Discourses of Globalisation and Higher Education Reforms
Springer

This book analyses and evaluates the accomplishments, challenges, and approaches associated with the New Public Management (NPM) in Africa towards establishing context-specific interventions for public sector institutions' performance. Taking the reader through various business and management approaches, including leadership in the public sector, digitalisation, market orientation and trust building, this book provides an understanding of the key issues facing public sector organisations in Africa and offers novel ways of approaching public management in a changing socio-economic landscape to drive improved performance of public institutions. The book offers students, practitioners and researchers important insights on NPM and public sector institutions in Africa. The recommendations of the book will help government and

policymakers implement appropriate public sector management policies for strengthening public sector service delivery in Africa.

The Directory of Geoscience Departments 50th Edition is the most comprehensive directory and source of information about geosciences departments and researchers available. It is an

invaluable resource for individuals working in the geosciences or must identify or work with specialists on the issues of Earth, Environmental, and related sciences and engineering fields. The *Directory of Geoscience Departments 50th Edition* provides a state/country-sorted listing of nearly 2300 geoscience departments, research departments, institutes, and their faculty and staff. Information on contact information for departments and individuals is provided, as well as details on department enrollments, faculty specialties, and the date and source of faculty and staff's highest degree. New in the 50th edition: Listing of all US and Canadian geoscience theses and dissertations accepted in 2012 that have been reported to GeoRef Information Services, as well as a listing of faculty by their research specialty.

Financial Reporting and Performance Analysis Springer

This volume examines the Africa-Asia relationship from a transregional perspective, namely as a set of emergent social, political and economic practices spanning a number of analytical and spatial scales. Drawing on a host of countries from both regions, the contributions illustrate how encounters increasingly transcend fixed territorial categories at local, national and regional levels. While large-scale political and economic considerations tend to dominate in Asia-Africa related literature—for instance, in China-Africa, BRICS and South-South discourses—the current volume seeks to foster dialogue between these broader levels of analyses and more localized social practices and experiences, including the role of civil society, cultural production and migration. With an emphasis on the “trans” aspects of inter-regional exchange, the volume contributes to a better understanding of new forms of space-

making between these two increasingly important regions.

New Public Management in Africa Springer Nature

The *Journal of Student Affairs in Africa (JSAA)* is an independent, peer-reviewed, multi-disciplinary, open-access academic journal that publishes scholarly research and reflective discussions about the theory and practice of student affairs in Africa. The JSAA strives to be the foremost academic journal dealing with the theory and practice of the student affairs domain in universities on the African continent, and an indispensable resource for national policy makers, the executive leadership of universities and colleges dealing with student affairs, deans of students and other senior student affairs professionals, as well as institutional researchers and academics and students focused on the field of higher education studies and student affairs.

Bold Dream CABI

Mixed methods research is becoming prevalent in many fields, yet little has been done to elevate mixed methods research in information science. A comprehensive picture of information science and its problems is needed to further understand and address the issues associated with it as well as how mixed methods research can be adapted and used. The *Handbook of Research on Mixed Methods Research in Information Science* discusses the quality of mixed methods studies and methodological transparency, sampling in mixed methods research, and the application of theory in mixed methods research throughout various contexts. Covering topics such as the issues and potential directions for further research in mixed methods, this comprehensive major reference work is ideal for researchers, policymakers, academicians, librarians,

practitioners, instructors, and students.

A Giant Tree has Fallen MIT Press

Higher Education Leadership and Management have become increasingly important throughout the years due to the complexities that have to be addressed by universities worldwide. This can be seen not only in professionalisation in fields such as faculty management or in areas of quality assurance and internationalisation, but also in the need for exchange and training in academic leadership, such as that of deans or study deans, or of university leadership in general. The Dialogue on Innovative Higher Education Strategies (DIES) is addressing this need in emerging countries by building platforms of exchange and offering training courses. Not only is the programme supporting capacity building of human resources, but it is also specifically focusing on inducing change within the universities, such as introducing new instruments or tools in the area of quality assurance and internationalisation, and addressing specific challenges or setting up new structures in the form of projects in the frame of the training. The 'National Multiplication Trainings' Programme under DIES is further addressing the sustainability and multiplication of the DIES Programme, that is, alumni are enabled to implement capacity building in higher education leadership and management in their national context. The articles within this volume of the "Potsdamer Beiträge zur Hochschulforschung" (Potsdam Contributions to Higher Education Research) analyse and share the experiences of such training programmes held in Colombia, Democratic Republic of Congo, Guinea, Malaysia, Kenya, and Uganda. They all revolve around the best ways to address the

needs and challenges in higher education leadership and management, and in building capacities in these areas.

