Effective and accurate science communication is vital for bridging the gap between scientists and the public. By conveying complex scientific concepts in a clear and engaging manner, writers, communicators, and scientists can increase public understanding and foster informed decision-making. Key elements of effective communication include tailoring the message to the target audience, using simple and relatable language, and incorporating visuals and storytelling techniques. Additionally, transparency and openness about uncertainties and limitations of scientific research build trust. The purpose of this guide is to encourage communicators to convey science accurately and effectively and to help scientists communicate their findings to the public. This is not a comprehensive communications textbook. It is a 'quick

read'. Each chapter is short and designed to be read in 5 minutes and is self-contained making it perfect to dip into. Collaboration between writers, health advocates, scientists, journalists, and educators can enhance the dissemination of accurate information. By embracing effective communication strategies, scientists can inspire curiosity, promote scientific literacy, and encourage public engagement with science. ABOUT THE AUTHOR Dr Levine, M.D., Ph.D., is currently Professor of Endocrinology and Nutrition Research at the Mayo Clinic in Scottsdale, Arizona. Having trained in clinical nutrition as a scholar at the University of Cambridge, He has dedicated his scientific career to promoting health in adults and children through education and innovation. He holds five tenured professorships at Arizona State University (ASU), is the Dean's Distinguished Professor of Medicine at Case Western Reserve University, and the Regents Professor at Umea University, Sweden. He also serves as the co-director of Obesity Solutions, a collaboration between Mayo Clinic and ASU, and is the international

director of Obesity Solutions' sister center in Sweden. He is an internationally renowned expert in obesity, serving as a named expert at the United Nations, an invitee to the President's Cancer Panel, and a consultant to governments internationally. He serves on the board of the International Center of Missing and Exploited Children. He has authored over 120 scientific papers in peer-reviewed journals and has published novels focused on issues of child exploitation, in more than thirty countries. He has won literary awards (United States, France and the United Kingdom) and has produced several documentaries.

Knowledge communication is a subject intensely discussed nowadays as there is much buzz in the academia about the crisis of scientific authority. Fundamental research but also popular culture, special magazines, traditional books, find increasingly rarer common terms with new audiences like web 2.0 practitioners and various multi-media consumers. There are even pedigree cultured people that seem to accept no more traditional communicating supports and act conflictually towards

them. Some voices claim that general audiences are superficial and consumerist; but on the other hand many speak about lack of openness for the general audience from scientists themselves. The audience of science is therefore fundamental and all the papers in this volume touch it in many ways. Another direction that will be consistent with all these papers along the book is the knowledge as a resource for cultural and regional policies, tourism industry and so forth. Transparency, globalization, regionalization, have no meaning without distinctive specters of regions and local cultures that assert themselves besides traditional European countries.

History needs transparency. This book examines how history can be lost, distorted, changed, or erased to suit the needs of the person or people writing it. Unaccounted for Prisoners-of-War from the Korean War are being used as an example of how the facts of a conflict from more than 50 years ago are still being manipulated to this day, and the fates of these POWs are still being withheld. This book also demonstrates the need for government transparency in order to accurately document and understand the motives and actions of people in history whose decisions affected millions and altered the course of events. This book has been written from the compilation of many sources such as the voluminous historical materials from the US Government National Archives, historical books on the subject, and witness testimony to the US Congress. Also included are statements from a phone interview with officials at the Defense Prisoner of War-Missing Personnel Office (DPMO) conducted in September of 2008. An

annotated bibliography is included. What happened to these men? Why are their fates still being withheld decades after the war's end? What do the Russians, Chinese, and North Koreans have to hide after all this time? One possible answer has the potential to shatter the ceasefire and explode into a new conflict: Some of these POWs might still be alive.

Here comes Aaron Patterson!" --Joshua Graham, bestselling author of Beyond Justice and Darkroom Fans of Veronica Roth, Suzanne Collins, Cassandra Clare and James Dashner will love this young adult paranormal romance series by Aaron Patterson and Chris White. \* \* \* New York Times and USA Today Bestselling thriller writer Aaron Patterson, teams up with Chris White, in the second edition in the Airl saga! If you like young adult paranormal romance or young adult fantasy, you will love the Airl saga! \* \* \* PRODUCT DESCRIPTION: Michael did the unthinkable to save Airl from death, but now he must live with the choices he has made--both good and evil. Tortured by his past and haunted by what he believes might be his future, Michael seeks redemption--but will the past prove to be too strong? How can he break free of it and be the man he longs to be for Airl? If only he had never... Airl. Michael's one true love. He had forced her to drink in new life only to find that old wounds and deep scars do not heal overnight. Can she truly forgive

