Aho's first novel Rautatie (Railroad), considered one of his main works, is a story of an elderly couple who hear about railroad first time ever and have a hard time imagining carriages with no horses. They eventually get around to trying it out. Juhani Aho's esikisromani vuodelta 1884, Rautatie, on kertomus maaseudun ukosta ja akasta, jotka kuulevat naapurikylälle saapuneesta uudesta ihmeestä, ilman hevosia kulkevasta vaunusta, ja päättävät pitkän jähkailun jälkeen lähteä sitä katsomaan. First Page: RAUTATIE eli kertomus ukosta ja akasta, jotka eivät olleet sitä ennen nähneet Kirj. Juhani Aho 1884. I. Pakkanen paukkaa nurkissa, raskas pitkin aidan selkiä ja seuloa huurua puihin ja pensaihin. Aurinko kultaa kirkon ja tapulin ristejä, paistaa hauskaasti harmaiseen koivikkoon ja

valaisee joka savupatsaan, joita kiemuroitellen kumpuilee piipuista ja lakeistorvista läheltä ja kaukaa. Tie ei ihan juuri kuolemataankaan huuda reen jalaksen alla, vaikka surullisesti ja toivottomasti se valittelee. Kuusen latvassa kyyhättä harakka, kaula lyhyen ja paksuna, pöyhähyenien sisästä. Se on jo päivän valetessa munnikista ypuultaan pellon takaa liikkeelle lähtenyt, lentänyt riihen peritse ja navetan yli ja istunut pappilan puutarhaan, jossa aivan yksin seisoo kuusi koivujen keskellä. Ei ole harakka vielä aamiaista saanut, ei aukea kukaan ovi eikä näy ajavata pappilan pihalla. Eilen hyvä piika nakkeli töhtöitä harakalle, ja eilen kun yksi hevosensa kanssa kartanolta lähti, niin toinen tuli...

Robby Muller is one of the most inspiring cinematographers of our time. His influence is noticeable in his long-term collaborations with directors such as Wim Wenders and Jim Jarmusch and his groundbreaking work for films as 'Breaking the

Waves' and 'Dancer in the Dark' by Lars von Trier. He not only helped to shape their films, but his contribution also reveals an adventurous and creative vision which can also be seen in other films by directors such as Alex Cox and Barbet Schroeder. This publication gives a visual insight in his artistic flexibility and technical expertise as a cinematographer, and reveals his passionate pleasure in the nature of light in all its manifestations. The Handbook of School Art Therapy Bonnier Books Finland Award-winning Finnish graphic novelist Tiitu Takalo tells the compelling story of the fight to save a historic working-class neighborhood from the threat of gentrification and concrete high-rises in her hometown in Finland Based on a true story, this graphic novel masterfully interweaves the town of Annikki's rich history, the author's own love story with her partner, and their role in the community effort to save the neighborhood from demolition. From the formation of the landscape by prehistoric glaciers to the stories of the men and women laborers who once inhabited Annikki, Takalo explores every fascinating corner of this neighborhood she calls home. Featuring Takalo's luminous full-color art throughout, this story of a historic neighborhood's preservation is by turns thoughtful, humorous, and inspiring, and it will speak to all those who have been displaced from somewhere they love. The original Finnish text is beautifully translated and edited by Associate Professor Michael Demson and Professor Helena Halmari, editor-in-chief of the Journal of Finnish Studies.

The Key to the Kalevala was originally published in Finland in 1916. Now this insightful and detailed exploration of the ancient

origins of Finnish mythology is available in English. Students of the ancient traditions and mystical teachings will find no better introduction to the profound esoteric meaning of the Kalevala, the Finnish National Epic, than Ervast's book. This translation is authorized by Ervast's study-school in Finland, whose members have worked to preserve his insights into his culture's past and the spiritual evolution of humanity. We also have the good fortune of being able to use Eino Friberg's beautiful translation of Kalevala (1988) into the modern American idiom. The combined work of Ervast and Friberg results in a unique, insightful, and aesthetically pleasing offering.

The problem of making radar measurements of meteorological phenomena such as rainfall, clouds, and ice crystal formation from a satellite is discussed. The main problem areas are obtaining sufficient signal-to-noise ratio within the weight limitation of the satellite system and avoiding ground clutter when scanning any significant angle off nadir. Sufficient signal-to-noise ratio to detect heavy rainfall at 35 GHz is available for a downlooking only system within the weight power limitation of the Military Meteorological Satellites. An arrested aperture doppler system to reject ground clutter at large scan angles off nadir while detecting rainfall by doppler due to its vertical motion is suggested.

