PRATT JULISSA

Principles and Practice of Psychiatric Nursing Elsevier Health Sciences

This book aims to assist clinical teachers in the practice of clinical teaching. It assumes that clinical teachers will bring to their task a background knowledge of educational principles, experience in a clinical nursing field, knowledge of substantive nursing content, a love of teaching and a desire to share with their students the joys, tears, challenge and wonder of learning in the clinical setting. The format is designed around a set of commonly encountered problems and encourages readers, whether on the threshold of a career as a clinical teacher or those who are experienced, to think through their responses to the problem situation before reading on to a disclosure of possible courses of action. In brief, the book is a companion to *Teaching Nursing: A Self Instructional Handbook* (Ewan and White, 1984). The authors' interest in clinical teaching can be traced through a number of years in a variety of teaching careers with multidisciplinary health professional groups, of whom nurses comprise the majority of practitioners. As senior lecturers in the School of Medical Education, the authors were involved in developing and teaching a Master of Health Personnel Education Degree course; the students (or Fellows) in that programme were all graduates from a broad range of health care disciplines - nursing, medicine, physiotherapy, occupational therapy, nutrition, dentistry, health education, health resources management, radiography, social work, community development, occupational safety and health.

BUKU AJAR KOMPRESIF KONSEP DASAR KEPERAWATAN Springer Publishing Company

This text was written as a Canadian introduction to nursing leadership and management for undergraduate nursing students at the upper year level. The four main themes that run throughout this text are patient safety; communication in leadership; critical thinking; and research. Drawing on Canadian examples across a variety of health care settings, the text focuses on issues that affect nurses working in the Canadian health care system including workplace bullying, burnout, and more.

Modeling and Role-Modeling PT Kanisius

Manajemen keperawatan merupakan proses kerja setiap perawat dalam memberikan pengobatan dan kenyamanan terhadap pasien dengan cara merencanakan, mengatur, mengarahkan, dan mengawasi keuangan yang ada, peralatan dan sumber daya manusia untuk memberikan pengobatan yang efektif dan ekonomis kepada pasien. Fungsi manajemen mengalami perluasan sebagai proses perencanaan, pengorganisasian, ketenagaan, pengarahan, dan pengawasan. Dalam menjalankan fungsi manajemen diperlukan manajemen sumber daya manusia dengan menerapkan komunikasi terapeutik perawat, manajemen stres kerja perawat dan pelayanan caring perawat, dimana ketiga hal ini berproses untuk memberikan pelayanan keperawatan yang bermutu untuk mencapai tujuan organisasi. Buku ini akan membahas konsep dasar manajemen keperawatan mulai dari teori dan aplikasi manajemen stres kerja perawat, komunikasi terapeutik perawat, dan pelayanan caring perawat sebagai treatment yang digunakan untuk memberikan pelayanan yang baik berdasarkan fungsi manajemen keperawatan.

Nursing Leadership and Management Springer

Buku saku dengan judul "Pengetahuan Komunikasi Terapeutik dalam Meningkatkan Perilaku Caring Perawat" ini merupakan buku yang berisi tentang pelaksanaan komunikasi terapeutik di dalam pelayanan keperawatan. Buku ini berisi terkait dengan konsep teori pengetahuan, konsep komunikasi terapeutik, konsep caring, pelaksanaan pelatihan komunikasi terapeutik serta hasil dari penerapan pelatihan komunikasi terapeutik terhadap pengetahuan perawat dan perilaku caring perawat. Melalui buku ini, penulis berharap agar para pembaca buku ini khususnya para perawat dapat menggunakan buku ini sebagai panduan untuk menerapkan komunikasi terapeutik atau recall kembali ilmu yang telah didapatkannya di bangku kuliah terkait dengan pelaksanaan komunikasi dan penerapan caring di pelayanan keperawatan. Diharapkan agar perawat, sebagai tombak pelayanan kesehatan dapat menerapkan komunikasi terapeutik dalam setiap pelayanan keperawatan terutama yang berhubungan dengan pasien secara langsung sehingga akan terciptanya kepuasan pasien dalam pelayanan keperawatan.

Fundamentals of Nursing Vol 1- 9th Indonesian Edition Elsevier (Singapore) Pte Limited

Developed by the authors, generalized structured component analysis is an alternative to two longstanding approaches to structural equation modeling: covariance structure analysis and partial least squares path modeling. Generalized structured component analysis allows researchers to evaluate the adequacy of a model as a whole, compare a model to alternative specifications, and conduct complex analyses in a straightforward manner. Generalized Structured Component Analysis: A Component-Based Approach to Structural Equation Modeling provides a detailed account of this novel statistical methodology and its various extensions. The authors present the theoretical underpinnings of generalized structured component analysis and demonstrate how it can be applied to various empirical examples. The book enables quantitative methodologists, applied researchers, and practitioners to grasp the basic concepts behind this new approach and apply it to their own research. The book emphasizes conceptual discussions throughout while relegating more technical intricacies to the chapter appendices. Most chapters compare generalized structured component analysis to partial least squares path modeling to show how the two component-based approaches differ when addressing an identical issue. The authors also offer a free, online software program (GeSCA) and an Excel-based software program (XLSTAT) for implementing the basic features of generalized structured component analysis.