Michael, can she truly love him? And can he accept that forgiveness? Or is it all for nothing, and has he gone too far already? As the darkness of past choices closes in on them, chases them, intercepts them, coming at them from everywhere at once, how can their love possibly survive? REVIEWS: "It takes rare talent for a man to write a novel from a male POV and have it published to great critical and commercial acclaim. But it takes a miracle for that same male, or in this case males, to write a novel from the POV of a teenage girl and have it turn out as incredibly as did the new StoneHouse YA by Aaron Patterson and Chris White, AIREL. From the first sentence, I felt compelled to dive into this young woman's story and just as importantly, I felt like I personally knew her, which means I laughed, stressed and cried right along with her. A beautifully written and crafted fiction about teenage innocence, faith, loss and love. A must read for teens and adults alike." --Vincent Zandri, International Bestselling Author of The Remains, The Innocent, and Concrete Pearl "I am happy to say that this novel is one of my favorites of its kind. I never thought I could read a novel like this and be so swept away! I am always willing to try new books, but I usually steer clear of this kind of novel. Not anymore! Not when I can be so engrossed into the character's story, like I was with the beautiful AIREL, that before I know, it's over. I kept turning the pages, wanting to, no-NEEDING, to know what was going to happen next." --Molly Edwards, Willow Spring, NC

What is it that Christians of many different Churches find so attractive about the young Jewish girl who gave

birth to Jesus? This book does more than hint at an answer. Chiara Lubich's gospel-based intuitions are a source of new insights for Christians of all traditions. Not only do we see the beauty of a human being who gave birth to God made flesh, not only do we taste the essential poetry of this unique event in history and enter more fully into all it implies, but we are made able to translate this vision into our daily lives. Mary becomes less a person we admire, an object of veneration, and more a source of inspiration, an example on which we can model our lives. "It seems to me that the present times call for a reintroduction of Mary," Chiara Lubich says. "To do this, we hope here to promote a new vision of Mary, one that is largely unknown, based on what God chose to show us about her." "It is my hope that these pages of Chiara, so rich in witness to Mary and in meditations about her, may nourish us and help very many people to say — like Mary and with her — their own 'Here I am,' their own yes to the plan and path that God has prepared for the life of each person. The multitude of people who have walked with Chiara along this path can testify that it leads — also by way of the experience of the cross — to happiness." The contributions to this volume focus on a diverse array of topics in international law, with scholarly interventions from experts in the field, both in academia and the judiciary, as well as case commentary on a recent decision of the International Court of Justice (Chagos Decision). The theoretical and methodological breadth of the issues covered are relevant to audiences beyond the Nigerian and African intellectual space. In particular, this volume includes analysis on critical intellectual property law questions; intersections of national, regional and international law and technology; the African Continental Free Trade Area Agreement; and maritime law. The authoritative views of the experts on the different issues covered in this volume make excellent contributions to their relevant fields.

"The rediscovery of idealism is an unmistakable feature of contemporary philosophy. Heavily criticized by the dominant philosophies of the twentieth century, it is being reconsidered in the twenty-first as a rich and untapped resource for contemporary philosophical arguments and concepts. This volume provides a comprehensive portrait of the major arguments and philosophers in the idealist tradition. Idealism is philosophy on a grand scale, combining microscopic and macroscopic problems into systematic accounts of everything from the nature of the universe to the particulars of human feeling. In consequence, it offers perspectives on everything from the natural to the social sciences, from ecology to cultural criticism. Since idealism is sometimes considered anti-science, however, this book places particular emphasis on its naturalism. Written for a broad readership, the book provides the fullest possible introduction to this most philosophical of philosophical movements"--Publisher's description, p. [4] of cover.

Green materials and green nanotechnology have gained widespread interest over the last 15 years; first in academia, then in related industries in the last few years. The Handbook of Green Materials serves as reference literature for undergraduates and graduates studying materials science and engineering, composite materials, chemical engineering, bioengineering

and materials physics; and for researchers, professional engineers and consultants from polymer or forest industries who encounter biobased nanomaterials, bionanocomposites, self- and direct-assembled nanostructures and green composite materials in their lines of work. This four-volume set contains material ranging from basic, background information on the fields discussed, to reports on the latest research and industrial activities, and finally the works by contributing authors who are prominent experts of the subjects they address in this set. The four volumes comprise of: The first volume explains the structure of cellulose; different sources of raw material; the isolation/separation processes of nanomaterials from different material sources; and properties and characteristics of cellulose nanofibers and nanocrystals (starch nanomaterials). Information on the different characterization methods and the most important properties of biobased nanomaterials are also covered. The industrial point of view regarding both the processability and access of these nanomaterials, as well as large scale manufacturing and their industrial application is discussed — particularly in relation to the case of the paper industry. The second volume expounds on different bionanocomposites based on cellulose nanofibers or nanocrystals and their preparation/manufacturing processes. It also provides information on different characterization methods and the most important properties of bionanocomposites, as well as techniques of modeling the mechanical properties of nanocomposites. This volume presents the industrial point of view regarding large scale manufacturing and their applications

