“...a well written and content rich book. From a teacher's perspective, using this book in an advanced project management seminar challenges students to understand the application of these concepts.” —Alexander Walton, PMP, IT consultant to the University of California at Berkeley Widely acclaimed as one of the top agile books in its first edition, Project Management the Agile Way has now been updated and redesigned by popular demand. This second edition is in a modular format to facilitate training and advanced course instruction, and provides new

coverage of agile, such as hybrid agile methods, the latest public sector practices, and a chapter dedicated to transitioning to agile. It discusses the “grand bargain” between project management and business; the shift in dominance from plans to product and from input to output; and introduces new concepts such as return on benefit. Experienced practitioners and students that want to learn how to make agile work effectively in the enterprise should read this book. Individuals preparing for the PMI Agile Certified Practitioner (PMI-ACP)® examination, and training providers developing courses, will find this second edition quite helpful. Liftoff-it's the unexplored, often ignored, Agile project practice. As the first act of flight, a rocket launch requires an entire set of systems to lift the vehicle into orbit-not just the vehicle itself, but all the systems needed for smoothly moving off the ground into space. Likewise, your project needs its entire set of supporting systems in place to begin a successful journey to delivery. Whatever you call it (project kickoff, bootcamp, inception, or

jump start), liftoff gives your team its trajectory, and launches your project. This critical practice informs, inspires, and aligns everyone to a singular purpose: the successful delivery of software. This success is in your hands! Agile veterans Diana Larsen and Ainsley Nies teach you how to organize and conduct liftoffs, hold team activities to discover what's most important, and offer a working framework for effective and lightweight agile chartering.