From the Earth's Core to Outer Space focuses on four themes: (1) Evolving Earth's crust, (2) Changing Baltic Sea, (3) Climate Change, and (4) Planet Earth, third stone from Sun. The focus on these four topics provides both a state of the art review of earth

science topics of particular importance to Scandinavia and the Baltic and also the global context in which a consideration of these topics must be made. It finishes by discussing our use of space born technologies for understanding these topics and places the Earth within the context of our neighbouring planets and their satellites. The first theme includes papers on the structure, origin and evolution of the Earth's crust and in particular the ore deposits in Fennoscandia, plate-tectonic drift of Fennoscandia (Baltica), and postglacial isostatic rebound of the crust. The second theme contains papers dealing with changes in the ice season of the Baltic Sea, inflow and stagnation in deep basins, biology of the Baltic Sea, and carbon dioxide balance in sea water. The third theme deals with origin and evolution of oxygen in atmosphere, postglacial climate change, effects of aerosols and greenhouse gases on climate, interplay between anthropogenic and natural factors in the current climate change, and Earth's water resources. The fourth theme includes articles on Earth's space environment, use of satellites in cartography and geodesy, information obtained by space probes on Mars and other planets and their moons, and possibilities to find life on them.

"The Four Days of Jean Gourdon" (Les Quatre Journees de Jean Gourdon; 1874, in: Nouveaux Contes a Ninon) deserves to rank among the very best things to which Zola has signed his name. It is a study of four typical days in the life of a Provencal peasant of the better sort, told by the man himself... --- In the first of these it is "Spring" Jean Gourdon is eighteen years of age, and he steals away from the house of his uncle Lazare, a country priest, that he

may meet his coy sweetheart Babet by the waters of the broad Durance... Next follows a day in "Summer," five years later; Jean, as a soldier in the Italian war, goes through the horrors of a battle and is wounded. This episode, which has something in common with the "Sevastopol" of Tolstoy, is exceedingly ingenious in its observation of the sentiments of a common man under fire... The "Autumn" of the story occurs fifteen years later. Jean and Babet have now long been married. They are rich, healthy, devoted to one another, respected by all their neighbours; but there is a single happiness lacking - they have no child. Only now, when the corn and the grapes are ripe, this gift also is to be theirs... The optimistic tone has hitherto been so consistently preserved, that one must almost resent the tragedy of the fourth day. This is eighteen years later, on a Winter's night: The river Durance rises in spate... --- It is impossible to give an impression of the charm and romantic sweetness of this little masterpiece. It raises many curious reflections to consider that this exquisitely pathetic pastoral, with all its gracious and tender personages, should have been written by the master of Naturalism, the author of "Germinal" and of "Pot-Bouille" ("Piping Hot "). Positioning is hot. Not only in the realm of consumer goods manufacturers, but also for other companies, institutions, governments and even individual persons. An explosion of good quality products on the market and targeted media and advertising campaigns has led to an increasing interest from organizations as to how to strategically position their brand. Up to now, only a few books on positioning were published. Positioning the Brand picks up the gauntlet with an approach based on two

fundamental choices: Firstly, the book was written from the perspective of the brand manager, and has therefore been shaped as a practical roadmap. Secondly, this book advocates a new stance on positioning, teaching the reader to look from the inside-out, instead of adopting the usual outside-in methodology. This inside-out approach departs from an analysis of the corporate identity, enabling better fulfilment of external positioning, and ensuring internal support. This book is intended for (future) managers, marketing professionals and communication professionals responsible for the commercial success and reputation of a brand. The contents have a practical set-up, reinforced by engaging examples, and enable the reader to individually complete a positioning process.

Bringing together interdisciplinary leaders in methodology and arts-based research (ABR), this comprehensive handbook explores the synergies between artistic and research practices and addresses issues in designing, implementing, evaluating, and publishing ABR studies. Coverage includes the full range of ABR genres, including those based in literature (such as narrative and poetic inquiry); performance (music, dance, playbuilding); visual arts (drawing and painting, collage, installation art, comics); and audiovisual and multimethod approaches. Each genre is described in detail and brought to life with robust research examples. Team approaches, ethics, and public scholarship are discussed, as are innovative ways that ABR is used within creative arts therapies, psychology, education, sociology, health sciences, business, and other disciplines. The companion website includes selected figures from the book in full color, additional

online-only figures, and links to online videos of performance pieces. This e-book edition features 61 full-color figures. (Figures will appear in black and white on black-and-white e-readers). See also Dr. Leavy's authored book, *Method Meets Art*, Second Edition, an ideal course text that provides an accessible introduction to ABR.