from the perspective of their medical uses in printed electronics and in adhesives. The third volume deals with the ability of bionanomaterials to self-assemble in either liquids or forming organized solid materials. The chemistry of cellulose nanomaterials and chemical modifications as well as different assembling techniques and used characterization methods, and the most important properties which can be achieved by self-assembly, are described. The chapters, for example, discuss subjects such as ultra-light biobased aerogels based on cellulose and chitin, thin films suitable as barrier layers, self-sensing nanomaterials, and membranes for water purification. The fourth volume reviews green composite materials — including green raw materials — such as biobased carbon fibers, regenerated cellulose fibers and thermoplastic and thermoset polymers (e.g. PLA, bio-based polyolefines, polysaccharide polymers, natural rubber, bio-based polyurethane, lignin polymer, and furfurylalcohol). The most important composite processing technologies are described, including: prepregs of green composites, compounding, liquid composite molding, foaming, and compression molding. Industrial applications, especially for green transportation and the electronics industry, are also described. This four-volume set is a must-have for anyone keen to acquire knowledge on novel bionanomaterials — including structure-property correlations, isolation and purification processes of nanofibers and nanocrystals, their important characteristics, processing technologies, industrial up-scaling and suitable industry applications. The handbook is a useful reference not only for teaching activities but also for researchers who

are working in this field.

His book will help teachers improve their practice by explaining how they and their students think and learn. It reveals-the importance of story, emotion, memory, context, and routine in building knowledge and creating lasting learning experiences. Nine, easy-to-understand principles with clear applications for the classroom Includes surprising findings, such as that intelligence is malleable, and that you cannot develop "thinking skills" without facts How an understanding of the brain's workings can help teachers hone their teaching skills "Mr. Willingham's answers apply just as well outside the classroom.

The Guide, which is a companion document to the IMF's Code of Good Practices on Fiscal Transparency (2007), has been revised to reflect the new Code and to provide more recent examples of good practice by individual countries. The Guide applies the good practices of the Code to the unique set of transparency issues faced by countries that derive a significant share of revenues from natural resources. It addresses issues arising both from the sheer size and volatility of such resources and the technical complexity of the transaction flows. The Guide supplements the Manual on Fiscal Transparency (2007).

O cale ușoară și eficientă de a-ți forma obiceiri bune și a scăpa de cele proaste Schimbări mici, rezultate remarcabile „O carte extrem de practică și utilă. James Clear extrage informațiile fundamentale despre formarea obiceiurilor, astfel ca tu să poți realiza mai mult concentrându-te

pe mai puține lucruri." – Mark Manson, autorul bestsellerului *Arta subtilă a nepăsării* „James Clear a petrecut ani de zile perfecționând arta și studiind știința obiceiurilor. Această carte antrenantă și practică este ghidul de care ai nevoie ca să scapi de deprinderile proaste și să-ți formezi unele bune." – Adam Grant, autorul bestsellerurilor *Originalii* și *Option B*. Inspirându-se din cele mai noi descoperiri din biologie, psihologie și neuroștiințe, James Clear a conceput un ghid ușor de asimilat, cu ajutorul căruia obiceiurile bune devin inevitabile, iar cele rele, imposibile. Învață: \* să-ți construiești un sistem pentru a deveni cu 1% mai bun în fiecare zi; \* să renunți la obiceiurile rele și să le păstrezi pe cele bune; \* să eviți greșelile comise în general de cei care încearcă să-și schimbe obiceiurile; \* să depășești lipsa de motivație și de voință; \* să-ți dezvolti o identitate mai puternică și să crezi în tine însuși; \* să-ți faci timp pentru noile obiceiuri (chiar și când viața o ia razna); \* să-ți concepi un mediu care să

favorizeze succesul; \* să faci schimbări mici, ușoare, care oferă rezultate mari; \* să-ți revii atunci când te abați de la drum; \* și, cel mai important, cum să aplici aceste idei în viața reală... .. și multe altele Indiferent dacă e vorba de o echipă care încearcă să câștige un campionat, o organizație care speră să redefinească o industrie sau pur și simplu un om care vrea să se lase de fumat, să slăbească, să reducă stresul ori să realizeze orice alt obiectiv, *Atomic Habits* este soluția. „Nu mă consider un expert și nu dețin toate răspunsurile, dar sunt fericit să împărtășesc ceea ce am învățat până acum." – James Clear „O carte deosebită, care îți va schimba felul în care îți organizezi ziua și îți trăiești viața." – Ryan Holiday, autorul bestsellerurilor *The Obstacle is the Way* și *Ego is the Enemy* „În *Atomic Habits*, Clear îți va arăta cum să depășești lipsa de motivație, cum să schimbi mediul înconjurător ca să încurajezi succesul și cum să-ți faci timp pentru obiceiuri noi și mai bune." – Glamour.com