Adult Nursing Practice: Using evidence in care enables today's students and newly qualified nurses develop the knowledge and skills they need to deliver, and lead care tomorrow. Reflecting the principles of evidence-based care in line with the current NMC competencies, this textbook helps students learn to manage patients with common conditions and fundamental health needs so they can provide the best possible evidence-based care. Written, and edited by leading nurses from practice, education and research, it focuses on common diseases, fundamental health needs, and symptoms that nurses' encounter in daily practice. Conditions are clearly explained so that the

causes of ill health are easily understood. Every chapter covers pathophysiology, indicates the key priorities for nursing assessment, and discusses 'what the evidence says', before considering nursing management options. Throughout the authors' clear signposts to trustworthy evidence mean that students can effortlessly select the best nursing interventions for their patients using the current available evidence-base. The ideal guide for students preparing for registration and newly qualified staff going through preceptorship, it is packed with over 115 illustrations and lots of features to bring the subject to life and make learning easier: BLNursing assessment illustrations outline challenges caused by common diseases in a helpful and memorable way, highlighting issues that need assessment BLRed flag icons indicate the warning signs of deterioration and urgent questions are listed that can be used for assessment and monitoring BLCase studies of effective evidence-based interventions show the difference that high quality nursing care makes BLCross references between common conditions' causes and managing related health needs and symptoms develop understanding by clearly linking pathophysiology with nursing management options BLTheory into practice boxes further enhance learning through suggested activities, such as exploring key evidence, considering major practice issues or applying core knowledge while out on placement BLOnline resource centre at www.oxfordtextbooks.co.uk/orc/bullock/. Filled with interactive and useful e-learning resources to help students test their learning, keep up-to-date with the latest evidence and further expand their knowledge, it features: BLClinical decision making scenarios BLQuiz questions BLUpdates to content BLHyperlinked references BLImages from the book BLLECTurer resources

Case studies include unique clinical application questions and exercises, allowing you to practice using care plans and concept maps. The 5-step nursing process provides a consistent framework for care, and is demonstrated in more than 20 care plans. 15 review questions in every chapter test your retention of key concepts, with answers. UNIQUE! Clear, streamlined writing style makes complex material more approachable. More than 20 concept maps show care planning for clients with multiple nursing diagnoses. Key points and key terms in each chapter summarize important content for more efficient review and study. Unexpected Outcomes and Related Interventions for each skill alert you

to potential problems and appropriate nursing actions. Delegation coverage clarifies which tasks can and cannot be delegated. A glossary provides quick access to definitions for all key terms.

Caring Economics Prentice Hall

This extant nursing theory and paradigm is recognized by the American Holistic Nurses Association. It provides guidelines for nurses interested in application of a mind-body-spirit approach to client care. Modeling is the process of building a mirror image of the client's world. Role-modeling is the process of designing and implementing care that nurtures client growth and healing and facilitates clients fulfilling their personally chosen life-roles.

Adult Nursing Practice Springer Publishing Company

Perawatan holistik secara garis besar bertujuan untuk memberikan asuhan keperawatan dengan kompleks dalam memenuhi kebutuhan dasar manusia yakni dari kebutuhan biologis, psikologis, sosial, kultural, dan kajian spiritual. Tentunya dalam hal ini perawat dituntut untuk siap menemani dan mengobservasi perkembangan kesehatan yang dialami oleh pasien serta mampu menyikapi segala kemungkinan yang terjadi pada pasien dalam proses perawatan. Seorang perawat yang terdidik dengan profesional pastinya dapat menuntaskan asuhan keperawatan secara komprehensif pada berbagai kondisi yang dialami pasien termasuk kondisi kronis. Mengingat pasien yang mengalami penyakit kronis dapat menjalani tahap pemulihan dalam jangka waktu panjang, perlu adanya pandangan yang menyeluruh dan strategi efektif serta intervensi efisien untuk mengoptimalkan kualitas hidup pasien. Buku ini membahas intervensi untuk pasien kondisi kronis yang mengacu pada kearifan lokal, di mana penulis menelaah berdasarkan evidence based bahwasanya pendekatan yang paling sesuai dalam menjalankan program holistik adalah dengan pendekatan berbasis budaya, dalam artian melibatkan budaya pasien untuk proses pemulihan. Sehingga buku ini dapat dijadikan dasar pedoman dalam memberikan asuhan ataupun pengembangan ilmu keperawatan di dunia pendidikan.