From the award-winning Mauri Kunnas, Finland's most celebrated children's author, a hilarious picture book which follows the adventures of a sleepwalking goat. Mr. Clutterbuck, a mild-mannered goat, sleepwalks his way into unimaginable adventures: one night the lead singer of a rock band, the next an entrepreneur, Mr. Clutterbuck soon finds himself the hero of his town. A book that will send readers of all ages into fits of laughter. Mr. Clutterbuck is blissfully unaware of his reputation as the busiest and loudest sleepwalker in town. Meek and mild-mannered when awake, at night Mr. Clutterbuck seeks thrills and adventures. Often the accidental instigator of chaos, Mr. Clutterbuck soon becomes the lead singer of a rock band, an entrepreneur, a disco king, and, eventually, the hero of his town. Goodnight, Mr. Clutterbuck is sure to captivate readers of all ages as we wonder what kind of situation Mr. Clutterbuck will find himself in next. With a lively tapestry of characters, including a motorcycle gang of cats and crocodiles, a hippo in charge of a sausage factory, and an ill-tempered bull at a theme park, Mauri Kunnas playfully shows what can happen when you step outside your comfort zone.

You've researched your character extensively, tailored her to your audience, sketched hundreds of versions, and now you lean back content as you gaze at your final character model sheet. But now what? Whether you want to use her in an animated film,

television show, video game, web comic, or children's book, you're going to have to make her perform. How a character looks and is costumed starts to tell her story, but her body language reveals even more. Character Mentor shows you how to pose your character, create emotion through facial expressions, and stage your character to create drama. Author Tom Bancroft addresses each topic with clear, concise prose, and then shows you what he really means through commenting on and redrawing artwork from a variety of student "apprentices." His assignments allow you to join in and bring your drawing to the next level with concrete techniques, as well as more theoretical analysis. Character Mentor is an apprenticeship in a book. Professional artists from a variety of media offer their experience through additional commentary. These include Marcus Hamilton (Dennis the Menace), Terry Dodson (X-Men), Bobby Rubio (Pixar), Sean "Cheeks" Galloway (Spiderman animated), and more. With a foreword by comicbook artist Adam Hughes, who has produced work for DC, Marvel Comics, Lucasfilm, Warner Bros. Pictures, and other companies.

**Death Kit** Crown Books for Young Readers

This book offers new insights into truth, knowledge, and reality. It details a unique approach to epistemological relativism based on the concept of points of view. In a point of view, an aspect represents an object for a subject. By applying this concept of points of view, the author develops a consistent and adequate form of relativism, called viewpoint relativism, according to which epistemic questions like "Is X true (or justified or existing)" are viewpoint-dependent. The monograph examines central issues related to epistemological relativism. It analyzes major

arguments pro and con from different opinions. The author presents the arguments of well-known philosophers. These include such thinkers as Paul Boghossian, John Dewey, Nelson Goodman, Martin Kusch, C.I. Lewis, John MacFarlane, Hilary Putnam, W.V.O. Quine, Richard Rorty, John Searle, and Ludwig Wittgenstein. In the process, the author deconstructs the standard account of correspondence theory of truth. Viewpoint relativism is a moderate relativism, which is not subjected to standard criticism of extreme relativism. This book argues that knowledge creation presupposes openness to different points of view and their comparison. It also explores the broader implications of viewpoint relativism into current debate about truth in society. The author defends a critical relativism, which accepts pluralism but is critical against all points of view. In the conclusion, he explores the relevance of viewpoint relativism to democracy by showing that the main threat of modern democratic society is not pluralism but absolutism and fundamentalism.

"A unique window into human behavior and development."  
—Steven Pinker  
The riveting story of two sets of identical twins separated at birth and improbably reunited as adults, a dream case for exploring nature and nurture. *Accidental Brothers* tells the unique story of two sets of identical Colombian twin brothers who discovered at age 25 that they were mistakenly raised as fraternal twins—when they were not even biological brothers. Due to an oversight that presumably occurred in the hospital nursery, one twin in each pair was switched with a twin in the other pair. The result was two sets of unrelated “fraternal” twins—Jorge and Carlos, who were raised in the lively city of Bogotá; and William and Wilber, who were raised in the remote rural village of La Paz, 150 miles away. Their parents and siblings were aware of the enormous physical and behavioral differences between the members of each set, but never doubted that the two belonged in their biological families. Everyone’s life unraveled when one of the twins—William—was mistaken by a young woman for his real identical twin, Jorge. Her “discovery” led to the truth—that the alleged twins were not twins at all, but rather unrelated individuals who ended up with the wrong families. Blending great science and human interest, *Accidental Brothers* by Nancy L. Segal and Yesika S. Montoya will inform and entertain anyone interested in how twin studies illuminate the origins of human behavior, as well as mother-infant identification and the chance events that can have profound consequences on our lives.
