At the International Meeting of the Psychometric Society in Osaka, Japan, more than 300 participants from 19 countries gathered to discuss recent developments in the theory and application of psychometrics. This volume of proceedings includes papers on methods of psychometrics such as the structural equation model and item response theory. The book is in eight major sections: keynote speeches and invited lectures; structural equation modeling and factor analysis; IRT and adaptive testing; multivariate statistical methods; scaling; classification methods; and independent and principal component analysis. The 80 papers collected here provide a valuable source of information for all who are concerned with psychometrics, mathematical and statistical applications, and data analysis in psychological and behavioral sciences.

This book explores the challenges faced by central banks in the aftermath of the global financial crisis and the events that followed. It further emphasises the asymmetries in the transmission of monetary policy in the Eurozone economies and among major advanced economies. The book also highlights the advances in the monetary policy debate towards an efficient resource allocation. The author argues that the canonical model of macroeconomic stabilization, which assigns the main burden of stabilization to monetary policy, is outdated primarily because of the absence of financial frictions. Further, she highlights the urgency of pushing risky activities outside the perimeters of regulation in face of rapidly evolving financial markets. The book provides an analytical framework in the context of intense globalisation and increased interdependence across economies, irrespective of the recent re-examining of supply-chains and trade relationships, as well as a policy framework thoroughly amended after the global financial crisis and the crises that followed it. Presenting policy proposals, the book discusses how policymakers must try to develop a set of policies that the public will have confidence in and take into account in forming expectations about future inflation and spending. It will be useful to central banking practitioners, monetary and fiscal policymakers, as well as students and scholars in economics and, in particular, financial economics.

A judgment in a civil matter rendered in a foreign country is not automatically recognized in Israel. Before a judgment will be recognized or enforced, it must first undergo a domestic integration process. A declaration that a foreign judgment is enforceable in Israel is dependent upon its meeting certain conditions specified by statute, irrespective of whether recognition of the foreign judgment is indirect or direct. These conditions serve as the main route for giving validity to foreign in rem judgments and to personal status judgments, which cannot otherwise be enforced; recognition of a judgment as enforceable, however, enables it to be executed. The book integrates lucid, theoretical analysis of the issues of enforcement and recognition of foreign judgments with practical instructions. It thus serves as a valuable guide for anyone seeking answers to the questions examined in the book, whether in the context of international commerce or to resolve transnational legal disputes. Despite the complexity of the questions addressed in the book, they are given accurate and easily understandable answers. Haggai Carmon's book grapples with the range of issues arising from the recognition of foreign judgments and their enforcement, i.e., the declaration that they are enforceable judgments. The book thoroughly and methodically examines these issues...Haggai Carmon has outstanding expertise in international law. He has a breadth of	

legal knowledge and extensive experience in both the theoretical and practical aspects of both private and public international law. He serves as legal counsel to commercial entities as well as foreign governmental agencies; amongst others, he is an outside legal counsel to the government of the United States. As this text reflects, Haggai Carmon is also a first-rate scholar and he shares his knowledge in a style that is suitable to every reader. -Eliezer Rivlin, Deputy Chief Justice, the Israel Supreme Court

Second language learners differ in how successfully they adapt to, and profit from, instruction. This book aims to show that adaptation to L2 instruction, and subsequent L2 learning, is a result of the interaction between learner characteristics and learning contexts. Describing and explaining these interactions is fundamentally important to theories of instructed SLA, and for effective L2 pedagogy. This collection is the first to explore this important issue in contemporary task-based, immersion, and communicative pedagogic settings. In the first section, leading experts in individual differences research describe recent advances in theories of intelligence, L2 aptitude, motivation, anxiety and emotion, and the relationship of native language abilities to L2 learning. In the second section, these theoretical insights are applied to empirical studies of individual differences-treatment interactions in classroom learning, experimental studies of the effects of focus on form and incidental learning, and studies of naturalistic versus instructed SLA.

Oil and Gas Production Handbook: An Introduction to Oil and Gas Production Springer Nature

The first edition of Interim Measures in International Arbitration edited by Lawrence Newman and Dr. Colin Ong, is most auspicious in its timing. The editors have compiled a shrewd and very practical questionnaire and they have gathered together a formidable group of some of the most reputed and talented practising arbitration lawyers, academics and arbitrators from 43 leading jurisdictions to inform the reader about the essential elements of the different interim measures which are available as part of the arbitral process in a very large number of different national jurisdictions. This book, thus, combines the best elements of a focused legal textbook with the essential practicalities of a practitioners' procedural handbook. This should be a standard travelling-companion of international arbitrators and counsel as well as many international lawyers--not just those who are arbitration specialists.

This open access book provides a readable narrative of the bubbles and the banking crisis Japan experienced during the two decades between the late 1980s and the early 2000s. Japan, which was a leading competitor in the world's manufacturing sector, tried to transform itself into an economy with domestic demand-led mature growth, but the ensuing bubbles and crisis instead made the country suffer from chronicle deflation and stagnation. The book analyses why the Japanese authorities could not avoid making choices that led to this outcome. The chapters are based on the lectures to regulators from emerging economies delivered at the Global Financial Partnership Center of the Financial Services Agency of Japan.
