With case table.

Report of the New York State Advisory Council on Placement and Unemployment Insurance for the Year ...

Page Publishing Inc

Many things define a job seeker--experience, education, first impressions, connections, passion, and the value you might bring to the company you wish to work for. For decades, the perceived ideal candidate would have all of the above, most of the above; however, a good candidate would have a four-year college degree. To a great extent, an employer still would like someone with a four-year college degree. However, I believe this is changing. The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired by companies. The time it will take you to earn your degree, you

could be making a nice living and will have accrued zero debt in the process. Plus, after working in an industry of your choice, something you do have an interest in, even a passion for, you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice, as you continue to work your way up through the company. You will find the more value you bring to a company, the more they will look to you to assume great responsibility. Typically, the more responsibility, the greater the paycheck. What makes this book timely is the fact as COVID-19 winds down, we are seeing many labor shortages in many areas and industries. Now is the absolute best time to go to an industry experiencing a labor shortage, or enter one of the numerous industries researched in this book and get yourself the job you always wanted, without the cost and time involved with getting a four-year college education. I have nothing against getting a degree, and there are still many fields where they will always be mandatory; however, the trades, service industries, government, railroads, law enforcement, plus many others will welcome you with open arms without the need

for a four-year degree. I hope this book helps.

FAIR EMPLOYMENT PRACTICE CASES VOLUME 2 Sterling Publishers Pvt. Ltd

Describes 250 occupations which cover approximately 107 million jobs.

Manpower R & D Monograph Infobase Publishing

Report on a survey of occupational qualifications and employment experiences among construction workers in the USA who have attained journeyman status (full trade union membership) through apprenticeship - finds that apprenticeship graduates fare better than workers trained in other ways. Bibliography pp. 215 to 220, references and statistical tables.

Career Education MacMillan Publishing Company

Contains the reports of city officials for the preceding year.

Programs to Employ the Disadvantaged

It was to be a structure like no other: the largest and tallest skyscraper in the world. Initial plans for the Empire State Building called for an Art Deco masterwork to rise 1,000 feet, with 80 stories of rental space. The high-rise was to completely fill the 84,000-square-foot site of the former Waldorf-Astoria, then New York's most opulent hotel. Hopes were high that the Empire State Building would accelerate Midtown Manhattan's stride toward commercial prominence, pulling more business uptown. Built in the early years of the Great Depression, during which one out of four New Yorkers was out of work, the Empire State Building's construction was thought by many to be a foolish undertaking.

Yet, it was completed under budget and ahead of schedule, and the commercial colossus has stood through good times and bad as a symbol of daring, beauty, and American invention.

Equal Apprenticeship Opportunities

Report on admission requirements for construction industry trade union membership in the USA - examines procedure and standards which unions use to admit construction workers to skilled worker status and compares apprenticeship trained workers with workers trained in other ways. Bibliography pp. 171 to 176 and statistical tables.
