The higher education landscape has arguably become one of the most arduous to traverse. More so in the African context, where a host of variables continuously challenge educators to reflect critically on their philosophies and practices as they engage an ever-changing audience. In this book, a critical engagement with theological education in Africa is offered. As the book originates from South Africa, it is presented as a South African perspective, although contributors are situated across the African continent and abroad. The common denominator is that all contributors are, in some way or another, invested in theological education in Africa. The main contribution of this collaborative work is to be sought in the insights it offers on four main areas of theological education: A historical and current orientation on theological education in Africa, some paradigm shifts in theological education in Africa, ministerial formation needs versus theological education challenges, and a critical reflection on elective models and methods. The book presents the original and innovative research of scholars for fellow scholars involved in theological higher education as it is grounded in the respective fields of interest of each contributor. It contributes to a better understanding of the complex African theological higher education landscape that is also mindful of post-COVID-19 realities. Methodologically the work draws on a combination of methods, including literature studies, empirical work, and in some cases sectional offerings from doctoral studies, as indicated in the various chapters.

What if the path to a life of abundance and blessing isn't what we expected? What if the way forward begins with going backward? In our constant search for a life filled with blessing and abundance, we often follow our human instinct and then wonder why we come up short. But it doesn't have to be that way. Join pastor and author Alex Seeley as she teaches us that God always has a better idea -- we just have to move in a new direction. In *The Opposite Life*, Seeley explains that the secret to living a powerful and abundant life lies in the upside-down kingdom of God. Each chapter of *The Opposite Life* explores the opposite-life principles that can start to shift our mindset for the better, diving deeper into the natural contradictions between: death and life fear and faith hate and love worry and worship impossible and possible Along the way, she offers encouraging and simple challenges to help us align our lives with God's subversive plan. As we learn to exchange our default instincts for the surprising teachings of Jesus -- our pioneer of the unlikely -- we discover a life of transformational power, abundance, and more blessing than we ever thought possible. Praise for *The Opposite Life*: "Our broken earth longs for just this type of unveiling. It is time for us to remember who we are and respond as sons and daughters of the Most High God. There is a desperate longing for His goodness in the face of overwhelming anger, pain, and confusion. The Opposite Life is a drink of living water in a dry and arid land." --Lisa Bevere, *New York Times* bestselling author of *Without Rival* and *Girls with Swords*

Bible prophecy predicts World War III is inevitable and it will be unlike previous wars. Nuclear exchanges and fallout will kill millions of innocent people. People will cry for "peace and safety," and Jesus will end the war with a display of divine wrath.

#1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A "brilliant" (*Lupita Nyong'o*, *Time*), "poignant" (*Entertainment Weekly*), "soul-nourishing" (*USA Today*) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—*Esquire* Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by *The New York Times*, *USA Today*, *San Francisco Chronicle*, *NPR*, *Esquire*, *Newsday*, and *Booklist* Trevor Noah's unlikely path from apartheid South Africa to the desk of *The Daily Show* began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was

punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

This study examines metaphor in Zulu in the light of conceptual metaphor theory from the perspective of a Bible translator. It then considers the possibility of translating Biblical Hebrew metaphor into Zulu. Selected Hebrew metaphors in the Book of Amos are analysed according to conceptual metaphor theory and compared with the conceptual metaphor analysis of the corresponding verses in existing Zulu translations, thereby increasing the empirical basis of the theory, and showing that it is valid for the study of both Biblical Hebrew and Zulu and a useful tool for translators.

The initiative gave birth to dozens of youth choirs who sang the hymns in a new style, and began to compose their own repertory about Shembe in a more 'gospel-inflected' musical version of their faith. --

Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the

need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.