Storage of Cereal Grains and Their Products IGI Global

What exactly does it take to bring out the best in you? Pure luck or simply one's fate? How far can one go through sheer grit, hard work and consistency? In *The Bold Dream: Transcending the Impossible*, a medical doctor and an aerospace engineer tell of how they scaled academic heights from under-resourced rural primary schools deep in the heart of the Rift Valley in Kenya, to the University of Oxford as Rhodes scholars. Through narration of real-life experiences, this book explores the challenges they faced while growing up and schooling, the push that their bold dreams gave them, and how they ended up in one of the most prestigious academic institutions in the world. Most importantly, they share deep, thought-provoking views on the sacrifices women in their community make, through the experiences of their mothers. Dr Elisha Ngetich and Dr Gladys Ngetich explore some of the consistent themes in their serendipitous climb to the University of Oxford to pursue PhD. An inspirational read, this book is a must read for anyone who wants to persistently pursue their bold dreams.

Water-Soil-Plant-Animal Nexus in the Era of Climate Change BoD – Books on Demand

The country has a strong private sector and received encouraging forecasts of new oil, gas and water reserves, which if harnessed appropriately bode well for future growth. While a pending international court case resulting from prior elections provoked a measure of uncertainty, the country's medium to long-term economic outlook is robust. With over 40% of the population

under the age of 15, Kenya stands to benefit from a significant demographic dividend, provided that sufficient jobs can be found when this population bulge enters the workforce. The country has a reasonably sized industrial base, competitive infrastructure and a large agricultural sector, all of which offer opportunities for capital-intensive investment.

Exploring Consensual Leadership in Higher Education IGI Global

This book memorialising the life and work of Ali Alamin Mazrui comprises more than 130 tributes written by people ranging from heads of state to journalists. Presented here are those tributes for which copyright permissions were received from among the hundreds that appeared online and print. In preparing this book, it was made very clear that, unlike other books of tributes to great men and women, there would be no segmentation of the sections based on writers and speakers positions in life. Instead, it was decided that the tributes be presented in alphabetical order based on writers and speakers last names. The decision hinged on the fact that Mazrui would not have apposed any segmentation of people by class, race, ethnicity and gender etc. Nonetheless, out of great respect for Mazrui's immediate family members, their tributes are presented first, followed by those from his global family members. Also included at the beginning of the book are three chapters that comprise an introductory essay, a brief biography of Mazrui, and an essay on metaphorical-linguistic analysis of the tributes that follow. The book also has a preface by the coeditors and a forward by Salim Ahmed Salim, the former Prime Minister of the United Republic of Tanzania and Secretary-General of the Organisation of African Unity (OAU), now

known as the Africa Union. Dr. Salim, who served as the Secretary-General of the OAU from 1989 to 2001, was Mazrui's friend and contemporary. Mazrui once described Salim as Mr Africa and the first real postcolonial Secretary-General of the OAU.

This is an open access book. The online conference hosted by the State Polytechnic of Malang. This online conference aims (1) to bring together the researchers and practitioners, students, and civil society organization representatives in the scientific forum; (2) to share and to discuss theoretical and practical knowledge about innovation in Management, Business and Economics. Specifically, this conference can be used as a scientific forum for

accommodating discussion among researchers in the field of business, management and economics science. The theme is Digital Business Transformation and Information System: The Way Forward.

Assessment of Media Development in Kenya WIPO

The management of water resources is extremely important for survival. Depending on the climate, certain regions require different strategies to maintain sustainable hydrological systems. *Hydrology and Best Practices for Managing Water Resources in Arid and Semi-Arid Lands* is a crucial scholarly resource that outlines current trends in water management and offers solutions for the future of this growing field. Highlighting pertinent topics such as hydrological processes modelling, satellite hydrology, water pollution, and climate resources, this publication is ideal for environmental engineers, academicians, graduate students, and researchers that are eager to discover more about the issues and processes currently shaping water management technology.

Enzymes in the Valorization of Waste Springer Nature

This book uncovers the many ways in which innovations and innovation system development policies have become crucial to development policy formation across Africa. As new instruments, actors and tools emerge in development cooperation, the role of innovation in the societal development of developing countries needs to be addressed fully. This book delves into subjects as diverse as the changing development policies between the Global North and South, the role of innovation in international aid and development policies, the role of public, private and non-governmental sectors, universities and other development actors, and the potential for inclusive innovation in local communities. In

particular, the book asks who benefits from innovation-focused development policies, and if and how practical innovation instruments include the global poor. Written in an accessible and engaging style, the book includes a range of discussion questions and further reading suggestions to suit a range of readers, from students right through to policy makers and practitioners, or anyone else looking for an introduction to innovation policies and development in Africa.

