*The Crisis* EduGorilla Community Pvt. Ltd.

The Crisis, founded by W.E.B. Du Bois as the official publication of the NAACP, is a journal of civil rights, history, politics,

and culture and seeks to educate and challenge its readers about issues that continue to plague African Americans and other communities of color. For nearly 100 years, The Crisis has been the magazine of opinion and thought leaders, decision makers, peacemakers and justice seekers. It has chronicled, informed, educated, entertained and, in many instances, set the economic, political and social agenda for our nation and its multi-ethnic citizens.

This volume presents a manual for a new method of studying implicit attitudes, the Test of Implicit Associations in Relationship Attitudes (TIARA). The main goal of this volume is to demonstrate how to study the implicit attitudes that people have toward others in their close relationships: friend, romantic partner, family member, etc. Since the inception of the concept and measures of implicit cognition, researchers have developed a number of indirect measures to assess implicit attitudes. These similar yet different methods aim to account for different variables for reliable and valid operational definitions of implicit attitudes. Given the progress made in the field of implicit measures, there is

great potential for further development and extension of these types of assessments. Many of these methods (especially the Implicit Attitude Test) are only limited to assessing attitudes within the comparison of two bipolar concepts. Therefore, TIARA was developed to be a manual for a new method of studying implicit attitudes in relationships. As described in this volume, TIARA shows that if a person strongly believes that certain feelings can be attributed to a target relationship figure, the reaction time is shorter since they are the most confident in their answer. Beginning with a grounded explanation of the theory behind TIARA, the volume then proceeds to explain its methods and procedures, and how to code, score, and interpret the results of TIARA. Next, the volume

reports on six psychometric studies, which provide substantial evidence that TIARA is a valid and reliable measure to study implicit attitudes in relationship research. The volume concludes by exploring practical applications of TIARA as well as its future directions and current limitations. The detailed description of the TIARA method provides a practical and handy tutorial for using the method in research and practice for social and personality psychologists, as well as practitioners. System-on-a-Chip (SOC) integrated circuits composed of embedded cores are now commonplace. Nevertheless, there remain several roadblocks to rapid and efficient system integration. Test development is seen as a major bottleneck in SOC design and manufacturing capabilities. Testing SOC is especially challenging in the absence

of standardized test structures, test automation tools, and test protocols. In addition, long interconnects, high density, and high-speed designs lead to new types of faults involving crosstalk and signal integrity. SOC (System-on-a-Chip) Testing for Plug and Play Test Automation is an edited work containing thirteen contributions that address various aspects of SOC testing. SOC (System-on-a-Chip) Testing for Plug and Play Test Automation is a valuable reference for researchers and students interested in various aspects of SOC testing.

**Tests, 2014 Edition** DIANE Publishing  
This volume brings together experts on various aspects of education to address many of the emerging issues and problems that affect how data are being used or misused in educational contexts. Readers will learn about the importance of using data effectively, responsibly, and ethically to fully understand how cognitive fallacies occur and how they impact decisionmaking. They will understand how codes of ethics deal with the use of data within education as well as in other disciplines. Chapters

provide a landscape view of the regulations that pertain to data use and policies that have emerged, including the impact of accountability on data use and data ethics. The text covers data ethics in local education agencies, professional development, educator preparation, testing programs, and educational technology. Chapter authors recommend steps to improve awareness among educators, stakeholders, and other interested groups and suggest actions that can be taken to enhance educators' capacity to use data responsibly. A final use case chapter describes the importance of data ethics in terms of equity in schools and includes salient examples of ethical dilemmas, with questions and reflections on how ethics and equity apply to each

situation. The conclusion addresses data ethics in terms of professionalism and poses several recommendations to challenge educators in ways to raise awareness of and integrate data ethics into educational practice. Book Features: Discusses how accountability affects effective data, including the pressure on schools and districts to perform better on test scores or other indicators. Outlines ten recommendations for how professional development can incorporate data ethics in practice. Reviews the expectations and realities of preparing educators for data literacy, including an example of one teacher education program's integrated, curriculum-wide approach. Considers the role of testing companies in ethical data use, including issues around equity in

assessment data. Explores how educational technologies, platforms, and applications impact data use.
