus The Mekilta, Boyarin proposes a new theory of midrash that rests in part on an understanding of the heterogeneity of the biblical text and the constraining force of rabbinic ideology on the production of midrash. In a forceful combination of theory and reading, Boyarin raises profound questions concerning the interplay between history, ideology, and interpretation.