Expanding Tertiary Education for Well-Paid Jobs IPR Journals and Book Publishers

The Pentecostal World provides a comprehensive and critical introduction to one of the most vibrant and diverse expressions of contemporary Christianity. Unlike many books on Pentecostalism, this collection of essays from all continents does not attempt to synthesize and simplify the movement's inherent diversity and fragmented dispersion. Instead, the global flows of Pentecostalism are firmly grounded in local histories and expressions, as well as the various modes of their worldwide reproduction. The book thus argues for a new understanding of Pentecostal and Charismatic movements that accounts for the simultaneous processes of pluralization and homogenization in contemporary World Christianity. Written by a distinguished team of international contributors across various disciplines, the volume is comprised of six parts, with each offering a critical perspective on classical themes in the study of Pentecostalism. Led by a programmatic introduction, the thirty-six chapters within these parts explore a variety of themes: history and historiography, conversion, spirit beliefs and exorcism, prosperity, politics, gender relations, sexual identities, racism,

development, migration, pilgrimage, interreligious relations, media, ecumenism, and academic research. The *Pentecostal World* is essential reading for students and researchers in anthropology, history, political science, religious studies, sociology, and theology. The book will also be very useful for those in related fields, such as culture studies, black studies, ethnic studies, and gender studies.

The Pentecostal World Frontiers Media SA

This book reports on practical approaches for facilitating the process of achieving excellence in the management and leadership of organizational resources. It shows how the principles of creating shared value can be applied to ensure faster learning, training, business development, and social renewal. In particular, the book presents novel methods and tools for tackling the complexity of management and learning in both business organizations and society. It covers ontologies, intelligent management systems, methods for creating knowledge and value added. It gives novel insights into time management and operations optimization, as well as advanced methods for evaluating customers' satisfaction and conscious experience. Based on the AHFE 2016 International Conference on Human Factors, Business Management and Society, held on July 27-31, 2016, Walt Disney World®, Florida, USA, the book provides both researchers and professionals with new tools and inspiring ideas for achieving excellence in various business activities.

Innovation for Development in Africa Bloomsbury Publishing
A new perspective on the global food security situation and highlights the need for seeking a common vision and

implementing global planning to define the manner in which the human species will manage its food security. The basic question of 'is there enough food' is examined in general and then in some detail. The history of food production is reviewed in the hope that lessons can be learned from the past. But even after ten thousand years of experience we are not able to feed adequately about a third of our total population, despite what statistics can be made to tell us. Intensive agriculture has stripped out the nutrients that support plant growth and marginalised extensive tracts of land. The global solution to feed the growing population has been and continues to be – produce more food. Even during the last 30 years, about 95 percent of global research investments have focused mainly on increasing productivity. However about a third of the food produced, sufficient to feed over two billion hungry people, is lost or wasted in the food value chain. Climate change is another confounding factor that impinges on our discussions. Pests of all kinds continue to destroy food before and after it is harvested, even though the technology to protect it is available. A huge amount of food is wasted in value chains, particularly at the domestic level. Global food production systems are exposed to unprecedented biosecurity risks posed by invasive harmful organisms and this trend is likely to further exacerbate as current approach to biosecurity is based on the notional premise that lines on maps and the legislation that goes with them is sufficient to halt epidemics. Solutions include extending the number of cultivated plant and animal species to include those that can prosper in what are currently considered to be extreme environments.

Artificial Intelligence Systems and the Internet of Things

in the Digital Era Taylor & Francis

In recent decades, community colleges and universities have struggled with less funding, increased competition, and shrinking enrollment. Borderless online degrees offer opportunities to make higher education more accessible and to make foreign study without having to travel abroad an option. Lower cost, high retention, and reduced time to graduate are all key selling points for these degrees. *Global Demand for Borderless Online Degrees* is an essential research publication that provides the benefits, risks, and solutions for entering the borderless online degree market and discusses novel online approaches that are cost-effective for higher education institutions and affordable for customers at home and abroad. This book describes innovative pedagogy in fused learning classrooms that builds relationship and promotes retention and student satisfaction. Featuring a wide range of topics such as community college, accreditation, and international education, this book is ideal for university presidents, provosts, rectors, chancellors, international educators, administrators, academicians, policymakers, researchers, and students.

Hydrology and Best Practices for Managing Water Resources in Arid and Semi-Arid Lands African Books Collective

This book brings together intelligence systems and the Internet of

Things, with special attention given to the opportunities, challenges, for education, business growth, and economic progression of nations which will help societies (economists, financial managers, engineers, ICT specialists, digital managers, data managers, policymakers, regulators, researchers, academics, and students) to better understand, use, and control AI and IoT to develop future strategies and to achieve sustainability goals. EAMMIS 2021 was organized by the Bridges Foundation in cooperation with the Istanbul Medeniyet University, Istanbul, Turkey, on March 19–20, 2021. EAMMIS 2021 theme was Artificial Intelligence Systems and the Internet of Things in the digital era. The papers presented at the conference provide a holistic view of AI education, MIS, cybersecurity, blockchain, Internet of Ideas (IoI), and knowledge management.

Universitätsverlag Potsdam

The Global Innovation Index ranks the innovation performance of 141 countries and economies around the world, based on 79 indicators. This edition explores the impact of innovation-oriented policies on economic growth and development. High-income and developing countries alike are seeking innovation-driven growth through different strategies. Some countries are successfully improving their innovation capacity, while others still struggle.
