A fresh set of concerns face the twenty-first century British novelist. In this study of the four key novelists Zadie Smith,

Nadeem Aslam, Hari Kunzru and David Mitchell, the the changes in narrative approaches and critical directions of a new post-1989 fiction are explored. Close readings of the writers are informed by a range of contemporary theorists, critics and commentators to reveal the emphases of twenty-first century fiction. Terror, fear, consumerism, multinationalism, and corporatism: the terms circulating in culture and social networks are evident in Smith's faith in ethical living, Aslam's consideration of multiculturalism, the novels Kunzru builds around the politics of identity and in the importance Mitchell places on the interconnectedness of human life. By putting the emergence of a new British literary dynamic in the context of ethical as well as global contexts, this study analyzes the transformed fictional perceptions of a world no longer defined by the stand off of super powers.

Desi Land is Shalini Shankar's lively ethnographic account of South Asian American teen culture during the Silicon Valley dot-com boom. Shankar focuses on how South Asian Americans, or "Desis," define and manage what it means to be successful in a place brimming with the promise of technology. Between 1999 and 2001 Shankar spent many months "kickin' it" with Desi teenagers at three Silicon Valley high schools, and she has since followed their lives and stories. The diverse high-school students who populate Desi Land are Muslims, Hindus, Christians, and Sikhs, from South Asia and other locations; they include first- to fourth-generation immigrants whose parents' careers vary from assembly-line workers to engineers and CEOs. By analyzing how Desi teens' conceptions and realizations of success are influenced by community values, cultural practices, language use, and material culture, she offers a nuanced portrait of diasporic formations in a transforming urban region. Whether discussing instant messaging or arranged marriages, Desi bling or the pressures of the model minority myth, Shankar foregrounds the teens' voices, perspectives, and stories. She investigates how Desi teens interact with dialogue and songs from Bollywood films as well as how they use their heritage language in ways that inform local meanings of ethnicity while they also connect to a broader South Asian diasporic consciousness. She analyzes how teens negotiate rules about dating and reconcile them with their longer-term desire to become adult members of their communities. In Desi Land Shankar not only shows how Desi teens of different socioeconomic backgrounds are differently able to succeed in Silicon Valley schools and economies but also

how such variance affects meanings of race, class, and community for South Asian Americans.

 'We need to create a home to return to. And when I say home, I'm not talking about a physical place or somewhere where pants are optional. I'm talking about a set of beliefs after a day full of, well, anything. We need to dig a foundation so deep that it will exist and thrive even if our surface-level efforts fail.' Ever wondered what the point of all those school maths lessons about triangles was? Youtuber and comedian Lilly Singh has finally discovered the answer: triangles are the perfect model for building your self-esteem and getting to know your own values. Triangles have a strong base, they're hard to knock-over and always retain their own shape, even when they grow. With her incomparable sense of humour and fun, Lilly explains how she has put the ethos of the triangle to work in her own life, and shows how you can do the same. Complete with playful illustrations and inspiring ideas, this book is like a best friend cheering you on as you find your purpose and get to know yourself.

Tait's Edinburgh Magazine Harper Collins
 India, That Is Bharat, the first book of a comprehensive trilogy, explores the influence of European 'colonial consciousness' (or 'coloniality'), in particular its religious and racial roots, on Bharat as the successor state to the Indic civilisation and the origins of the Indian Constitution. It lays the foundation for its sequels by covering

the period between the Age of Discovery, marked by Christopher Columbus' expedition in 1492, and the reshaping of Bharat through a British-made constitution-the Government of India Act of 1919. This includes international developments leading to the founding of the League of Nations by Western powers that tangibly impacted this journey. Further, this work also traces the origins of seemingly universal constructs such as 'toleration', 'secularism' and 'humanism' to Christian political theology. Their subsequent role in subverting the indigenous Indic consciousness through a secularised and universalised Reformation, that is, constitutionalism, is examined. It also puts forth the concept of Middle Eastern coloniality, which preceded its European variant and allies with it in the context of Bharat to advance their shared antipathy towards the Indic worldview. In order to liberate Bharat's distinctive indigeneity, 'decoloniality' is presented as a civilisational imperative in the spheres of nature, religion, culture, history, education, language and, crucially, in the realm of constitutionalism.

-The Wall Street Journal Daniel H. Pink, the #1 bestselling author of *Drive* and *To Sell Is Human*, unlocks the scientific secrets to good timing to help you flourish at work, at school, and at home. Everyone knows that timing is everything. But we don't know much about timing itself. Our lives are a never-ending stream of "when" decisions: when to start a business, schedule a class, get serious about a person. Yet we make those decisions based on intuition and guesswork. Timing, it's often assumed, is an art. In *When: The Scientific Secrets of Perfect Timing*, Pink shows that timing is really a science. Drawing on a rich trove of research from psychology, biology, and economics, Pink reveals how best to live, work, and succeed. How can we use the hidden patterns of the day to build the ideal schedule? Why do certain breaks dramatically improve student test scores? How can we turn a stumbling beginning into a fresh start? Why should we avoid going to the hospital in the afternoon? Why is singing in time with other people as good for you as exercise? And what is the ideal time to quit a job, switch careers, or get married? In *When*, Pink distills cutting-edge research and data on timing and synthesizes them into a fascinating, readable narrative packed with irresistible stories and practical takeaways that give readers compelling insights into how we can live richer, more engaged lives.

The Legal Affair Andrews McMeel Publishing

Lords of Things offers a fascinating interpretation of modernity in late nineteenth and early twentieth century Siam by focusing on the novel material possessions and social practices adopted by the royal elite to refashion its self and

public image in the early stages of globalization. It examines the westernized modes of consumption and self-presentation, the residential and representational architecture, and the public spectacles appropriated by the Bangkok court not as byproducts of institutional reformation initiated by modernizing sovereigns, but as practices and objects constitutive of the very identity of the royalty as a civilized and civilizing class. Bringing a wealth of new source material into a theoretically informed discussion, *Lords of Things* will be required reading for historians of Thailand and Southeast Asia scholars generally. It represents a welcome change from previous studies of Siamese modernization that are almost

exclusively concerned with the institutional and economic dimensions of the process or with foreign relations, and will appeal greatly to those interested in transnational cultural flows, the culture of colonialism, the invention of tradition, and the relationship between consumption and identity formation in the modern era.
